
44 CONEBURN INDUSTRIAL ZONE

44.1

Purpose

The Coneburn Industrial Zone provides for industrial and service activities. Conversely, standalone offices, residential and almost all retail uses are excluded within the zone in order to ensure that it does not become a mixed use zone where reverse sensitivity issues and land values make industrial and service activities unviable within the zone.

44.2

Objectives and Policies

44.2.1 Objective – A dedicated industrial and service zone with a mix of compatible activities that excludes residential, standalone offices, and most retail.

Policies	<p>44.2.1.1 Enable a wide variety of industrial and service activities ranging from lighter industrial activities to those of a yard based nature through the use of the Structure Plan limiting development to Activity Areas 1a and 2a.</p> <p>44.2.1.2 Exclude retail and commercial activities that do not directly support or are related to industrial and service activities, and to avoid the use of industrial land for non-industrial purposes.</p> <p>44.2.1.3 Exclude offices (not ancillary to a permitted activity) to avoid reverse sensitivity effects and to avoid the use of industrial land for non-industrial purposes.</p> <p>44.2.1.4 At the time of subdivision or development, provide adequate road access, onsite parking (staff and visitors) and loading and manoeuvring for all types of vehicles.</p> <p style="margin-left: 20px;">Note: This can be enabled by shared parking, access and loading arrangements that are secured by an appropriate legal mechanism.</p> <p>44.2.1.5 Access to the State Highway shall be limited to only those access points shown on the Structure Plan and upgraded commensurate to the development of the zone.</p> <p>44.2.1.6 Restrict residential activities in the zone to only custodial units for people whose duties require them to live on site.</p> <p>44.2.1.7 Unless specifically provided for in the policies for this zone, exclude activities (such as residential, visitor accommodation and community activities) that conflict with the intended purpose of the zone, through the potential for reverse sensitivity effects; or by reducing the land available for industrial and service activities.</p> <p>44.2.1.8 To ensure that development and subdivision only occurs where either the necessary infrastructure exists to service it, or temporary measure(s) have been agreed to by the council.</p>
----------	--

44.2.2 Objective – The zone will fit into the landform with visual effects from outside the zone mitigated by landscaping and retention of areas of open space.

- Policies
- 44.2.2.1 The subdivision design, earthworks and associated mitigation measures including protection of open space and landscaping, shall ensure that built form and associated activities within the zone are not highly visible when viewed from State Highway 6.
 - 44.2.2.2 Minimise the adverse effects of noise, glare, dust and pollution.
 - 44.2.2.3 Limit the rate of development of the zone to ensure open space areas are appropriately landscaped and revegetated.
