Subject: RE: Williams Cottage, Queenstown

Hi Jackie – fee quote as per below

activity	cost
Provide a “preliminary design report” or “design intent statement” that shows how pipe would run and what size. This would be in sketch form so it can be adjusted without wasting any time on elaborate drawings. This may develop through some design iterations via email	480.00
Conduct a site visit to refine proposed design. We would bring some pipe and bracket samples to ensure best understanding of proposed effect on the heritage fabric	800.00
Provide a storage declaration form to be completed by the occupier – there are limitations on storage height depending on what is being stored and clearance below sprinkler heads. This assist us to make sure the correct hazard classification is selected	incl
Arrange a flow test to base final pipe sizes on best hydraulic information	150
Produce drawings, specification and a PS1 for consent and for pricing	1950
Assist during tender evaluation (we do not recommend South Pacific Fire Protection but there are other reliable contractors working in this area)	incl
Provide construction observation and witness commissioning & acceptance flow testing & provide a PS4	1390
Provide completion notice to the SSC & develop the compliance schedule	incl
total	4770.00 + gst
Disbursements + 10% handling	
Flow test (estimate)	500
SSC certification fees (estimate)	2000

Kind regards

Graham Wyatt
