Subject: UCES - PDP Variation-Landscape schedules

Thanks very much Lynley.

The Commission has considered the request from UCESI below and agree to an extension of time for filing of their written submissions (if necessary) to 5pm on the day following lodgement of the Expert Conferencing Report.

This extension of time is also available to any other submitters who wish to refer to the Expert Conferencing Report in their submissions. We note that submitters, as an alternative to written submissions, may wish to address any points arising from the Expert Conferencing Report orally at the hearing.

It would be appreciated if you could convey this advice to all submitters.

Very best wishes,
Jane

Subject: PDP Variation-Landscape schedules

To: The Commissioners-PDP Variation landscape schedules

The Society has already written its submissions (barring a final read through) for the landscape schedule variation. These are due to be lodged on 11 October per the commissioner's timetable.

A problem may have arisen in that the Society would like the opportunity to comment in these submissions on any recommendations** that arise from the conferencing currently taking place. The Society needs perhaps a day to study these once they have been received.

If the transcripts and report(s) from conferencing are available on 10 October there is no issue. We are just flagging the potential issue here,

**outcomes from conferencing are recommendations not evidence
