

11 LARGE LOT RESIDENTIAL

11.1

Zone Purpose

The Large Lot Residential Zone provides low density living opportunities within defined Urban Growth Boundaries. The zone also serves as a buffer between higher density residential areas and rural areas that are located outside of Urban Growth Boundaries.

The zone generally provides for a density of one residence every 2000m² to provide for a more efficient development pattern to utilise the Council's water and wastewater services while maintaining opportunities for a variety of housing options, landscaping and open space. Identified areas have a residential density of one residence every 4000m² reflecting landscape or topographical constraints such as around Mt Iron in Wanaka.

The potential adverse effects of buildings are controlled by bulk and location, colour and lighting standards and in respect of the lower density (4,000m²) part of the zone, design and landscaping controls imposed at the time of subdivision.

Community activities and low intensity forms of visitor accommodation may be appropriate provided the low density development character, and amenity for residents is maintained and there is a demonstrated need to locate in the zone.

While development is anticipated in the zone, some areas are subject to natural hazards and, where applicable, it is anticipated that development will recognise and manage the risks of natural hazards at the time of subdivision.

11.2

Objectives and Policies

11.2.1 Objective - A high quality of residential amenity values are maintained within the Large Lot Residential Zone.

Policies	11.2.1.1	Maintain low density residential character and amenity through minimum allotment sizes that efficiently utilise the land resource and infrastructure (Area A), and require larger allotment sizes in those parts of the zone that are subject to significant landscape and/or topographical constraints (Area B).
	11.2.1.2	Maintain and enhance residential character and high amenity values by controlling the colour, scale, location and height of buildings and in Area B require landscaping and vegetation controls.
	11.2.1.3	Control lighting to avoid glare to other properties, roads, public places and views of the night sky.
	11.2.1.4	Have regard to hazards and human safety, including fire risk from vegetation and the potential risk to people and buildings, when assessing subdivision, development and any landscaping in Area B.

11.2.2 Objective - Predominant land uses are residential. Where appropriate, community and recreational activities also occur.

- Policies
- 11.2.2.1 Provide for residential and home occupation as permitted activities, and recognise that depending on the location, scale and type, community activities may be compatible with and enhance the zone’s amenity values.
 - 11.2.2.2 Commercial or other non-residential activity located on the periphery of residential and township areas shall avoid undermining the integrity of the town centres, urban rural edge and where applicable, the Urban Growth Boundaries.
 - 11.2.2.3 Ensure that any commercial and non-residential activities, including restaurants, maintain or enhance the amenity, quality and character of the zone.

11.3.2 Interpreting and Applying the Rules

- 11.3.2.1 A permitted activity must comply with all the rules listed in the Activity and Standards tables, and any relevant district wide rules, otherwise a resource consent will be required.
- 11.3.2.2 Where an activity does not comply with a Standard listed in the Standards table, the activity status identified by the ‘Non-Compliance Status’ column shall apply.

- 11.3.2.3 Where an activity breaches more than one Standard, the most restrictive status shall apply to the activity.
- 11.3.2.4 Each residential unit may include a single residential flat and any other accessory buildings.
- 11.3.2.5 The following abbreviations are used within this Chapter.
