

12 QUEENSTOWN TOWN CENTRE

12.1

Zone Purpose

Town centres provide a focus for community life, retail, entertainment, business and services. They provide a vital function for serving the needs of residents, and as key destinations for visitors to our District, they provide a diverse range of visitor accommodation and visitor-related businesses. High visitor flows significantly contribute to the vibrancy and economic viability of the centres.

Queenstown will increasingly become a dynamic and vibrant centre with high levels of tourism activity that provides essential visitor-related employment. It serves as the principal administrative centre for the District and offers the greatest variety of activities for residents and visitors. It has a range of entertainment options and serves as a base for commercial outdoor recreation activities occurring throughout the Wakatipu Basin. Visitor accommodation is provided within and near to the town centre. Over time, Queenstown town centre will evolve into a higher intensity and high quality urban centre.

Development within the Special Character Area of the Town Centre Zone (shown on Planning Maps) is required to be consistent with the Queenstown Town Centre Design Guidelines 2015, reflecting the specific character and design attributes of development in this part of the Town Centre. The Entertainment Precinct (also shown on Planning Maps) has permitted noise thresholds that are higher than other parts of the Town Centre in order to encourage those noisier operations to locate in the most central part of town, where it will have least effect on residential zones.

12.2

Objectives and Policies

12.2.1 **Objective - A Town Centre that remains relevant to residents and visitors alike and continues to be the District's principal mixed use centre of retail, commercial, administrative, entertainment, cultural, and tourism activity.**

- | | |
|----------|--|
| Policies | <p>12.2.1.1 Enable intensification within the Town Centre through providing for greater site coverage and additional building height provided effects on key public amenity and character attributes are avoided or satisfactorily mitigated.</p> <p>12.2.1.2 Provide for new commercial development opportunities within the Town Centre Transition subzone that are affordable relative to those in the core of the Town Centre in order to retain and enhance the diversity of commercial activities within the Town Centre.</p> <p>12.2.1.3 Recognise the important contribution that night time activity makes to the vibrancy and economic prosperity of the Town Centre by enabling restaurant and bar activities to occur without unduly restrictive noise controls.</p> <p>12.2.1.4 Enable residential activities and visitor accommodation activities while acknowledging that there will be a lower level of residential amenity due to the mix of activities and late night nature of the town centre.</p> |
|----------|--|

12.2.2 Objective - Development that achieves high quality urban design outcomes and contributes to the town's character, heritage values and sense of place.

- Policies
- 12.2.2.1** Require development in the Special Character Area to be consistent with the design outcomes sought by the Queenstown Town Centre Design Guidelines 2015.
- 12.2.2.2** Require development to:
- Maintain the existing human scale of the Town Centre as experienced from street level through building articulation and detailing of the façade, which incorporates elements which break down building mass into smaller units which are recognisably connected to the viewer; and
 - Contribute to the quality of streets and other public spaces and people's enjoyment of those places; and
 - Positively respond to the Town Centre's character and contribute to the town's 'sense of place'
- 12.2.2.3** Control the height and mass of buildings in order to:
- Retain and provide opportunities to frame important view shafts to the surrounding landscape; and
 - Maintain sunlight access to public places and to footpaths, with a particular emphasis on retaining solar access into the Special Character Area (as shown on Planning Maps 35 and 36).
- 12.2.2.4** Allow buildings to exceed the discretionary height standards in situations where:
- The outcome is of a high quality design, which is superior to that which would be achievable under the permitted height;
 - The cumulative effect of the additional height does not result in additional shading that will progressively degrade the pedestrian environment or enjoyment of public spaces; and
 - The increase in height will facilitate the provision of residential activity.
- 12.2.2.5** Allow buildings to exceed the non-complying height standards only in situations where the proposed design is an example of design excellence and building height and bulk have been reduced elsewhere on the site in order to:
- (a) Reduce the impact of the proposed building on a listed heritage item; or
 - (b) Provide an urban design outcome that is beneficial to the public environment. For the purpose of this policy, urban design outcomes that are beneficial to the public environment include:
 - Provision of sunlight to any public space of prominence or space where people regularly congregate
 - Provision of a pedestrian link
 - Provision of high quality, safe public open space
 - Retention of a view shaft to an identified landscape feature

- 12.2.2.6** Ensure that development within the Special Character Area reflects the general historic subdivision layout and protects and enhances the historic heritage values that contribute to the scale, proportion, character and image of the Town Centre.
- 12.2.2.7** Acknowledge and celebrate our cultural heritage, including incorporating reference to tangata whenua values, in the design of public spaces, where appropriate.
- 12.2.2.8** Acknowledge that parts of the Queenstown Town Centre are susceptible to flood risk and mitigate the effects of this through:
 - (a) Requiring minimum floor heights to be met;
 - (b) Encouraging higher floor levels (of at least 312.8 masl) where amenity, mobility, and streetscape are not adversely affected; and
 - (c) Encouraging building design and construction techniques which limit the impact of flooding or ponding in areas of known risk.
- 12.2.2.9** Require high quality comprehensive developments within the Town Centre Transition subzone and on large sites elsewhere in the Town Centre.

12.2.3 Objective – An increasingly vibrant Town Centre that continues to prosper while maintaining a reasonable level of residential amenity within and beyond the Town Centre Zone.

- Policies
- 12.2.3.1** Require activities within the Town Centre Zone to comply with noise limits, and sensitive uses within the Town Centre to insulate for noise in order to mitigate the adverse effects of noise within and adjacent to the Town Centre Zone.
 - 12.2.3.2** Minimise conflicts between the Town Centre and the adjacent residential zone by avoiding high levels of night time noise being generated on the periphery of the Town Centre and controlling the height and design of buildings at the zone boundary.
 - 12.2.3.3** Recognise the important contribution that night time activity makes to the vibrancy and economic prosperity of the Town Centre and specifically provide for those activities, while mitigating effects on residential amenity by:
 - (a) Enabling night time dining and socialising, both indoors and outdoors, to varying degrees throughout the Town Centre;
 - (b) Providing for noisier night time activity within the entertainment precinct in order to minimise effects on adjacent residential zones; and
 - (c) Ensuring that the nature and scale of licensed premises located in the Town Centre Transition subzone are compatible with adjoining residential zones.
 - 12.2.3.4** Enable residential and visitor accommodation activities within the Town Centre while:
 - (a) Acknowledging that the level of amenity will be lower than in residential zones due to the density, mixed use, and late night nature of the Town Centre and requiring that such sensitive uses are insulated for noise;

- (b) Discouraging residential uses at ground level in those areas where active frontages are particularly important to the vibrancy of the Town Centre;
- (c) Avoiding, or, where this is not possible, mitigating adverse traffic effects from visitor accommodation through encouraging operators to provide guests with alternatives to private car travel, discouraging the provision of onsite car parking, and through the careful location and design of any onsite parking and loading areas; and
- (d) Discouraging new residential and visitor accommodation uses within the Entertainment Precinct.

12.2.3.5 Avoid the establishment of activities that cause noxious effects that are not appropriate for the Town Centre.

12.2.3.6 Ensure that the location and direction of lights in the Town Centre does not cause significant glare to other properties, roads, and public places and promote lighting design that mitigates adverse effects on the night sky.

12.2.4 Objective - A compact Town Centre that is safe and easily accessible for both visitors and residents.

Policies

12.2.4.1 Encourage a reduction in the dominance of vehicles within the Town Centre and a shift in priority toward providing for public transport and providing safe and pleasant pedestrian and cycle access to and through the Town Centre.

12.2.4.2 Ensure that the Town Centre remains compact and easily walkable by avoiding outward expansion of the Town Centre Zone. Encourage walking to and within the Town Centre by improving the quality of the pedestrian experience by:

- (a) Maintaining and enhancing the existing network of pedestrian linkages and ensuring these are of a high quality;
- (b) Requiring new pedestrian linkages in appropriate locations when redevelopment occurs;
- (c) Strictly limiting outward expansion of the Town Centre Zone and commercial activity beyond it; and
- (d) Encouraging the provision of verandas along pedestrian-oriented streets, while acknowledging that verandas may not be appropriate or necessary in applications involving a heritage building; or where no verandas exist on adjoining buildings.

12.2.4.3 Minimise opportunities for criminal activity through incorporating Crime Prevention Through Environmental Design (CPTED) principles as appropriate in the design of lot configuration and the street network, carparking areas, public and semi-public spaces, accessways/ pedestrian links/ lanes, and landscaping.

12.2.4.4 Off-street parking is predominantly located at the periphery of the Town Centre in order to limit the impact of vehicles, particularly during periods of peak visitor numbers.

12.2.4.5 Plan for future public transport options by considering the needs of public transport services and supporting infrastructure when designing roading improvements.

- 12.2.4.6** Encourage visitor accommodation to be located and designed in a manner that minimises traffic issues that may otherwise affect the safety and amenity of pedestrians and cyclists, particularly in peak periods.

12.2.5 **Objective - Integrated management of the Queenstown Bay land-water interface, the activities at this interface and the establishment of a dynamic and attractive environment for the benefit of both residents and visitors.**

- Policies
- 12.2.5.1** Encourage the development of an exciting and vibrant waterfront, which maximises the opportunities and attractions inherent in its location and setting as part of the Town Centre.
- 12.2.5.2** Promote a comprehensive approach to the provision of facilities for water-based activities.
- 12.2.5.3** Conserve and enhance, where appropriate, the natural qualities and amenity values of the foreshore and adjoining waters.
- 12.2.5.4** Retain and enhance all the public open space areas adjacent to the waterfront.
- 12.2.5.5** Maximise pedestrian accessibility to and along the waterfront for the enjoyment of the physical setting by the community and visitors.
- 12.2.5.6** Provide for structures within the Queenstown Bay waterfront area subject to compliance with strict location and appearance criteria
