Q1 I am giving feedback as: **An individual**

Page 3: Personal Details

Q2 Name of organisation **Respondent skipped this question**

Page 4: Personal Details

Q3 Full name

Neki Pate

Page 5: Feedback

Q8 Do you agree with the proposed priority thoroughfares Council has identified? **Yes**

Q9 If not, which priority thoroughfares do you disagree with and why?

I think there needs to be other priority place for the community

So what happens with medical

For kelvin heights etc qtn hill

The areas you have highlighted are important - a tidy up of Searle lane

But has it been concidered that depending on the earthquake the lake might have tidal surges which negate these areas ? Potentially...

but yes they are good but other areas exist

Q10 Are there any other priority thoroughfares that you think meet the criteria but are not listed?

Arthur's point / kelvin height community

But in terms of cbd areas above ie hallestein road

Frankton road

Identifying potentially earthquake-prone priority thoroughfares and buildings

Q8 Do you agree with the proposed priority thoroughfares Council has identified? **Yes**

Q9 If not, which priority thoroughfares do you disagree with and why?

See below

Q10 Are there any other priority thoroughfares that you think meet the criteria but are not listed?

Shotover Street Bay Centre Building. Shotover St side. West end apartment has concrete (large) flower tubs sitting on balcony edge, would fall to footpath and anyone walking there, with any large shake.

Q8 Do you agree with the proposed priority thoroughfares Council has identified? **Yes**

Q9 If not, which priority thoroughfares do you disagree with and why?

Not applicable as above

Q10 Are there any other priority thoroughfares that you think meet the criteria but are not listed?

Perhaps Buckingham and Bedford Street, Arrowtown, where the historic trees are located should also be considered as priority thoroughfares in relation to tree failure in a seismic event. I realise this is outside the scope of the built environment however trees are an earthquake risk.

The Council could protect thoroughfares in the short term by providing temporary enclosed walkways (as in construction) if necessary to prevent street closures.
