Appendix 1 - Designations

1 Statement

The majority of the designations incorporated in the District Plan have been rolled over under clause 4 of the First Schedule of the Act, in an unmodified form from the previous designations in the Transitional District Plan. Most of these works have already been given effect to, and accordingly do not lapse after five years in terms of section 184 of the Act.

Any new designations incorporated into this Plan will lapse after five years, unless a longer period is specifically identified in the following schedules, or the designated work is given effect to in the specified time period.

All designated land is identified on the District Plan Maps and in the schedule.
## Schedule of Designations

</tbody>
</table>
A Roads

All Queenstown Lakes District Council Roads are deemed to be designated for the purpose of road.

A.1 Stopped Roads

Council shall stop all roads in accordance with either the Local Government Act 1974 or the Public Works Act 1981.

Where the boundary of a legal road is re-aligned, or a legal road is stopped, the Council shall apply to the land no longer designated road a zone(s), in accordance with one or more of the following provisions:

(i) Zoning shall be that which best accommodates any existing land use activities on the site of the stopped road, and which cause no more than minor effect to the environment; and/or

(ii) Zoning shall reflect any topographical or natural features that constitute logical reason for zoning; and/or

(iii) Stopped roads shall be zoned in accordance with the adjoining zone of least intensive development potential (refer to Table A.1).

Table A.1 – Least Intensive District Zoning to most Intensive District Zoning

(i) Rural General
(ii) Gibbston Character
(iii) Rural Lifestyle/Bendemeer
(iv) Rural Residential
(v) Resort/Rural Visitor
(vi) Arrowtown Historic Management
(vii) Low Density Residential/Penrith park
(viii) Township
(ix) High Density Residential
(x) Corner Shopping Centre
(xi) Industrial
(xii) Business
(xiii) Remarkables park
(xiv) Town Centre
(xv) Airport Mixed Use

A.2 New Zealand Transport Agency

The designation provides for the New Zealand Transport Agency, either itself or through its agents, to control, manage and improve the state highway network, State Highways No 6, 6A and 84 including planning, design, research, construction and maintenance relating to all land within the designation. Such activities may also involve, but not necessarily be limited to, realigning the road, altering its physical configuration, culverts, bridges and associated protection works.

A.3 Limited Access Roads

Those sections of State Highway which are declared limited access are:

i SH No 6 from the junction with SH No 6A to the eastern abutment of the Hayes Creek Bridge.

ii SH No 6 835m south of Kent Street to 300m north of Kent Street, Kingston.

iii SH No 6A from the junction with State Highway 6 to Cecil Street (unformed - 500m east of Suburb Street).

iv SH No 84 from its junction with State Highway No. 6 to its intersection with Ardmore Drive and Brownston Street, Wanaka.

Those sections of State Highway which are proposed limited access are as follows:
v  SH No 6 from Hayes Creek to Swift Burn.

The objective of this control is to protect and maintain the safety and high level of traffic service on these important routes which may otherwise be adversely affected by traffic generation of property alongside. Existing legislation controls conditions relating to access to and from land adjoining Limited Access Roads. The effect is to prevent the proliferation of new access points and to reduce the number of accesses and volumes of traffic using them.

Consent under the provisions of the Transit New Zealand Act 1989 is required for access for subdivision purposes and may be required for other development of land adjacent to Limited Access Roads (LAR). New Zealand Transport Agency should be consulted initially with respect to development along LAR.

A.4 Conditions for Designation # 370 - Roundabout at intersection of State Highway 6 and Eastern Access Road

1. The proposed works will be constructed generally in accordance with Plans 1009-1264-5a dated March 2011 and stamped as approved on 24 November 2014 (Sheets 1 to 4 identified as Figure A1.1).

2. Prior to commencement of works the NZTA shall submit to the Queenstown Lakes District Council for review and approval a Construction Management Plan addressing the following matters:
   o Control of dust;
   o Silt and sediment control;
   o Construction Noise;
   o Traffic management;
   o Hours of Operation; and
   o Protection of the Arrow Irrigation Scheme.

   As part of this plan details shall be provided to:
   o Demonstrate how access will be retained to adjoining properties throughout the construction process, in particular the ability for customers and delivery trucks to access the Manapouri Beech Investments site (Lot 2, DP23542) unobstructed during the peak hours and months of operation, being 8am – 1pm and during the months of September-March;
   o Establish processes to mitigate and address potential adverse effects from dust, noise and other construction activity occurring as a result of the construction process on the existing operations of the Shotover Garden Centre.

   Once approved the Construction Management Plan must be complied with throughout the duration of the works.

3. Prior to the movement of any letter boxes the NZTA shall liaise with the relevant landowner and ensure any new proposed locations are identified in consultation with the landowner and provides compliance with any New Zealand Post requirements.

4. If koiwi (human skeletal remains), waahi taoka (resource of importance), waahi tapu (place or feature of special significance) or artefact material are discovered, then work shall stop to allow a site inspection by the appropriate runanga and their advisors, who would determine whether the discovery is likely to be extensive and whether a thorough site investigation is required. Materials discovered should be handled and removed by tribal elders responsible for the tikanga (custom) appropriate to their removal or preservation. Historic Places Trust and NZ Police should be contacted so that appropriate arrangements can be made.

5. NZTA shall meet the reasonable costs associated with amending the Manapouri Beech Investments /FM Custodians Ltd easement instrument (including survey, legal (including Manapouri Beech Investments and FM Custodians reasonable legal costs) and registration costs) and the construction of the access from SH6 to the Manapouri Beech Investments and FM Custodians Ltd sites (Lots 1 and 2 DP 23542).

6. NZTA shall construct the SH6 roundabout to the standard required to ensure that there will not be any re-work required (other than removal of kerbing) on the roundabout when it comes to build the additional road expected to connect to this roundabout at some future date (shown on Plans 1009-1264-5a dated March 2011 (Sheets 1 to 4). Subject to compliance with all of NZTA’s statutory and other legal obligations in
relation to permitting connection to the State highway, private landowners north of SH6 have the right to connect a fourth leg to the roundabout (subject to NZTA approval of connection design and standard of construction).

7. The proposed landscaping shall be maintained and irrigated for a period of 12 months (the Maintenance of Defects period) after the completion of the landscape works. Any plant material that dies during that time shall be required to be replaced within the same or next planting season, whichever is the sooner.

A.5 Conditions for Designation # 371 - Eastern Access Road and Road 2

- That the Arrow Irrigation water race within the area affected by the designation be protected from the effects of the designation works in a manner that allows its ongoing operation. For the purposes of this condition “protect” includes maintenance of crossing rights equivalent to existing rights and maintenance of water flow capacity.

- The proposed works will be constructed generally in accordance with Plans 1009-1264-5a dated March 2011 (Sheets 1 – 4 [attached at the back of Appendix 1 – Designations]).

- Prior to commencement of works, QLDC shall submit to Council for review and approval a Construction Management Plan addressing the following matters:
  - Control of dust;
  - Silt and sediment control;
  - Construction noise;
  - Traffic management
  - Hours operation; and
  - Protection of the Arrow Irrigation scheme.

As part of this plan details shall be provided to:
- demonstrate how access will be retained to adjoining properties throughout the construction process.

- establish processes to mitigate and address potential adverse effects from dust, noise and other construction activity occurring as a result of the construction process on the existing operations of the Shotover Garden Centre.

Once approved the Construction Management Plan must be complied with throughout the duration of works.

- Prior to the movement of any letter boxes QLDC shall liaise with the relevant landowner and ensure any new proposed locations are identified in consultation with the landowner and provides compliance with any New Zealand Post requirements.

4.1 The final design road levels are to be provided to the owners of Lots 14 and 15 DP 304345, Lot 12 DP 22121 and Lot 4 DP 374540 for approval prior to the lodgement of any consents or engineering approvals or the commencement of works.

4.2 The owners of Lots 14 and 15 DP 304345, Lot 12 DP 22121 and Lot 4 DP 374540 are to respond to the Council within 5 working days of receiving the final design road levels. Consideration of the final design road levels shall be limited to:
1. Minimisation of stormwater overflow
2. Maintenance of practical access gradients

Approval of the final design road levels shall not be unreasonably withheld. In this respect, it shall be unreasonable for the owners of Lots 14 and 15 DP 304345, Lot 12 DP 22121 and Lot 4 DP 374540 to raise design concerns other than those relating to direct effects on their land.

4.3 The final design shall be accompanied by a stormwater management plan for roading within the designation demonstrating how stormwater will be collected and drained from impervious areas and the protection of adjoining land against inundation.

4.4 Notwithstanding any other provisions in this clause, or the advice note, if approval is not forthcoming from any of the owners of Lots 14 and 15 DP 304345, Lot 12 DP 22121 and Lot 4 DP 374540, the
Council shall be entitled to determine the appropriate final design road levels.

**Advice Note:** The parties acknowledge that minimisation of stormwater overflow is an ongoing management issue particularly with respect to the Queenstown Central Limited land which is at a lower level than the Shotover Park Limited land. The parties acknowledge the Council’s intention to prepare a stormwater catchment plan for the Frankton Flats which will among other things address the collection and drainage of water from impervious areas with particular regard to secondary overflow paths in major storm events and to the extent reasonably practicable, the protection of adjoining land against inundation.

- If koiwi (human skeletal remains), waahi taoka (resource of importance), waahi tapu (place or feature of special significance) or artefact material are discovered, then work shall stop to allow a site inspection by the appropriate runanga and their advisors, who would determine whether the discovery is likely to be extensive and whether a thorough site investigation is required. Materials discovered should be handled and removed by tribal elders responsible for the tikanga (custom) appropriate to their removal or preservation. Historic Places Trust and NZ Police should be contacted so that appropriate arrangements can be made.

- QLDC shall construct the EAR/Road 2 roundabout as a four leg roundabout including provision for kerb and channel for the future connection to local roads to the south and west expected to connect to this roundabout, as indicated on Plans 1009-1264-5a dated March 2011 (Sheets 1 to 4).

- QLDC shall, at the same time as constructing the Eastern Access Road construct the intersection (including all kerb and channelling) that will provide the access from the Eastern Access Road to the Future Access Road to Lot 1 DP23542 in the general location identified on the plan referenced on Plans 1009-1264-5a dated March 2011 (Sheets 1 to 4).

A.6 **Conditions for Designation # 84 - Kawarau Falls Bridge (RM120413)**

**General**

1. Except as modified by the conditions below, and subject to final design, the Project shall be undertaken in general accordance with the information provided by the requiring authority as follows:

   a. the notice of requirement dated 20 July 2012 and supporting documents, being:
      i) Assessment of Environmental Effects report, dated 3 April 2012 (and re-submitted on 20 September 2012);
      ii) Geotechnical Assessment SH6 Kawarau Falls Bridge Specimen Design (prepared by Ross Roberts-, SKM, dated August 2012); and
      iii) SH6 Kawarau Falls Bridge – Design Statement in relation to Road Bridges Urban Design Principles (prepared by Vivian + Espie, dated 27 August 2012) and

   b. the notice of requirement dated 12 December 2015, and supporting documents, being:
      i) ‘Land Requirement Plan’ drawing 2701-TW-LRPD-001 revision A
      ii) ‘River Navigation Overall’ drawing 2701-TW-TTRN-001 revision A
      iii) ‘River Navigation Dimensions’ drawing 2701-TW-TTRN-002 revision A
      iv) ‘Trestle Setout Dimensions’ drawing 2701-TW-TTRN-003 revision A

2. As soon as practicable following completion of construction of the Project, the requiring authority shall:
   a. Review the width of the area designated for the Project;
   b. Identify any areas of designated land that are no longer necessary for the ongoing operation, or maintenance of the Project or for
ongoing mitigation measures (provided that the final designation width is no less than 16 metres); and

c. Give notice to the Council in accordance with Section 182 of the RMA for the removal of those parts of the designation identified in 2(b) above.

3. The requiring authority may request amendments to the management plans required by these conditions by submitting the amendments in writing to QLDC for certification by the Chief Executive Officer or their delegate, prior to any changes taking effect.

4. At the completion of the Project, the requiring authority shall ensure that all plant, equipment, chemicals, fencing, signage, debris, rubbish and other material brought on site is removed from the site. The site shall be tidied to a degree at least equivalent to that prior to the Project commencing.

Advice Note: These conditions apply to construction of the Kawarau Falls Bridge, and will be satisfied once construction is complete. These conditions do not apply to operation or maintenance of the Bridge or adjacent sections of State highway.

Notification

5. The requiring authority shall notify the QLDC and all immediately adjoining landowners in writing at least five working days prior to the commencement of the Project, and at the completion of the Project.

Communications Plan

6. 25 working days prior to the commencement of the Project, the requiring authority shall submit a Communication Plan to QLDC for certification by the Chief Executive Officer or their delegate. The Communications Plan shall be based on the draft plan submitted with the notice of requirement application.

7. The requiring authority shall carry out the Project in accordance with the certified Communications Plan.

Construction Environmental Management Plan

8. Twenty-five (25) working days prior to the Project commencing, the requiring authority shall submit a Construction Environmental Management Plan (CEMP) to the QLDC for certification by the Chief Executive Officer or their delegate. The CEMP shall be based on the draft CEMP provided with the NOR, and include the following:

- Accidental Discovery Protocol
- Procedures to ensure that any refuelling of machinery within 50 metres of any ephemeral or permanent watercourse is carried out in such a manner so as to prevent the discharge of contaminants

The following plans, required by conditions 6, 11, 14, and 21 shall form appendices to the CEMP and be held together with it:

- Construction Noise and Vibration Management Plan
- Temporary Traffic Management Plan
- Urban and Landscape Design Master Plan
- Communications Plan.

9. The requiring authority shall carry out the Project in accordance with the certified CEMP.

10. All significant earthworks, pile boring and retaining construction shall be supervised by a suitably qualified geotechnical engineer

Advice Note: The NZTA shall ensure that if the CEMP is changed or updated that the most up to date version is provided to the QLDC. The Erosion Sediment and Dust Control Plan and River Users Management Plan may be held together with the CEMP, but will be certified by the Otago Regional Council.

Construction Noise and Vibration Plan

11. Twenty-five (25) working days prior to commencing the Project, the requiring authority shall submit a Construction Noise and Vibration Management Plan (CNVMP) to the QLDC for certification by the Chief Executive Officer or their delegate. The CNVMP shall:
a. be prepared by a suitably qualified and experienced acoustic consultant;

b. contain methods to ensure that construction noise and vibration generally comply with the requirements of NZS6803:1999 and DIN 4150-3:1999;

c. contain methods which represent the best practicable option; and

d. include requirements for monitoring construction noise and vibration.

12. The requiring authority shall engage a suitably qualified engineer to conduct a detailed pre-construction building condition survey of the existing Kawarau Falls Bridge before construction. This survey shall be repeated within 25 working days of construction being complete. The requiring authority shall provide copies of the survey reports to the QLDC within one week of receipt.

13. The requiring authority shall carry out the Project in accordance with the certified CNVMP.

Temporary Traffic Management Plan

14. Twenty-five (25) working days prior to commencing the Project, the requiring authority shall submit a temporary traffic management plan (TTMP) to the QLDC for certification by the Chief Executive Officer or their delegate. The TTMP shall include:

a. Details of traffic management systems for vehicles entering and exiting the site;

b. Suitable site warning signage to be in place on the road in both directions from the site entrance;

c. Frequency and number of construction traffic movements estimated to and from the site;

d. Truck loading/unloading areas and procedures;

e. Road remediation once works are complete;

f. Management of pedestrian and cycling routes during construction.

15. The requiring authority shall carry out the Project in accordance with the certified TTMP.

Dust

16. The requiring authority shall control the discharge of dust created by earthworks, transportation and construction activities in order to minimise dust hazard or nuisance.

Control of Hazardous Substances

17. The Requiring Authority shall ensure that:

a. all hazardous substance storage or re-fuelling areas are bunded or contained in such a manner so as to prevent the discharge of contaminants;

b. all machinery is regularly maintained in such a manner so as to minimise the potential for leakage of contaminants;

c. no machinery is cleaned or stored within 50 metres of any ephemeral or permanent watercourse; and all contaminants (e.g. fuel, hydraulic oils, lubricants etc) are removed at the end of the construction period.

Utilities on the bridge

18. The requiring authority shall ensure that the bridge design accommodates the following utilities:

- Telecommunications
- Electricity
- Water mains
- Intelligent Transport systems utilities

19. The utilities listed in Condition 18 are to be incorporated into the bridge design in such a way as they are, to the greatest extent practicable, not visible, including from the river and the pedestrian/cycle structure proposed under the bridge.

20. Where works completed in relation to or in association with this project result in changes being made to the existing Council services, or the...
addition of new services, the requiring authority shall submit to the QLDC GIS department new ‘as-built’ plans. This information shall be formatted in accordance with Council’s ‘as-built’ standards and shall include all Roads, Water, Wastewater and Stormwater reticulation.

Urban and Landscape Design Master Plan

21. The requiring authority shall submit, prior to lodgement of the Outline Plan of Works, an Urban and Landscape Design Master Plan (ULDMP) to the QLDC for certification by the Chief Executive Officer or their delegate. The ULDMP shall be prepared by a suitably qualified person or persons and shall take into account the following documents or updated versions of same:
   a. NZTA's “Urban Design Policy” (2007)
   b. NZTA's “Urban Design Principles: Road Bridges” (2009)
   c. QLDC’s “Urban Design Strategy” (2009)

22. The ULDMP shall be consistent with the Landscape Concept Plan as outlined in NOR drawings ZB01194-ECC-DG-0015 (dated 14/02/13) and ZB01194-ECC-DG-0016 (dated 14/02/13, but with the “Recommended Extension” added, which is shown as a solid red line in Appendix 3 to the Commissioners' Recommendation) prepared for NZTA by Sinclair Knight Merz Ltd, and include the following:
   a. Comments obtained from the QLDC Urban Design Panel on a draft ULDMP, together with a statement as to how these have been responded to in the UDLMP submitted for certification;
   b. Retention or propagation for replanting of existing native plants where possible;
   c. Retention of poisoned willow roots/stumps below the bank works where possible;
   d. In replanting areas outside of the earthworks areas mature willows shall be retained to provide a nursery for newly planted vegetation. These willows shall be poisoned when vegetation is established and the bank is stable, but dead stumps may remain;
   e. Details of maintenance of the newly planted areas, such maintenance to be for a period of 2 years after completion of planting;
   f. Selection of plant varieties for newly planted areas consistent with the Department of Conservation’s “Wakatipu Project Gold” objectives and specifications;
   g. A detailed planting plan identifying the location, density, grade, botanical names, and quantity of all planting;

Pedestrian and cycle tracks

h. The final design and location of pedestrian and cycle tracks shall include step connections indicated on the Landscape Concept Plan as “link via steps” and otherwise meet the intent of the Landscape Concept Plan, including:
   • Earthworks, showing areas of cut and fill, depths of cut and fill and cut batters;
   • Any subsoil drainage system;
   • Ease and convenience of use;
   • Providing a complementary amenity experience to what is provided on nearby sections of track;
   • Adherence, to the extent that is practical, to the following design criteria:
     - The provision of pathways that meet district wide design standards of minimum width (2.5m) and maximum gradient (10%); and
     - Pedestrian and cycling routes that provide direct and safe routes.
   i. The requiring authority shall make reasonable efforts to consult with Queenstown Trails Trust and the QLDC regarding conformity with the Trust’s and the QLDC's pedestrian and cycle track standards, and consult with the Otago Regional Council on provision for pedestrians and cyclists both on and in the vicinity of the new road or tracks.
bridge, and if this offer is accepted, describe the consultation which occurred, and its outcomes in the ULDMP submitted for certification;

Heritage Matters

j. A detailed landscape design of the area where the new and existing bridges converge on the true left bank of the River. This design shall be prepared in consultation with a heritage consultant approved by the NZHPT, and shall ensure that the connection between the existing bridge and the north bank remains visible;

k. A detailed design of the pedestrian and cycle structure below the existing bridge and the new bridge. The design of this structure shall be prepared in consultation with a heritage consultant approved by the NZHPT and shall ensure a minimum of impact on the fabric of the existing bridge. Any alteration to the fabric of the bridge is to be undertaken in accordance with recognised heritage principles such as the ICOMOS New Zealand Charter;

l. Removal of modern traffic facilities from the existing bridge where possible;

m. Prior to removal of the designation from the existing bridge, the requiring authority is to make such modifications as are necessary to enable the carriageway to be used as a pedestrian and cycle track (suitable for use by both recreational and commuting cyclists). Where this involves modifications to the fabric of the bridge, such work is to be undertaken in accordance with recognised heritage principles such as the ICOMOS New Zealand Charter.

n. Provision of information panels on the history of the existing bridge and Kawarau Falls area;

o. Carparking for visitors to the existing bridge, where possible;

Bridge Design

p. Bridge safety barriers which allow views out to the river, river margins and the existing bridge for State highway users, while balancing safety considerations;

q. Final bridge design (including embankments and retaining walls) using external materials, finishes and colours that assist it to accord with both the natural setting and its relationship with the existing bridge, including giving effect to Condition 19;

r. Final bridge design which, to the extent practicable, gives effect to Goals 1, 2 and 4 of the Queenstown Lakes District Council Urban Design Strategy;

s. Details of lighting to be installed on the bridge and its approaches, if any. Any proposed lighting –
   • should be an integral design component of the bridge;
   • shall minimise light spill onto the river, onto adjacent land and into the night sky; and
   • must comply with the Queenstown Southern Lights Strategy.

Emergency access

t. Details of how, at the completion of construction, the requiring authority shall ensure that emergency access for vehicles onto the historic bridge is to be made possible.

23. The requiring authority shall carry out the Project in general accordance with ULDMP. The ULDMP shall be fully implemented within 12 months of the opening of the new State highway bridge.

Archaeology

24. During construction, the requiring authority shall:

   a. Identify the extent of the stacked stone wall to the east of the Northern abutment of the existing bridge before earthworks begin.
   b. Clear vegetation in the location of proposed earthworks in a way that minimises damage to ground.
   c. Ensure earthworks areas are examined and recorded by an archaeologist prior to earthworks commencing (with recordings submitted to the NZHPT and NZAA).

Advice Note: If any archaeological sites are to be affected by earthworks an Authority from the NZHPT will be required.

Lapse date
25. The designation shall lapse if not given effect to within 10 years from the date on which it is included in the District Plan under Section 175 of the RMA.

A.7 Conditions for Designation # 84 – SH 6 Boyd Road Realignment (RM090645)

Access
1. Access to the properties affected by the realignment will be designed in consultation with the relevant property owners.

Landscape
2. A landscape plan shall be submitted for assessment at the time of outline plan approval which achieves the following objectives:
   - Maintains consistency with the open, rural, and pastoral character of the valley, including access of stock as part of the maintenance regime.
   - Identifies reinstatement (re-grassing/re-vegetating) of exposed cut/fill batters.
   - Identifies treatment (width and surface material) of roads no longer forming part of the State Highway.
   - Identifies existing trees to be retained or relocated.

   Addresses the following submitter concerns (concerns from neighbouring properties, including the following):
   - I. Provision of bunding, in the vicinity of the Rees Stone Cottage.
   - II. Planting around the entrance to Boyd Road.
   - III. Landscaping and screen planting designed to reduce visibility down the local road leading to Boyd Road when travelling North.

3. The landscape plan detailed under Condition (2) will be developed in consultation with the owners of the Remarkables Ski Field access road, the owners of the Rees Stone Cottage, the owner of 59B Boyd Road, and Council’s Landscape Architect.

Advice Note
Although the alteration to the designation is sought to re-align the State Highway, at this time the only change is to increase the area covered by the designation to include the new stretches of road. It is understood that at a later date NZTA will make application to withdraw unnecessary portions relating to the road to be decommissioned. The reason for this is the need to construct the new carriageway, whilst still using the old.

A.8 Conditions for Designation # 84 – SH 6 Peninsula Road intersection (RM081075)

1. The proposed works will be constructed generally in accordance with the plans submitted with RM081075 with the exception of the amendments required by the following conditions of consent.

2. NZTA shall implement the Landscape Plan dated June 2009 and stamped as approved on 3 July 2009.

3. If koiwi (human skeletal remains), waahi taoka (resource or object of importance), waahi tapu (place or feature of special significance) or other artefact materials are discovered, work shall stop, allowing for a site inspection by the appropriate Runaka and their advisors. These people will determine if the discovery is likely to be extensive and whether a thorough site investigation will be required. Materials discovered should be handled and removed by takata whenua who possess knowledge of tikanga (protocol) appropriate to their removal or preservation.

A.9 Conditions for Designation # 84 – SH 6 Grant Road Roundabout (RM110290)

1. Prior to any works being undertaken, a construction management plan will be submitted by the contractor to the Queenstown Lakes District Council that addresses the management of the noise, dust, erosion and...
sediment generated from the earthworks, in keeping with the landscaping requirements for a 50 metre landscape strip as per Frankton Flats Special zone requirements.

2. Landscape and visual effects are to be managed and mitigated in accordance with a Landscape and Amenity Plan incorporating Transit New Zealand Guidelines for Highway Landscaping (2002).

3. In the event that any archaeological sites or remains are discovered during the earthworks, then works at that place of discovery will cease immediately. The New Zealand Historic Places Trust, kaumatua representing the local Tangata Whenua, the Queenstown Lakes District Council, and the New Zealand Police as appropriate, shall be contacted. Work shall only recommence in the affected area when any necessary statutory authorisations or consents have been obtained.

Advice Note

As part of the outline plan approval for the detail design of the Grants Road roundabout details of proposed landscaping, pedestrian movement and lighting (all lighting shall be developed in accordance with QLDC night lighting strategy) shall be developed in consultation with the Queenstown Lakes District Council.

A.10 Conditions for Designation # 84 – SH 6 Makarora Road Sign (RM150169)

1. The proposed works will be constructed generally in accordance with the plans titled ‘SH 6 region 13 RS 828 variable Message Sign, Haast Pass-Makarora Road- Land Designation Plan’ by OPUS and stamped as approved on 15 April 2015.

2. The poles that support the sign shall be a dark grey colour of low light reflectance value (less than 15%) to ensure the sign structure is recessive within the broader landscape.

A.11 Conditions for Designation # 84 – SH 6 Nevis Bluff (RM040909 and RM090555)

1. The proposed stabilisation works will involve the removal of any unstable rock features from the bluff face that potentially threaten the safe and efficient operation of State Highway 6 below.

Rock removal

2. Rock will be removed from the Nevis Bluff through various techniques including:
   - Scaling and trimming of smaller loose rocks from the rock face;
   - Blasting of rock from the face by placing explosives into predrilled cavities;
   - Sluicing of the rock face following blasting to wash off any loose material. This is usually achieved by releasing water from a monsoon bucket suspended beneath a helicopter.

Stabilisation works

3. Stabilisation works also involve methods to retain rock on the face of the bluff, these include:
   - Drilling of drain holes and general drainage works to reduce the amount of water on the face and to lower groundwater levels;
   - Application of Shotcrete in conjunction with mesh reinforcement, bolts and plates. This will assist in preserving rock structure.
   - Attaching bolts and anchors to hold rock in place.
   - Draping of mesh and cable nets to prevent small rock falls bouncing out on to the State Highway.
   - Benching of the slope in order to catch and retain small rockfalls. Benching will require an application to be made for an outline plan approval;
   - Construct of fences and walls to retain smaller rock falls. Future structures will require an application to be made for an outline plan approval.
Helicopters

4. Work on the Nevis Bluff is likely to require helicopter assistance. Helicopters are to be used for inspections of the bluff, the placement of explosives, sluicing and to provide necessary access. Helicopter operational hours have been proposed on an intermittent basis between the hours of 7:00am and 6:00pm.

Vehicle access

5. Vehicle access is provided to the top of the bluff via an existing track.

Cleanfill

6. The proposed use of part of the site is to provide access to the Nevis Bluff and as a future deposition area for cleanfill. When it is intended to use the site for cleanfill purposes an Outline Plan will be submitted for approval. At this time conditions may be recommended in relation to the cleanfill.

B Recreation Reserves

1. Setback from Road
   All structures and buildings shall be setback from the road boundary as follows:
   Residential Zones: 5m
   Rural Zones: 20m

2. Separation from Neighbours
   All structures and buildings shall be setback from internal boundaries as follows:
   Residential Zones: 5m, except for buildings necessary for the storage of equipment used for the maintenance of reserves which may be sited as a residential accessory building.
   Rural Zones: 10m

3. Height
   No structure or building shall exceed the following maximum heights:
   Residential Zones: 8m
   Rural Zones: 10m
   Queenstown Town Centre Zone 8m

4. Recession Lines
   Within Residential Zones or on boundaries adjoining a residential zone, buildings shall not project beyond a building envelope constructed by a recession line inclined towards the site at an angle of 25 degrees and commencing at 2.5m above ground level at any given point along each internal boundary.

5. Site Coverage
   A single building shall not exceed 100m² in total floor area. The combined total of all buildings on site shall not exceed a maximum of 5% of the total site area. These standards are exclusive of play equipment.

6. Access and Parking
   Shall be provided in accordance with the general Transport Rules.

7. Surfacing
   No more than 30% of the site area in Residential Zones and 20% of the site area in Rural Zones shall be covered by impervious surfaces, including courts, footpaths, swimming pools, car-parking areas and/or areas under lease arrangements.

8. Glare
   All exterior lighting shall be directed away from adjacent properties and roads.

   No activity shall result in greater than a 2.5 lux spill, horizontal and vertical, of light on to any adjoining property in Residential or Rural-Residential Zone, measured 2 metres inside the boundary of the adjoining property.

9. Noise
   Activities, other than outdoor recreation, shall be conducted such that the following noise levels are not exceeded at the boundary of the site:
   Residential Zones: • during day time 40 dBA L10
**DESIGNATIONS**

- during night time 30 dBA L10
- during day time 55 dBA L10
- during night time 40 dBA L10

**Rural Zones:**

- during night time 30 dBA L10

**10 Hours of Operation**

Where a site adjoins or faces a residential area no activities shall be conducted from the site between the hours of midnight and 7am.

**C Conditions for Specific Designations**

**C.1 Designation # 1 - Frankton Substation**

(a) That future buildings and alterations to existing buildings be constructed in accordance with the following:

i. Maximum height 10 metres other than the items listed in (b).

ii. Minimum setback from the road 10 metres.

iii. Minimum setback from internal boundaries 4 metres other than replacement or alteration of existing buildings.

(b) That the maximum height of any gantry structures, telecommunication masts or transmission poles shall not exceed 20 metres, or up to 26 metres for transmission towers, and the maximum diameter of any dishes or radomes shall not exceed 1.8 metres.

(c) That landscaping be provided along the state highway frontage to effectively screen the site from the highway.

**C.4 Designation # 372 - Police Purposes**

1. Prior to the construction of, or external alterations to, the police station, the requiring authority responsible for the designation shall submit outline plans as required by section 176A of the Resource Management Act 1991, to the territorial authority for consideration.

2. The maximum building footprint coverage shall be 40%.

3. The maximum height for buildings shall be 7.3 metres.

4. The minimum setback distance from road boundaries of any building (except fences and security gates) shall be 2m.

5. The minimum setback from internal boundaries for above ground structures, except fences and security gates shall be one setback of 4.5m and all other setbacks of 2m.

6. Glare
   
   (a) All fixed exterior lighting shall be directed away from the adjacent sites and roads; and
   
   (b) No fixed exterior lighting shall result in greater than a 10.0 lux spill (horizontal and vertical) of light onto any other site measured at any point inside the boundary of the other site.

7. Signage shall be limited to one 4.5m² sign along the road frontage and the Police crest on the exterior wall to the entrance vestibule.

8. Security gates and fencing between the north of the building and the boundary shall be a maximum of 2.2 metres high. Fencing for the remainder of the site shall be limited to a height of 1.8 metres and be visually permeable.

9. Noise
   
   (a) Sound shall be measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 and shall not exceed the following noise limits at any point within any other site in this zone:

   (i) daytime (0800 to 2000 hrs) 50 dB LAeq(15 min)

   (ii) night-time (2000 to 0800 hrs) 40 dB LAeq(15 min)

   (iii) night-time (2000 to 0800 hrs) 70 dB LAFmax

   (b) The noise limits in (a) shall not apply to construction sound which shall be assessed in accordance and comply with NZS 6803:1999.

10. All engineering works shall be carried out in accordance with the Queenstown Lakes District Council’s current (as at the date of submitting the outline plan of works) policies and engineering standards.
11. Prior to the commencement of works on site the requiring authority shall provide to the Queenstown Lakes District Council for review copies of specifications, calculations and design plans as is considered by Council to be both necessary and adequate to detail the engineering works required for the building and the formation of a sealed vehicle crossing.

12. That the earthworks, temporary works, retaining walls and batter slopes for the construction of the police station shall be undertaken in accordance with the Tonkin and Taylor geotechnical report prepared for the site (ref: 891941.1 of November 2011).

13. Landscaping shall be undertaken in accordance with a landscape plan submitted with the Outline Plan of Works.

14. That the Police Station shall not be used for remand purposes other than temporary holding.

C.5  Designation # 10 - Proposed Frankton Primary School

1. That buildings be constructed in accordance with the following;
   i Minimum setback from roads shall be 4.5m
   ii Minimum setbacks from internal boundaries shall be 2m
   iii The maximum height shall be 10m - provided that:
      a) no part of any buildings shall protrude through a recession plane inclined towards the site at an angle of 25 degrees and commencing 4.5m above the ground at any given point on the site boundary.
      b) The exceptions to (a) - the recession plane condition - are Gable, hip dormer and other similar projections which may encroach beyond the recession plane provided they are within a calculated area no greater than 6m² with the apex no higher than a point 1m below the maximum height for the school site and the base of the area(s) at the level of the recession plane protrusion.

C.6  Designation # 11 - Glenorchy Primary School

1. That future buildings be constructed in accordance with the following;
   i Maximum height - 5.5 metres
   ii A minimum pitched roof of 15 degrees.

C.7  Designation # 13 - Mount Aspiring College

1. That future buildings and alterations to existing buildings be constructed in accordance with the following;
   i Minimum setback from roads shall be 4.5 metres.
   ii Minimum setback from the southern boundary adjacent to Scaife Place residential properties shall be 4.5 metres.
   iii Minimum setbacks from all other internal boundaries shall be 2 metres.
   iv The maximum height shall be 10 metres - provided that no part of any building shall protrude through a recession plane inclined towards the site at an angle of 25 degrees and commencing at 2.5 metres above ground level at any point on the site boundary interfacing with a Residential Zone, and 4.5 metres above ground level at any other point on the site boundary.

   Exceptions to the recession plane include: Gable, hip dormer and other similar projections may encroach beyond the recession plane provided they are contained within a calculated area no greater than 6m² with the apex no higher than 1 metre below the maximum height for the school site and the base of the area(s) at the level of the recession plane protrusion.
C.8  **Designation # 14 - Queenstown Primary School**

1. Where the adjoining site is zoned for residential purposes, future buildings and alterations to existing buildings shall be constructed in accordance with the following:
   
   i. Minimum setback from internal boundaries 2m

C.9  **Designation # 15 - Wakatipu High School**

1. Where the adjoining site is zoned for residential purposes, future buildings and alterations to existing buildings shall be constructed in accordance with the following:
   
   i. Minimum setback from internal boundaries 2 metres.

C.10  **Designation # 16 - Wanaka Primary School**

1. That future buildings and alterations to existing buildings be constructed in accordance with the following:
   
   i. Minimum setback from roads shall be 4.5 metres.
   
   ii. The setback from the internal south east facing boundary shall be 4.5 metres.
   
   iii. Minimum setbacks from all other internal boundaries shall be 2 metres.
   
   iv. The maximum height shall be 8 metres.

C.12  **Designation # 18 - Arrowtown Exchange**

1. That future buildings and alterations to existing buildings be constructed in accordance with the following:
   
   i. Maximum height 5 m

   ii. Minimum setback from roads 6 m

   iii. Minimum setback from internal boundaries 3 m

2. That no mast shall be greater than 9 metres in height and no antenna greater than 1.2 metres in diameter or 3 metres in length.

3. In accordance with section 176A(2)(a) of the Resource Management Act an outline plan need not be submitted if the proposed project or work is a permitted activity under the District Plan Rules (including, but not limited to the relevant rules in Part 17 - Utilities Rules). Where a proposed project or work is not provided for as a permitted activity in terms of this Plan, an Outline Plan shall be submitted in accordance with section 176A.

C.13  **Designation # 19 - Glenorchy Microwave Station**

1. That future buildings and alterations to existing buildings be constructed in accordance with the following:
   
   i. Maximum height 10 m

   ii. Minimum setback from road 10 m

   iii. Minimum setback from internal boundaries 15 m

2. That no mast shall be greater than 20 metres and no antenna greater than 2.4 metres in diameter or 4 metres in length.

3. In accordance with section 176A(2)(a) of the Resource Management Act an outline plan need not be submitted if the proposed project or work is a permitted activity under the District Plan Rules (including, but not limited to the relevant rules in Part 17 - Utilities Rules). Where a proposed project or work is not provided for as a permitted activity in terms of this Plan, an Outline Plan shall be submitted in accordance with section 176A.
DESIGNATIONS

C.14  Designation # 20 - Queenstown Telephone Exchange

1. That buildings not exceed a height of 12 metres.
2. That no new mast shall be greater than 17 metres in height and no antenna greater than 2.4 metres in diameter or 4 metres in length.
3. In accordance with section 176A(2)(a) of the Resource Management Act an outline plan need not be submitted if the proposed project or work is a permitted activity under the District Plan Rules (including, but not limited to the relevant rules in Part 17 - Utilities Rules). Where a proposed project or work is not provided for as a permitted activity in terms of this Plan, an Outline Plan shall be submitted in accordance with section 176A.

C.15  Designation # 21 - Wanaka Exchange

1. That buildings not exceed a height of 10 metres.
2. That no new mast shall be greater than 15 metres in height and no antenna greater than 2.4 metres in diameter or 4 metres in length.
3. In accordance with section 176A(2)(a) of the Resource Management Act an outline plan need not be submitted if the proposed project or work is a permitted activity under the District Plan Rules (including, but not limited to the relevant rules in Part 17 - Utilities Rules). Where a proposed project or work is not provided for as a permitted activity in terms of this Plan, an Outline Plan shall be submitted in accordance with section 176A.

C.16  Designation # 23 - Fernhill Water Supply Pump and Intake

1. No activity or disturbance of the lake bed may be undertaken within that part of the designated area applying to Lake Wakatipu, other than the use of the surface of the lake for recreation activities, without the consent of the Queenstown Lakes District Council. The purpose of this restriction is to ensure no damage occurs to the water intake pipe which is located on the bed of the lake, extending approximately 25 metres from the lake edge.
2. That the pump station operate so the following noise levels are not exceeded, except for emergency purposes at or within the notional boundary of residential units:
   * 0800 - 2000 hrs  50 dBA L10
   * 2000 - 0800 hrs  40 dBA L10

C.17  Designation # 24 - Sunshine Bay Sewage Pump Station

That the pump station operate so the following noise levels are not exceeded, except for emergency purposes, at or within the national boundary of residential units:
   * 0800 - 2000 hrs  50 dBA L10
   * 2000 - 0800 hrs  40 dBA L10

C.18  Designation # 25 – Marine Parade Sewage Pump Station

That the pump station operate so the following noise levels are not exceeded, except for emergency purposes, at or within the boundary of any site used for residential or visitor accommodation purposes:
   * 0800 - 2000 hrs  60 dBA L10
   * 2000 - 0800 hrs  50 dBA L10

C.19  Designation # 26 - Kelvin Peninsula Sewage Pump Station

That the pump station operate so the following noise levels are not exceeded, except for emergency purposes, at or within the notional boundary of residential units:
**C.20 Designation # 27 - Bay View Sewage Pump Station**

That the pump station operate so the following noise levels are not exceeded, except for emergency purposes, at or within the notional boundary of residential units:

* 0800 - 2000 hrs  50 dBA L10
* 2000 - 0800 hrs  40 dBA L10

---

**C.21 Designation # 28 - Water Reservoir and Pump Station**

That the pump station operate so the following noise levels are not exceeded, except for emergency purposes, at or within the notional boundary of any site used for residential purposes:

* 0800 - 2000 hrs  50 dBA L10
* 2000 - 0800 hrs  40 dBA L10

---

**C.22 Designation # 29 - QLDC Events Centre and Aquatic Centre**

**A. Conditions for the Events Centre**

For conditions see page A1/37 also refer to file no 950236

It is decided that the notice of requirement seeking to designate Lot 11 DP 22121, Sections 49, 50, 51, 52, 61, 62 and 149, and Part Sections 53, 59, 60 and 63 Block I Shotover Survey District to enable the establishment of a multi-purpose indoor and outdoor recreation, cultural and conference complex be confirmed, but that pursuant to Section 168/A(3) (c) of the Resource Management Act 1991, such designation be subject to the following conditions:

1. That prior to commencing the construction of any public work on the site the subject of the designation, the Queenstown Lakes District Council shall apply to Transit New Zealand for its consent to such works as shall be necessary to upgrade the intersection of State Highway 6 and the unformed and unnamed legal road immediately to the west of the site the subject of the designation.

2. That the cost of carrying out any and all such works as shall be required on the State Highway as a consequence of upgrading the intersection of State Highway 6 and the unformed and unnamed legal road immediately to the west of the site the subject of the designation shall be met by the Queenstown Lakes District Council.

3. Such work as shall be necessary consequent on the upgrading of the intersection between State Highway 6 and the unformed and unnamed legal road immediately to the west of the site the subject of the designation, shall be carried out and competed prior to the opening and use by the public of the multi-purpose indoor and outdoor recreation, cultural and conference complex to be erected on the site the subject of the designation.

4. There shall be no access to, nor egress from the site the subject of the designation to Grant Road, nor to the legal road intersecting with Grant Road, and lying to the south east of the site the subject of the designation.

5. The public works to be undertaken pursuant to the designation shall be undertaken substantially in accordance with the following plans:

(i) Plan 3105/30 prepared by Boffa Miskell Limited, and described as “Main Entry - Sketch”

(iii) Plan 3105/10, prepared by Boffa Miskell Limited, and dated 14th June 1995, and being a planting plan

(iv) Plan 3105/11, prepared by Boffa Miskell Limited, and dated 14th June 1995, and being a planting plan.
(v) Plan WD2.01, Revision P3, dated January 1995, but marked with a date stamp the 8th September 1995, prepared by Powell Dods & Thorpe, and being a ground floor plan.

(vi) Plan WD2.02, Revision P3, dated January 1995, but marked with a date stamp the 8th September 1995, prepared by Powell Dods & Thorpe, and being a mezzanine floor plan.

(vii) Plan WD2.04, Revision P3, dated February 1995, but marked with a date stamp the 8th September 1995, prepared by Powell Dods & Thorpe, and being elevations.

(viii) Plan WD2.05, Revision P3, dated February 1995, but marked with a date stamp the 8th September 1995, prepared by Powell Dods & Thorpe and being a plan headed “Sections - Queenstown Lakes Events Centre”.

(ix) Queenstown Event Centre Rugby, drawn by Thorn and the proposal submitted under reference RM070510. For the avoidance of doubt this condition refers to the floodlighting only.

(x) A maximum area no greater than 250 square metres, being one of the rooms shown on plans 1 and 2 submitted under reference RM081369. For the avoidance of doubt this condition refers to the ancillary child care centre only.

In the case of each of them, Plans 3105/7, 3105/10, WD2.01 and WD2.04, the works shall also be carried out in accordance with the hand-written narration detailed on the copies of the plans produced at the hearing. The plans produced at the hearing shall be held by the Queenstown Lakes District Council.

In addition to the works shown on the plans that part of the site to the east of the main oval (shown as “Oval 1” on Plan 3105/7) may be developed and used for playing fields. It may also be used from time to time for carparking, but it shall not be laid out or developed as permanent carpark.

6. The exterior colours of the buildings comprising part of the public work permitted by the designation shall be in the natural range of browns, greens and greys and shall have a reflectivity of less than or equal to 36%. The colour scheme shall be chosen to ensure that the building appears recessive in its context and visually connected with the Aqualand building to its north.

7. Landscaping shall be carried out to the satisfaction of the Queenstown Lakes District Council’s landscape architect, and in accordance with Plans 3105/7, 3105/11 referred to in Condition 5 hereof.

Not less than 60 trees between the point marked “B - 60 trees 3 metres +” and the point marked “B”, and shown by the broken line intersecting the State Highway on Plan 3105/7, shall be trees of not less than 3 metres in height as at the time of planting.

Not less than 50% of the trees between the eastern boundary of the site adjoining the State Highway - marked with a solid blue biro line on the copy of Plan 3105/7 produced at the hearing, and the heavy dark blue biro line beside the works “to existing playing fields” on the same plan, shall comprise evergreen species.

Landscaping shall be carried out as soon as shall be reasonably practicable, and in any event shall be completed no later than one year from the date that the public work shall be opened and made available for the use of the public.

8. The public work to be constructed on the site shall be constructed, maintained and managed, so that the following noise emission levels are not exceeded at or within the 20 metre notional boundary of any rural/residential dwelling:

Monday to Sunday 7am to 11pm. 55dBA L10;
At all other times 45dBA L10;

At night time Lmax limit of 75dBA shall be complied with between 11pm. and 7am. On all days of the week.
Except that:
On not more than 6 days during any calendar year, noise emission levels from a major outdoor event may exceed the limits detailed above, but only between the hours of 7am. and 11pm. And provided that such noise emission levels shall not during such period exceed a noise emission level of 65 dBA Leq (15 minutes) at or within the 20 metre notional boundary of any rural/residential dwelling.

The term “major outdoor event” shall mean any outdoor sporting or cultural event held on the site, attracting or which might reasonably be expected to attract more than 2000 persons.

At least 30 days before each major outdoor event, notice shall be given in such major daily newspaper and in such local newspaper as shall circulate in the locality, advising of the forthcoming major outdoor event, the times of operation, and the nature of the event.

Noise emission levels shall be measured in accordance with NZS6801:1991, and assessed in accordance with NZS6802:1991.

9. The hours of operation of the multi-purpose indoor/outdoor recreation, cultural and conference complex shall not be restricted, subject however to Condition 11 hereof.

10. Retailing within the multi-purpose complex shall be confined to the areas marked “lettable area”, “vending machines”, “reception” and “kiosk”, on Plan WD2.01, and to the areas marked “servery”, “kiosk” and “bar”, on Plans WD2.01, and WD2.02.

11. The hours of operation for the bar facilities associated with the complex shall be such as shall be fixed pursuant to the provisions of the Sale of Liquor Act 1989, but in any event shall not exceed 7.00am to 2.30am daily. A special licence shall be required for the sale of liquor at major outdoor events (as defined in Condition 8 thereof).

12. The use of that part of the site lying to the east of the main oval, (Oval 1* on Plan 3105/7), shall be restricted to sports playing fields and to temporary carparking.

13. There shall be no buildings, structures, facilities or landscaping constructed, erected or permitted to grow, in any position which penetrates the airport approach and side slope protection planes, which slope and protection planes are shown in the Plan attached to this report as Annexure “B”.

14. That prior to commencing the construction of any public work on the site the subject of the designation, the Queenstown Lakes District Council shall obtain and register a right-of-way easement in its favour, permitting pedestrian and cycle access from Kawarau Road (State Highway 6) to the site the subject of the designation. The pedestrian/cycle accessway shall be not less than 2.4 metres in width. The accessway shall be sealed and lit.

The Queenstown Lakes District Council shall obtain the agreement of Transit New Zealand to the formation of a pedestrian/cycle accessway in the road reserve on the eastern side of Kawarau Road (S.H.6) from a point opposite the lay-by on the western side of Kawarau Road extending to the intersection of S.H.6 and the road giving access to Queenstown Airport. There shall also be a formed pedestrian/cycle accessway extending south on Douglas Street as shown on the plan produced by Transit New Zealand and annexed as Annexure “B” to this recommendation.

The route formation and lighting of the pedestrian and cycle accessway over the land being used as at the date of this recommendation as a golf course shall be such route as shall be agreed between the Queenstown Lakes District Council, Queenstown Airport Corporation Limited and Queenstown Golf Club Incorporated as the lessee of that land.

Such work as shall be necessary to create the pedestrian and cycle accessway both on the land used as at the date of this recommendation as a golf course and within the road reserve, shall be carried out and completed prior to the opening and use by the public of the multi purpose indoor and outdoor recreation, cultural and conference complex to be erected on the site the subject of the designation.
15 Floodlights are only to be used between 5 pm and 10 pm from March till October.

16 The childcare facility shall be restricted to use by children whose parents or guardians are at the time of requiring the childcare, using the Events Centre / Aquatic Centre for its designated purpose.

17 The childcare facility shall not operate outside the hours of 7 am and 6 pm.

18 The room containing the childcare facility shall be acoustically treated to achieve indoor sound levels of Ldn 40dBA.

19 In terms of the establishment of temporary buildings and structures within the designation, the following restrictions shall apply:
   a) Temporary buildings and structures are defined as marquees, tents, shelters, stands, filming facilities, offices, scaffolding, safety fences and other similar buildings and structures.
   b) The use of any temporary building or structure shall be limited to providing for recreation, cultural and conference activities within the Queenstown Events Centre.
   c) The maximum time that temporary buildings and structures can be established within the Queenstown Events Centre is 21 days at any one time, including the time required for establishment/construction and dismantling of such buildings and structures.
   d) Aside from the provision of safety fences, no other temporary buildings and structures shall be established within 50 metres of the legal boundary of the Queenstown Events Centre that adjoins State Highway 6.
   e) The maximum gross floor area of any temporary buildings and structures established within the Queenstown Events Centre shall be 2400m² (per building or structure).

20. In terms of the establishment of temporary advertising banners within the designation, the following restrictions shall apply:
   a. The banners shall only advertise recreation, cultural and conference activities that are to be undertaken within the Queenstown Events Centre.
   b. The banners shall only be located on the 28 existing light poles along Joe O'Connell Drive and within the Events Centre parking area, as shown numbered 1 – 28 on the plan titled “Location of Light Poles with Banner Arms (L100 – 27/7/11)” approved under RM110502.
   c. The maximum time that one set of specific advertising banners can be placed on the lighting poles is 30 days within any 12 month period.

B. Conditions for the Aquatic Centre

That the Notice of Requirement to enable the establishment of an Aquatic Centre on the land within Designation 29 is confirmed and that pursuant to section 168A(4)(c) of the Resource Management Act 1991, Designation 29 is subject to the following further conditions:

f) The maximum height of any temporary building or structure established within the Queenstown Events Centre shall be 10m.

g) No temporary building or structure shall be placed in a position such that it penetrates the take-off climb and approach or transitional protection surfaces for the cross-wind runway at Queenstown Airport unless prior written consent of Queenstown Airport Corporation is obtained.

h) If permission is required under the Building Act 2004 for any temporary building or structure, then such permission shall be obtained.

The establishment and use of temporary buildings and structures shall also be subject to all other relevant conditions of the designation.

2. That the landscaping work proposed shall be carried out to the satisfaction of the Council’s landscape architect, and in general accordance with the Landscape Concept Plan prepared by Isthmus Group dated 4 July 2005 and stamped approved on 16 November 2005 as soon as practical and/or no later than 6 months after final building inspection.

3. The consent holder shall undertake the excavation, temporary works, retaining walls and batter slopes in accordance with the report prepared by Tonkin and Taylor report number 890845.

4. The site shall be categorised as intermediate in relation to NZS4203, C1 4.6.2.2 seismic provisions.

5. Prior to the commencement of works on site:
   a) The consent holder shall provide Council with the name of a suitably qualified and experienced Engineer who is to supervise the excavation procedure. This engineer shall continually assess the condition of the excavation and implement any design changes / additions if and when necessary.

6. The consent holder shall submit to the Council an as built of the fill. This plan shall be in terms of New Zealand Map grid and shall show the contours indicating the depth of the fill. Any fill that has not been certified by a suitably qualified and experienced engineer in accordance with NZS 4431 shall be recorded on the as built plan as “uncertified fill”.

7. A producer statement/design certificate shall be produced for all permanent retaining walls on the site.

8. For the entire construction period, the consent holder shall maintain a barrier between the construction site and the Events Centre to assure that all users of the Events Centre are kept out of the construction area.

9. At the time of final design of the Aquatic Centre, the consent holder shall be required to meet the fire safety design requirements for pool halls including fire fighting services.

10. Until improvements are made to the Council reticulated water supply that result in increased residual pressures (minimum 300kPa) in the 150mm diameter water main in SH6, irrigation of the playing fields shall not coincide with peak use times of the Aquatic Centre and/or Events Centre. Peak use times shall be determined by the management of each respective Centre and shall be submitted to Council within 12 months of the opening of the Aquatic Centre. Whenever possible irrigation of the playing fields shall occur outside hours of operation of either centre.

11. The combined discharge of wastewater for both the Events Centre and the Aquatic Centre shall not exceed 13.6l/s unless the consent holder submits information to Council for approval that proves that the wastewater discharge rate can be increased without negative downstream effects.

12. That in all other aspects the Aquatic Centre shall comply with conditions 4, 8, 9, 11, 13 and 14 as contained in part A of this Designation.

C.23 Designation #30 - Lake Avenue Sewage Pump Station

That the pump station operate so the following noise levels are not exceeded, except for emergency purposes, at or within the notional boundary of residential units:

* 0800 - 2000 hrs  50 dBA L10
* 2000 - 0800 hrs   40 dBA L10
**DESIGNATIONS**

**C.24 Designation # 31 - Coneburn Water Pump Station and Intake**

1. No activity or disturbance of the lake bed may be undertaken within that part of the designated area applying to Lake Wakatipu, other than the use of the surface of the lake for recreation activities, without the consent of the Queenstown Lakes District Council. The purpose of this restriction is to ensure that no damage occurs to the water intake pipe which is located on the bed of the lake, extending approximately 25 metres from the lake edge.

2. That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at or within the notional boundary of residential units:
   * 0800 - 2000 hrs  50 dBA L10
   * 2000 - 0800 hrs  40 dBA L10

**C.25 Designation # 33 - Willow Place Sewage Pump Station**

That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at or within the notional boundary of residential units:
   * 0800 - 2000 hrs  50 dBA L10
   * 2000 - 0800 hrs  40 dBA L10

**C.26 Designation # 34 - Kawarau Place Sewage Pump Station**

That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at the boundary of the property on which the pump station is located:
   * 0800 - 2000 hrs  50 dBA L10
   * 2000 - 0800 hrs  40 dBA L10

**C.27 Designation # 35 - Leary’s Gully Water Pump Station**

That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at the boundary of the property on which the pump station is located:
   * 0800 - 2000 hrs  50 dBA L10
   * 2000 - 0800 hrs  40 dBA L10

**C.28 Designation # 38 - Norfolk Street Sewage Pump Station**

That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at or within the notional boundary of residential units:
   * 0800 - 2000 hrs  50 dBA L10
   * 2000 - 0800 hrs  40 dBA L10

**C.29 Designation # 39 - Sewage Pump Station, McDonnell Road, Arrowtown**

That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at the boundary of the adjoining site used for residential purposes:
   * 0800 - 2000 hrs  50 dBA L10
   * 2000 - 0800 hrs  40 dBA L10

**C.30 Designation # 41 - Arrowtown Water Supply Borefield and Infrastructure**

1. Any new water supply infrastructure shall have a maximum height of 1m above ground level, except for any vent pipes
2. That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at or within the notional boundary of residential units:

* 0800 - 2000 hrs  50 dBA L10
* 2000 - 0800 hrs  40 dBA L10

C.31 Designation # 44 - Glenorchy Water Storage Tanks

No activity or work may be undertaken within the designated area which could adversely affect the Council water storage tanks, without the consent of the Queenstown Lakes District Council. The purpose of this restriction is to ensure that no damage occurs to Council’s water storage tanks.

C.32 Designation # 45 - Queenstown-Glenorchy Water Pump Station and Intake

That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at or within the notional boundary of residential units:

* 0800 - 2000 hrs  50 dBA L10
* 2000 - 0800 hrs  40 dBA L10

C.33 Designation # 46 - QLDC Sewage Treatment Works

For conditions refer to page A1/40 and also file RM 970647

1. The designation shall be in accordance with the approved plans and specifications submitted with the notice of requirement including all associated amendments, with the exceptions required by the following conditions:

2. That unless it is otherwise specified in these conditions of the consent, compliance with any monitoring requirement imposed by this consent shall be at the requiring authority’s own expense.

3. That the consent holder shall pay all required administrative charges fixed by the Council, pursuant to Section 36 in relation to:

   (i) The administration, monitoring and supervision of this requirement; and
   (ii) Charges authorised by regulations.

4. Prior to the construction of any further facilities on site, a preliminary archaeological assessment of the site shall be undertaken to determine whether there is any evidence of archaeological sites or material of cultural or historical significance. That, if during development, archaeological material is discovered or a previously unidentified site disturbed, the designating authority shall immediately implement appropriate measures. Appropriate measures would include an assessment by a qualified archaeologist and notification of the NZ Historic Places Trust and Te Runanga o Otakou and Kati Huiapaki Puketeraki, before operations resume.

5. That in the case of any pre-1900 sites being identified, that the designating authority make appropriate application to the NZ Historic Places Trust, pursuant to Sections 9 to 20 of the Historic Places Act 1993, for authority to search, modify or destroy a site.

6. A landscaping plan including irrigation scheme, shall be submitted to, and approved by, the Territorial Authority within 3 months of the confirmation of the designation.

Prior to submission of the plan, the Requiring Authority shall consult with residents having access off Jims Way, and shall confirm, when submitting the plan, that such consultation has occurred. The landscaping plan shall be implemented within 12 months of the confirmation of the designation and shall thereafter be maintained in accordance with that plan. If any plant or tree should die or become diseased, it shall be replaced.

In this instance, the landscaping plan shall be designed to meet the following objectives:

- Create a positive visual effect from the surrounding area using species in keeping with the vegetation of the area including both deciduous and evergreen species.
• Minimise the view from State Highway 6 with trees being a minimum of 2 metres in height at the time of planting.
• Improve the on-site amenity.

7. Nuisance odour from the existing facility any future facilities shall not be detectable beyond the boundary site.

8. All practicable measures shall be undertaken and maintained to minimise the risk of the site being inundated by water as a result of flooding that could cause pollution to enter the Shotover and Kawarau Rivers. A risk management report on this issue shall be included with the Outline Plan referred to in Condition 10.

9. Any upgrades or extensions to the facility shall ensure that public access to sport fishing and game-bird hunting venues in the vicinity is maintained.

10. Prior to the construction of any further facilities, the Requiring Authority responsible for the designation shall submit Outline Plans as required by Section 176A, to the Territorial Authority for consideration. The Requiring Authority shall also carry out consultation with all potentially affected parties as part of this process, including Te Runanga o Otakou and Kati Hairapa ki Puketeraki, and when submitting such plans shall confirm that this consultation has occurred, and shall indicate the response to issues raised in this consultation.

11. The Requiring Authority shall design, develop and manage the public work so that it does not attract any birds that are hazardous to aircraft or may endanger aircraft operations. The bird species that have been observed at the airport and which may be hazardous to aircraft are gull, oyster catcher, hawk, spur-wing plover and duck.

12. 6 months prior to any work being carried out in accordance with the Outline Plan, monitoring of bird activity shall be undertaken by a suitably qualified person experienced in wildlife observation and approved by the Territorial Authority. This person will monitor bird activity in and around the site as an impartial observer to enable any increased bird activity as a result of the work to be identified.

13. The result of all monitoring shall be reported to the Territorial Authority and the Queenstown Airport Corporation Limited every three months.

14. In the event of any hazard to Queenstown Airport operations arising from birds which have been shown to have or likely to have been attracted to the area by any work for which Outline Plan approval has been obtained, the Territorial Authority reserves the right to review the conditions of consent attached to this designation for the purpose of mitigating, remedying or avoiding any adverse effect on airport operations, that is apparent from the works or from on-going monitoring.

15. The Territorial Authority reserves the right to review the conditions of this requirement annually from the date of confirmation for the purpose of mitigating, remedying or avoiding any adverse effect on the environment that is apparent from the operation of the activity or from on-going monitoring.

In the event that the Council, in exercising its authority as the Territorial Local Authority (as opposed to Designating Authority) does not agree with my recommendation to delete the buffer zone, an additional condition, as follows should be imposed:

16. The buffer zone shall apply to the areas as shown on the approved plan, which is described as including the area 300 metres to the east and south of the designation boundary, 10 metres back from the edge of the terrace on the western boundary and includes the area to the far edge of the road reserve of State Highway 6 on the northern boundary. Residential activities are prohibited within the Buffer Zone boundaries.

C.34 Designation # 47 - Arrowtown-Lake Hayes Water Supply Pump Station and Intake
That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at or within the notional boundary of residential units:

* 0800 - 2000 hrs  50 dBA L10
* 2000 - 0800 hrs  40 dBA L10

C.35  Designation # 49 - Bendemeer Reserve Sewage Pump Station

That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at the boundary of the adjoining site used for residential purposes:

* 0800 - 2000 hrs  50 dBA L10
* 2000 - 0800 hrs  40 dBA L10

C.36  Designation # 51 – Wanaka Sewage Treatment Works

No dwellings are to be erected within the “no build” buffer zone shown on the District Plan Maps.

C.37  Designation # 52 & 53- Lakeside Road Sewage Pump Station

That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at or within the notional boundary of residential units:

* 0800 - 2000 hrs  50 dBA L10
* 2000 - 0800 hrs  40 dBA L10

C.38  Designation # 55 - Wanaka Sewage Pump Station

That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at the boundary of any site used for residential or visitor accommodation purposes:

* 0800 - 2000 hrs  50 dBA L10
* 2000 - 0800 hrs  40 dBA L10

C.39  Designation # 56 - Stratford Terrace Sewage Pump Station

That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at the boundary of any site used for residential or visitor accommodation purposes:

* 0800 - 2000 hrs  50 dBA L10
* 2000 - 0800 hrs  40 dBA L10

C.40  Designation # 58 - Dungarvon Street Sewage Pump Station

That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at or within the notional boundary of residential units:

* 0800 - 2000 hrs  50 dBA L10
* 2000 - 0800 hrs  40 dBA L10

C.41  Designation # 60 - Lakeside Road Water Supply Pump and Intake

That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at or within the notional boundary of residential units:

* 0800 - 2000 hrs  50 dBA L10
* 2000 - 0800 hrs  40 dBA L10
C.42 Designation # 61 - Totara Terrace Water Supply Pump Station

That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at the boundary of any site used for residential purposes:

* 0800 - 2000 hrs  50 dBA L10
* 2000 - 0800 hrs  40 dBA L10

C.43 Designation # 62 - Anderson Road Water Supply Pump Station

1. That landscaping be undertaken and maintained along the Anderson Road frontage.

2. That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at the boundary of the property on which the pump station is located:

* 0800 - 2000 hrs  60 dBA L10
* 2000 - 0800 hrs  50 dBA L10

3. That from 31 July 2000 the pump station shall operate so that the following noise levels are not exceeded, except for emergency purposes, at the boundary of the designated site and Lot 1 DP 13035.

* 0800 - 2000 hours  50 dBA L10
* 2000 - 0800 hours  40 dBA L10

Measured and assessed in accordance with NZ 6801:1991 and NZS 6802:1991

4. That in August 2000, and annually thereafter, the Requiring Authority shall undertake a day time and night time noise assessment at the boundary of the Anderson Road Business Zone between the designated site and Lot 1 DP 13035 and shall supply a copy of the same to the owner of Lot 1 DP 13035

5. The seals on the non-return valves shall be replaced whenever the nuisance noises start.

C.44 Designation # 63 - Gordon Road, Wanaka Sewage Pump Station

That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at the boundary of the property on which the pump station is located:

* 0800 - 2000 hrs  60 dBA L10
* 2000 - 0800 hrs  50 dBA L10

C.45 Designation # 68 - Domain Road Oxidation Ponds, Hawea

No oxidation ponds or associated activity may be undertaken within 100 metres of Domain Road. The purpose of this restriction is to ensure that the land within 100 metres of Domain Road provides a buffer between the oxidation ponds and the road.

C.46 Designation # 69 – Albert Town Wastewater Management Purposes

No buildings are to be erected within the “no build” buffer zone shown on the District Plan Maps.

C.47 Designation # 70 - Allison Avenue Sewage Pump Station
That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at the boundary of any site used for residential purposes:

* 0800 - 2000 hrs 50 dBA L10
* 2000 - 0800 hrs 40 dBA L10

C.48 Designation # 71 - Alison Avenue, Albert Town Sewage Pump Station

That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at the boundary of any site used for residential purposes:

* 0800 - 2000 hrs 50 dBA L10
* 2000 - 0800 hrs 40 dBA L10

C.49 Designation # 72 - Wicklow Terrace Sewage Pump Station

That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at or within the notional boundary of residential units:

* 0800 - 2000 hrs 50 dBA L10
* 2000 - 0800 hrs 40 dBA L10

C.50 Designation # 73 - Lake Hawea Esplanade Sewage Pump Station

That the pump station operate such that the following noise levels are not exceeded, except for emergency purposes, at or within the notional boundary of residential units:

* 0800 - 2000 hrs 50 dBA L10
* 2000 - 0800 hrs 40 dBA L10

C.51 Designation # 74 - Lake Hawea Esplanade Wastewater Pump Station and Water Treatment

1. Colours for all buildings shall be in the range of natural browns, greys or greens as per the surrounding landscape with a light reflectivity value of between 5 and 25%.

2. The maximum height for buildings shall be 5m set from existing ground level.

3. The maximum building coverage for the designation site shall be 30%.
   (For the avoidance of doubt the public toilet facilities are not included in the building coverage)

4. Noise:
   (a) Sound shall be measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 and shall not exceed the following noise limits at any point within the notional boundary of any residential unit:
       (i) daytime (0800 to 2000 hrs) 50 dB LAeq(15 min)
       (ii) night-time (2000 to 0800 hrs) 40 dB LAeq(15 min)
       (iii) night-time (2000 to 0800 hrs) 70 dB LAFmax
   (b) The noise limits in (a) shall not apply to:
       - Construction sound which shall be assessed in accordance and comply with NZS 6803:1999.
       - The use of an electricity generator for emergency use.

C.53 Designation # 76 - Victoria Bridge Terrace site (RM 970116)

It is decided that the requirement to Designate part Run 330C, Block II, Kawarau SD for the purpose of a landfill; part Run 330C and part Section 32 for the purpose of a buffer zone; and part Run 330C for the purpose of a road;
be confirmed pursuant to Section 168A(3) of the Resource Management Act 1991, subject to the following conditions:

1. The activity shall take place in accordance with the plans and specifications submitted with the notice of requirement and the approved Buffer Zone and Landfill Site Boundaries plan dated 19 March 1998 attached, with the exceptions required by the following conditions:

2. All engineering works shall be carried out in accordance with all relevant New Zealand Standards to meet the acceptance of the District Planner.

3. Prior to the commencement of any works on the land being developed, and in accordance with Condition 2 above, the applicant shall provide to the District Planner, copies of specifications, calculations and design plans both necessary and adequate to detail the following engineering works required:

   (a) That all roading to the site and on site are in accordance with Queenstown Lakes District Council standards.

   (b) That the intersection of the new road and the Kawarau Gorge Road - State Highway 6 be reconstructed in accordance with Transit New Zealand standard described in Diagram 4 with the modification that the radius shown ‘R’ shall be 15 metres for heavy vehicles.

   (c) That adequate facilities are provided on site for fire fighting purposes. The New Zealand Fire Service shall be consulted regarding training and establishment of fire-fighting procedures.

   (d) Dust be controlled on the landfill site to ensure that no nuisance is created beyond the site boundary,

   (e) That a water reticulation system be provided at the boundary of the proposed landfill site for the purposes of providing an irrigation system for the proposed tree planting for screening purposes.

   (f) All earthworks required to establish the site for the proposed activity.

4. Prior to the establishment of the activity, the applicant shall provide the following:

   (a) That the boundaries of the land shown ‘F’ on SO 24512 be fenced with a post and wire, seven strand fence.

   (b) That the proposed new road shown ‘F’ on SO 24512 have a formation of no less than 4 metres in width and of a metal depth of 150mm of M4 AP40.

   (c) That the land shown as ‘A’ and ‘C’ on SO24512 be road to be stopped.

   (d) That areas shown ‘B’, ‘D’ and ‘E’ be land taken for local purpose reserve (landfill).

   (e) That the land shown ‘F’ on SO 24512 be land taken for road.

   (f) That the applicant shall provide a boundary fence about the proposed landfill area defined as ‘B’, ‘D’ and ‘E’ on SO 24512. The fence shall be a seven strand post and wire fence or equivalent.

   (g) That an operations manual be prepared and approved by the District Planner for all aspects of the operation and maintenance of the activity and the manual is to include any on going conditions that are required to be complied with. Aspects to be included in the manual are:

   (i) That temporary access tracks within the landfill operating area be of adequate standard to ensure that a B Train commercial vehicle can manoeuvre without difficulty.
(ii) That a portable water supply be available for human consumption at the operator’s facilities.

(iii) That the operational area boundary fence shall be no less than 3 metres in height and in the position shown on the conceptual operations plan, Sheets 10-22.

(iv) That the effects of odour, dust, vermin and litter will be mitigated to ensure that any adverse effects associated with the site are minor.

(h) The applicant shall carry out planting in accordance with the Planting Plan drawn by Morgan+Pollard associates, stamped (received 1 May 2007 and stamped as approved 13 June 2007) and the application as submitted (ref. RM070383) with the exception that a maximum 25% of Macrocarpa shall be planted in the replacement of any plant removed within the proposed planting ‘D’ zone.

(i) Earthworks required as part of the operation.

5. Compliance with the approved operations manual required to be prepared under condition 4(g).

6. The planting carried out in accordance with condition 4(h) above shall thereafter be maintained and irrigated in accordance with that plan. If any plant or tree should die or become diseased it shall be replaced.

7. During the construction stage the consent holder shall ensure:

(a) That noise generated from construction activities occurring on the site shall be measured and assessed in accordance with, and shall not exceed the maximum permissible noise levels specified in NZS 6803P:1984 ‘The Measurement and Assessment of Noise from Construction, Maintenance and Demolition Work’.

(b) That the deposition of soil onto the State Highway from vehicles and other earth moving equipment is avoided by taking such precautions as the installation of a truck wash area fitted with a high pressure hose to remove mud from vehicles prior to entering onto the State Highway.

(c) That dust generated by construction, or from the wind is not noticeable at the boundary of the site, by the use of water or other approved dust suppressant and from refraining from construction activities which generate-dust during the prevalence of windy conditions.

(d) That a water supply capable of providing sufficient water for use during the construction stage is available prior to any major earthworks occurring.

(e) The consent holder shall ensure that run-off of stormwater from the site during construction, which visibly contains sediment is not discharged directly to a waterway.

8. During the operational stage of the landfill the consent holder shall ensure:

(a) That all activities conducted on the site are carried out such that the following noise levels are not exceeded, neither at, nor within, the notional boundary of any residential unit (other than a residential unit located on the same site as the activity):

<table>
<thead>
<tr>
<th>Time Period</th>
<th>Level</th>
</tr>
</thead>
<tbody>
<tr>
<td>Day time 0800-2000 hours</td>
<td>L10 50dBA</td>
</tr>
<tr>
<td>Night time 2000-0800 hours</td>
<td>L10 40 dBA;</td>
</tr>
</tbody>
</table>

And shall not exceed the following level at the boundary of the site:

L10 65 dBA.

Noise levels shall be measured and assessed in accordance with NZS 6801:1991 and NZS 6802:1992.
DESIGNATIONS

Note: The notional boundary is defined as being 20m from the wall of the dwelling.

(b) That the unloading and storage of any hazardous substances on the site shall be carried out in an area which is sealed with an impervious material and banded to contain the total volume of the material in the event of a spillage and in all other respects shall be in compliance with the relevant legislation.

(c) That register of the type and quantity of hazardous substances stored on site and details of the fate of any hazardous substances leaving the site is maintained.

9. Should the applicant choose to site water storage pipes at an elevated height above the landfill operating area on adjoining land, then appropriate easements shall be duly granted.

10. That all proposed monitoring be carried out and reported to the appropriate authorities.

11. That prior to the development of the landfill commencing, an archaeological recording programme shall be commissioned to fully record the sites identified by the preliminary archaeological assessment and a management plan developed to ensure that:

(a) Adverse effects on the sites affected by the landfill operation are mitigated by a recording programme in accordance with the following:

- That stratigraphy and remains are sampled in accordance with accepted archaeological practice;
- That any artefacts are properly removed, curated and retained for study;
- That if any additional sites of possible interest to Manawhenua are identified, the Trust and Manawhenua in accordance with condition 13 should be notified without delay.

- That within six months of the conclusion of any archaeological work, a report to accepted archaeological standard be submitted to the Regional and District Council with a copy to the NZ Historic Places Trust.

Particular regard shall be had to minimising the adverse effects of the proposed new road realignment on the abandoned water race, sluicing sites and hut identified in the preliminary archaeological assessment.

(b) That the consent holder shall obtain an Authority from the NZ Historic Places Trust to destroy, damage or modify any historic archaeological sites affected by the landfill development.

(c) Appropriate management techniques, such as buffer zones, employee education and fencing where appropriate, are put in place to avoid adverse effects on the sites that adjoin, but are not immediately affected by, the landfill operation.

(d) The management plan should be submitted to the Councils after consultation with the NZ Historic Places Trust.

12. That processes are put in place to ensure appropriate management of the discovery of archaeological remains or unrecorded archaeological sites or sites of possible interest to Manawhenua, during the landfill operations. Appropriate management would include assessment by a qualified archaeologist and notification of the NZ Historic Places Trust and Te Runanga o Otakou and Kati Huirapa ki Puketeraki before operations resume.

13. If any site of historical Iwi association is identified during landfill development and operation, work is to cease in that specific location and both Te Runanga o Otakou and Kati Huirapa ki Puketeraki are to be notified.
14. The site shall be rehabilitated and reinstated in accordance with the Development and Management Plan at the completion of each phase or upon closure of the site, whichever precedes, and shall be grazed to minimise fire risk.

15. Any changes to normal stormwater flows as a result of the activity shall be directed to avoid any adverse effects occurring on neighbouring properties.

Note: Pursuant to Section 184(a) of the Resource Management Act 1991 the designation will lapse on the expiry of 5 years after the date on which it is included in the district plan unless it is given effect to before the end of that period. A longer period may be fixed if application is made within 3 months of expiry if substantial progress has been, or continuing to be made, towards giving effect to the designation.

C.54 Designation # 77 - Tucker Beach Landfill
That the Tucker Beach landfill be closed by 30 June 1999

C.55 Designation # 78 - Refuse Transfer Station, Kingston
1. That the transfer station be screened from the State Highway and the railway line which is used by the Kingston Flyer.
2. That the local iwi be advised of the excavation of the site.
3. That excavation be stopped should any artefact or other item of cultural or spiritual significance be uncovered.
4. That any finding of the same be reported to the local iwi representatives and liaising with them before proceeding with development works.

C.56 Designation # 81 - Athol Street Carpark
That any future building on the site have a maximum building height of 12 m
   a. Maximum building height 12 m
   b. Maximum building coverage 80%

C.57 Designation # 219 - Earnslaw Park Recreation Reserve
A maximum height limitation of 8m shall apply to designation # 219

C.58 Designation # 228 – Hensman Road Local Purpose Reserve (Beautification)
No buildings may be located on the designated land. The purpose of this restriction is to ensure that the land remains a buffer between residential dwellings and the State Highway.

C.59 Designation # 232 - Gorge Road Carpark
1. That the land designated shall extend from Gorge Road only as far west as the present eastern bank of Horne Creek.
2. Development of the parking area and parking building shall be generally in accordance with the scale of building and type of landscaping shown on the plans presented on behalf of the requiring authority at the hearing. In particular, the level of the floor of the upper level of the parking structure shall be lower than the level of Gorge Road.
3. The parked cars are to be substantially screened by earth mounding and planting from viewpoints along Gorge Road, Boundary Street and the recreational ground. If the planning shown on the plans presented outside the area to be designated does not eventuate, this screening shall be achieved by planting within the designated area. Planting
shall be designed and maintained so as not to unnecessarily obscure views over the site.

4. All works shall be carried out in conformity with NZS 4404, 1981, Code of Urban Land Subdivision, the Queenstown Lakes District Council Amendments thereto dated 1 June 1994, and associated Standards and Codes of Practice.

5. Headworks fees for water and connections shall be paid in conformity with the Council’s normal fees and charges.

6. A solid fence or wall with a minimum height of 2 metres shall be erected along the boundary of any adjoining land within the designated area not held in public ownership. Such a fence or wall shall be designed to ensure no lights from vehicles on the site shine through. Any building erected near the boundary of any adjoining land within the designated area not held in public ownership shall comply with the bulk and location requirements in the District Plan as if both sites were zoned Low Density Residential.

C.60 Designation # 242 - Water Storage and Supply Arthurs Point

It is decided that the requirement to designate part of Lot 3 DP 331294 for the purpose of water storage and supply be confirmed pursuant to section 168A(3) of the Resource Management Act, subject to the following conditions:

1 Building Design

(a) That the colour of the exterior of any future structures to be built on site comprise BSS 12 B29 (Resene - Rangoon Green).

(b) That any future structures on site do not exceed 6 metres in height at any point above the ground level existing as at the date of this decision.

2 Landscaping

(a) That the construction of any new reservoir or other structures on the subject site shall be completed in such a manner that those existing conifer trees which are situated in close proximity to the east, south east and north east faces of the proposed structures, are retained in a healthy state in order that they may contribute to substantial screening of all works from adjoining residential and commercial areas on either side of Malaghan Road, and that construction works generally be carried out so as to minimise as far as possible the removal of any existing trees.

(b) That any of the existing tree cover which is required to be removed to allow works on site, be replanted with conifer trees in such a manner as to substantially screen any structures on site when viewed from Malaghan Road. Such replanting shall be completed within the first planting season following the establishment of any structures on site. The trees planted shall be at least 2 metres in height at the time of planting.

(c) That any cut and batter of the slope-face necessary on the subject site for the purpose of completing any works on site:

(i) Be no steeper than a slope of 1:1, with the final degree of steepness to be determined by consultation between the site engineer and the independent landscape adviser with a view to minimising visual impact and maximising the ability for regeneration of vegetative cover.

(ii) Be stabilised and replanted with species consistent with the vegetative cover existing prior to works being commenced on site.

(iii) That earth mounding be placed around the side and front of the reservoir if reasonably practical to help screen the reservoir from adjoining residential and commercial land, and that such mounding be
stabilised and oversown with browntop grass within the first planting season of approval.

(iv) That all top soil materials be stripped and stockpiled for long term batter revegetation and construction of mounding, and be replaced and oversown as directed by the site engineer.

(v) That the revegetation and planting detailed above be reviewed within six months of those works being carried out and regularly at six month intervals thereafter until all trees and grass planted have been properly established and that remedial planting be undertaken in the event of any failure of the revegetation and grass planting required, at the cost of the applicant.

3 Dumping of Fill

(a) That any dumping of fill from the subject site occurring at the site nominated by the Requiring Authority (across Malaghan Road near the Shotover River) be completed within the hours 07.30 am and 07.30 pm. There shall be no dumping on Sundays or Public Holidays.

4 Reservoir Site

(i) All topsoil materials to be stripped and stockpiled for long-term batter revegetation, and to be replaced and oversown as directed by the site engineer at the completion of the works.

(ii) All cut batters to be excavated at a nominal 1 in 1 slope and to a maximum vertical height of 5 metres, with an intermediate 1.5 metre wide drainage bench to be included as required by the site engineer for those batter slopes exceeding 5 metres in vertical height.

(iii) All cut batter slopes to be inspected and certified as to long-term stability by the consultant engineering geologist or geotechnical engineer, and remediated if or when required prior to installation of the concrete water reservoir.

(iv) Following excavation the reservoir foundation area to be subjected to heavy dynamic compaction to a standard approved by the site engineer, and any voids encountered to be infilled with approved and compacted subgrade material prior to placement of 50mm thick site concrete as per design.

(v) A 1 metre deep perimeter drain to be installed as designed to provide for seepage control if or where encountered, and any groundwater flows intercepted to be directed into the drain as required by the site engineer.

(vi) For the first one year after completion all cut batters and drainage measures to be inspected at least quarterly by the site engineer or his nominee to ensure satisfactory design performance, and thereafter on a regular care and maintenance basis only.

(vii) Close liaison to be maintained between the site engineer and the consultant engineering geologist or geotechnical engineer during the construction period to ensure any site stability issues are addressed, and following completion specialist geotechnical data input to be obtained if or where required.

(viii) A network of survey marks as agreed between the site engineer and the consultant engineering geologist or geotechnical engineer to be established on and around the reservoir for annual resurvey to confirm stability for a period of five years after construction, and thereafter on an as-required basis.
(ix) The “consultant engineering geologist or geotechnical engineer” referred to in these conditions shall be a suitably qualified and experienced geotechnical engineer who is regarded as a specialist in dealing with schist derived landslide materials.

C.61 Designation # 243 - Educational Facilities Wanaka (RM 050409)

1. The Development be undertaken in general accordance with the application as submitted.

2. Prior to commencing works on the site for proposed access and parking and drop-off and collection areas shall be provided to the Wanaka Community Board and Queenstown Lakes District Council for their comments.

3. Prior to occupation of the school the Ministry shall provide for the following:

   (a) Onsite carparking providing for no fewer than 124 carparks on site and for bus parking areas and drop-off and collection areas in the vicinity of Ironside Drive, which shall generally be as shown in option 4.2.

   (b) Pedestrian and cycle accessways required on the site shall be constructed to the standards of the Queenstown Lakes District Council.

   (c) A roundabout shall be constructed at the Kings Drive/ Ironside Drive intersection. Specifications of these works shall be provided to the Queenstown Lakes District Council for its approval prior to commencing any works at this intersection. The full cost of these works shall be borne by the Ministry.

4. Drop-off and pick-up areas shall be maintained on the subject site, designed by a suitably qualified engineer to adequately provide for accommodating the number of pupils on the roll of all facilities on the subject site, at all times.

5. A review of parking and traffic related issues shall be conducted after the expiration of 12 calendar months from the opening of the school and before the expiration of 18 calendar months for the opening of the school, and again at each of the points where the school role reaches 600 pupils and 800 pupils respectively. Each review shall be conducted by a suitably experienced and qualified traffic engineer nominated by the Queenstown Lakes District Council and approved by the ministry. A review shall also be conducted at any other time that the Queenstown Lakes District Council deems necessary. The cost of any mitigation of adverse effects as determined by the engineer shall be borne by the Ministry unless an alternative cost-sharing agreement is reached with the Queenstown Lakes District Council. The review shall consider the following issues, and make recommendations for any necessary mitigation of adverse effects which are identified:

   (i) The size and capacity of drop-off and pick up areas accommodated on site, which shall adequately service the full combined role of all schools located on the site. This shall include the use of the unnamed road off Totara Terrace and the extension of Ironside Drive.

   (ii) Increases in on-site parking being provided to adequately accommodate parking demand during peak times, the number of car parks shall be based on a survey conducted by the reviewing engineer on both wet and dry days and in both summer and winter.

   (iii) The provision of an extension to Ironside Drive generally as shown on option 4.3 as presented in evidence on decision RM 050409, but within the site boundaries of the subject site, and the possibility of extending the roadway further in a north or easterly direction to Aubrey Road or Kings Drive respectively, through Kelly’s Reserve, subject always to the approval of the Ministry of Conservation in whom Kelly’s Reserve is presently vested, and to best traffic engineering practice in relation to any intersection thereby created.

6. The following restrictions shall apply to any development on the site:
a. Minimum setback of buildings from roads shall be 4.5m.
b. Minimum setback of buildings from residential properties shall be 4.5m.
c. Minimum setback of buildings from all other internal boundaries shall be 2m.
d. Maximum height of buildings shall be 10m provided that no part of any building shall protrude through a recession plane inclined towards the site at any angle of 26 degrees and commencing 2.5m above ground level at any point on the site boundary interfacing with a residential zone, and 4.5m above ground level at any other point on the site boundary (as exceptions to the recession plane, gable, dormer and other similar projections may encroach beyond the recession plane provided they are contained within a calculated area no greater than 6m with the apex no higher than 1m below the maximum height for the school site and the base of the area(s) at the level of the recession plane protrusion).
e. Tree species planted will not exceed 10m in height and will be maintained at this height at maturity.
f. The following trees will be excluded from landscaping on the site: Pinus radiata, Pinus muriata, Pinus ponderosa, Pinus sylvestris, Pinus nigra, Douglas fir, and all eucalyptus varieties.
g. When necessary, water spraying will be used to reduce dust affecting adjacent residential properties.
h. During construction, the site shall be kept in a tidy state with construction materials secured so they are not blown around the site or into adjacent properties.
7. The first Outline Plan submitted for the site pursuant to section 176A of the Act shall include a structural landscape plan showing the location of any planting proposed on the site that is likely to have a mature height exceeding 3m in order that the Council may assess the effects of such vegetation on views from any residential properties that share a boundary with the site.

C.62 Designation # 330 – Works Depot Wanaka (RM 080414)
1. The development be undertaken in accordance with the application as submitted and landscape plan and car parking plans prepared by Baxter Design Group and stamped approved on 16 July 2008.
2. Any activity undertaken on the site shall be conducted such that the following noise levels are not exceeded at any time at any point within the boundary of any other site:
   - During daytime (0800 to 2000 hrs) 50dBA L10
   - During night time (2000 to 0800 hrs) 40dBA L10
3. Hours of operation shall be between 7.30am and 6.00pm daily, except:
   - After 6.00am on week days, one vehicle may enter and exit the site; and
   - During emergencies, civil defence or rural fire, vehicles and personnel may enter and exit the site at any time.
4. Heavy vehicle access to the site shall be limited to two per day and shall not be before 0800 hours.
5. No more than six staff vehicles shall be parked on the site during any given day. They are to be parked in a designated parking area within the depot grounds. There is to be no parking on the road verges outside the depot.
6. There shall be no more that 12 operational vehicle movements daily.
7. Coinciding with the council upgrading of Tenby Street, the applicant shall upgrade the existing Tenby Street vehicle crossing to a sealed vehicle crossing that is constructed to Council standards and is suitable for regular heavy vehicle use. If the Tenby Street upgrade does not take
place within 6 months of the granting of this consent the applicant will construct the sealed vehicle crossing as per above.

8. The provision of a sealed vehicle crossing from Connor Street to the on-site loading ramp that shall be constructed to Council standards, including compliance with Rule 14.2.4.2 (except for its location in proximity to the Connor/Tenby Street intersection).

9. A Traffic Management Plan is to be implemented when using the loading ramp and shall include the following:
   (a) Suitable site warning signage shall be in place on the road in both directions from the site entrance.
   (b) Safety ‘dayglo’ vests or similar shall be worn by any staff working on the road.
   (c) Safe sight distances and passing provisions shall be maintained at all times for road users.

10. Prior to the site being used as a public works depot, the following work shall be completed:
    (a) The construction of all vehicle manoeuvring and car parking areas in gravel with a concrete hard stand in front of the building. This is to be done to council standards, including adequate provision for stormwater control.
    (b) Management of the on-site manoeuvring and parking areas shall be undertaken at all times to mitigate against dust and/or noise nuisance.
    (c) The closure of the secondary access from Connor Street with permanent fencing materials and a lockable gate.
    (d) The repainting and repairing of the existing on-site building.
    (e) The repairing of the loading ramp to a safe standard.

11. An amended landscape plan shall be submitted for approval by Council prior to the site being used as the public works depot. The approved landscape plan including the fencing, gates and restoration of the berms shall be implemented within six months of the public works commencing and shall thereafter be maintained. If any tree or plant shall die it shall be replaced in the next available planting season. The landscape design shall incorporate the following criteria in order to maintain sight visibility from the access points to the site:
   (a) The hedge planting along the Tenby Street frontage shall be maintained to a height so as not to hinder vehicle visibility when exiting the yard.
   (b) The street tree planting along both road frontages shall include species that provide for a canopy 1.5m above ground level and a small diameter trunk.

C.63 Designation # 331 – Electricity Substation Cardrona (RM 070792)

- That the activity be carried out in accordance with the application and plans submitted and new site plan stamped as received on 18 June 2010, with the exception of the amendments required by the following conditions of consent.

- That the requirement to designate the proposed site in accordance with the application be confirmed, subject to the following conditions.

- That the use of the site for a temporary diesel generation plant be confirmed subject to the following conditions.

1. Landscape conditions
   (a) The existing vegetation within and adjacent to the site shall be maintained for the initial five-year period.
   (b) A detailed landscape plan to mitigate the visual effects of development on the designation site is to be submitted to Council for approval within three months of the date of this
recommendation. The plan shall be implemented within the next available planting season and maintained thereafter. Should any tree or shrub die or become diseased, it shall be replaced in the next planting season. The objectives of the landscaping plan are to achieve the following:

- To fully screen the site from the approaches at both ends of the Cardrona Valley Road;
- To protect existing rural vegetation in order to preserve a rural character;
- The planting of a mixed variety of suitable trees of varying heights and maturity sufficient to grow into a naturalised screen to shield the site from the roadway by the time of construction of the substation.

(c) The proposed colour of the container housing the generator shall be submitted to Council for approval prior to application. It should comply with Council’s guidelines of being within the natural range of browns, greens and greys and with a reflectivity of less than 36%.

(d) All heritage trees located on the site shall be protected in accordance with the provisions governing such trees.

2. Engineering conditions

(a) All engineering works shall be carried out in accordance with the Queenstown Lakes District Council’s policies and standards, being NZS4404:2004 with the amendments to that standard adopted on 5 October 2005, except where specified otherwise.

(b) Prior to commencing the construction of any public work on the designated site, a sealed vehicle crossing shall be constructed to the right-of-way approved by consent RM 071072 from Cardrona Valley Road to be in terms of Diagram 2, Appendix 7 and Rule 14.2.4.2 of the Partially Operative District Plan. This shall be sealed for a minimum of 6m from the road carriageway or to the boundary of the site, whichever is the greater. The vehicle crossing shall be trafficable in all weathers and be capable of withstanding a laden weight of up to 25 tons with an axle load of 8.2 tons or have a load-bearing capacity of no less than the public roadway serving the property, whichever is the lower. Provision shall be made to continue any roadside drainage. Design details shall be submitted to Council for review prior to construction.

(c) Prior to commencing the construction of any public work on a designation site, the right-of-way access to this site as shown on Patterson Plotts Partners Limited’s plan, Job Number W2947, Proposed Easement over Part Sec SO24173 Cardrona Valley, Wanaka, dated 2 November 2007, and as approved by consent RM 071072, shall be formed andsurfaced in accordance with Council’s rural roading standards. The right-of-way shall have a minimum formed carriageway width of 3.5m and provision shall be made for the disposal of storm water from the right-of-way.

(d) Vehicle access and manoeuvring areas shall be constructed on the designation site in accordance with Council standards.

These areas shall be constructed with a minimum compacted depth of 150mm AP40 metal at a minimum construction standard.

(e) Public works to be undertaken in accordance with the designation shall include the provision of a storm water disposal system that is to provide storm water disposal from all impervious areas within the site. The proposed storm water system shall be designed by a suitably qualified professional as is defined in s1.4 of NZS4404:2004 and subject to the review of Council prior to implementation.

3. Environmental Health conditions

(a) Prior to the commissioning of the storage facility, the Requiring Authority shall submit a copy of the applicable hazardous substances test certificate required under the Hazardous
Substances (Classes 1 to 5 Controls) Regulations 2001 as applicable.

(b) The Requiring Authority shall provide a copy of the annual hazardous substances test certificate within eight weeks of the renewal date.

(c) The Requiring Authority shall ensure that the activities conducted on the premises shall meet the international commission on non-ionising radiation protection guidelines.

(d) The Requiring Authority shall ensure that the conditions attached to the Otago Regional Council discharge permit – consent number 2005.470 are fully complied with.

(e) The Requiring Authority shall ensure that all activities conducted on the premises shall not exceed the following noise limits when measured at any point beyond the boundaries of the site:

- Day-time (0800 to 2200 hours) 50dBA L10
- Night-time (2200 to 0800 hours) 40dBA L10 and 70dBA Lmax

Noise limits shall be measured and accessed in accordance with NZS6801:1991 and NZS6802:1991, and shall take into account special audible characteristics.

C. 64 Designations #332– Lake Hayes Sewage Pump Station

1. That the facilities shall be constructed, operated and maintained generally in accordance with the specifications in the Notice of requirement.

2. The emergency generator shall be located in the vicinity of the borefield several hundred metres west of the pumping station itself.

3. The pumping station shall be constructed, operated and maintained so that no odour is discernable from a distance of three metres from any part of the facility.

4. Prior to the pumping station commencing normal operation a landscape plan to the satisfaction of the Principal Planner: Lakes Environmental shall be prepared. The plan shall provide for an appropriate colour for the emergency generator, and planting to make the generator and pumping station as unobtrusive as possible. The landscape plan shall be implemented within 12 months of the pumping station commencing normal operation.

C. 65 Designation #333 – Lake Hayes Sewage Pump Station

1. That the facilities shall be constructed, operated and maintained generally in accordance with the specifications in the Notice of requirement.

2. The emergency generator shall be located as close as practical to the other utility structures near the entrance to the reserve.

3. The pumping station shall be constructed, operated and maintained so that no odour is discernable from a distance of three metres from any part of the facility.

4. Prior to the pumping station commencing normal operation a landscape plan to the satisfaction of the Principal Planner: Lakes Environmental shall be prepared. The plan shall provide for an appropriate colour for the emergency generator, and planting to make the generator and pumping station as unobtrusive as possible. The landscape plan shall be implemented within 12 months of the pumping station commencing normal operation.

C. 66 Designation #334– Lake Hayes Sewage Pump Station

1. That the facilities shall be constructed, operated and maintained generally in accordance with the specifications in the Notice of requirement.
2. The exact location of the pumping station and emergency generator shall be determined in consultation with New Zealand Transport Agency network consultants.

3. The pumping station shall be constructed, operated and maintained so that no odour is discernable from a distance of three metres from any part of the facility.

4. Prior to the pumping station commencing normal operation a landscape plan to the satisfaction of the Principal Planner: Lakes Environmental and New Zealand Transport Agency network consultant shall be prepared. The plan shall provide for an appropriate colour for the emergency generator, and planting to make the generator as unobtrusive as possible. The landscape plan shall be implemented within 12 months of the pumping station commencing normal operation.

C. 67 Designation #335 – Lake Hayes Estate Sewage Pump Station

a) That the facilities shall be constructed, operated and maintained generally in accordance with the specifications in the Notice of requirement.

b) The pumping station shall be constructed, operated and maintained so that no odour is discernable from a distance of three metres from any part of the facility.

c) Prior to the pumping station commencing normal operation a landscape plan to the satisfaction of the Principal Planner: Lakes Environmental shall be prepared. The plan shall provide for an appropriate colour for the emergency generator, and planting to make the generator and pumping station as unobtrusive as possible. The landscape plan shall be implemented within 12 months of the pumping station commencing normal operation.

C. 68 Designations #336 – Wanaka Airport Wastewater Treatment and Disposal Purposes

Designation for Wastewater Treatment and Disposal Purposes

1. All fencing of the area within or bordering the Wastewater Treatment System (WTS) designation shall be in either:

   (a) Standard post and wire fencing (traditional livestock fencing to a maximum height of 1.2m); or

   (b) Security fencing (wire mesh fencing) to a maximum height of 2.5m. Mesh (wire) and poles on any security fencing shall be a black or dark green powder coated finish, or otherwise a dark colour submitted for approval by the Principal: Landscape Architecture, Queenstown Lakes District Council.

2. Consultation with the Airport Committee shall occur prior to any planned development within the WTS to ensure that any development does not adversely affect:

   (a) Planned future airport development; and

   (b) Safety requirements.

   (For the purpose of this condition, development shall include utilities).

3. All structure and car-parking areas shall be contained within the WTS site.

4. All of the site outside of the WTS shall be maintained in pastoral appearance by grazing and/or mowing.

5. All buildings shall be finished in one of the following Resene colours: 'Karaka', 'Lignite', 'Charcoal' or 'Iron sands'.

6. All plans of buildings and/or structures to be constructed within the WTS that are compliant with all applicable 'rules' as specified above shall be submitted for Council approval via Outline Plan Approval under s 176A.
7. That following the construction of the facility a bird monitoring program shall be developed and implemented and if birds do become attracted to the facility then all practicable steps shall be taken to eliminate them including the making of any modifications to the facility that may be seen as to be necessary to achieve such elimination.

**Designation for Wastewater Disposal Purposes**

1. No buildings or structures which are directly related to the WTS shall be constructed within the area designated for 'wastewater disposal purposes'.

2. Consultation with the Airport Committee shall occur prior to any planned development within the area designated for 'wastewater disposal purposes' to ensure that any development does not adversely affect:

   - Planned future development; and
   - Safety requirements regarding bird and glare hazards.

   (For the purpose of this condition, development shall include utilities).

3. Trenches created for the installation of infiltration pipes within the disposal field shall be exposed for no more than 5 working days prior to being backfilled to the original ground level.

4. All areas of exposed soil resulting from the installation of infiltration pipes within the disposal field shall be reinstated with pastoral grasses within the first planting season from completion of work.

**C. 69 Designation #337 – Electricity Substation Wanaka (RM100381)**

1. That the development must be carried out in accordance with the approved plans, drawn by the applicant, as follows:

   - Location Plan stamped as received on 4 June 2010 (stamped as approved on 18 August 2010) and the application as submitted, with the exception of the amendments required by the following conditions of consent.

   - Wall colours of any new building within the designated area shall be natural and recessive (reflectance value of less than 36%) in the natural range of browns, tussocks, greys or greens.

   - Activities shall be so conducted that the following noise limits are not exceeded at any point within the boundary of any other site in the adjoining Rural zone:

     - day time (0800 - 2200 hours) 50 dBA L_{10}
     - night time (2200 - 0800 hours) 40 dBA L_{10} and L_{max} 70dBA

     Noise levels shall be measured and assessed in accordance with NZS 6801:1991 and NZS 6802:1991 and shall take into account special audible characteristics.

2. The maximum height of any building or structure on the site shall be 6.75m.

3. All buildings and structures on the site shall be finished with colours in the natural range of browns, greens and greys with a reflectivity of less than 36%.

4. The outline development plan shall include a plan for the approval of Council prepared by a qualified arborist, for the maintenance of the existing hawthorn hedge along the road boundary at a height of about 4 metres. This plan is to indicate how the trees are to be maintained and/or progressively replaced to achieve the objective of a dense, continuous screen. The maintenance regime shall include a schedule for regular trimming.

5. The outline development plan shall include a landscape plan for the approval of Council. This plan shall fulfil the following objectives:

   - Provide vegetative screening along the frontage with SH 6 so as to obscure views of the activities on site from SH 6.
b. Provide vegetative screening along the western boundary with Dart Engineering so as to obscure views of the activities on site from the west.

5. The outline development plan shall include a lighting plan submitted for the approval of Council. This lighting plan shall ensure that all exterior lighting is mounted on buildings and that these mountings shall be below the level of the roof pitch and directed away from SH 6. No free standing light poles are permitted.

6. Any on site signage shall have a maximum area of 2m²; be located on site; not project over any road, service lane or footpath.

7. All engineering works shall be carried out in accordance with the Queenstown Lakes District Council's policies and standards, being New Zealand Standard 4404:2004 with the amendments to that standard adopted on 5 October 2005, except where specified otherwise.

8. Prior to the commencement of any works on the land designated the consent holder shall provide to the Queenstown Lakes District Council for review and approval, copies of specifications, calculations and design plans as are considered by Council to be both necessary and adequate, in accordance with Condition (7), to detail the following engineering works required:

   a. The provision of a comprehensive stormwater disposal system that is to provide stormwater disposal from all impervious areas within the site. The proposed stormwater system shall be designed by a suitably qualified professional as defined in Section 1.4 of NZS4404:2004 and be subject to the review of Council prior to implementation. The proposed stormwater system shall dispose of stormwater within the site boundary and not result in increased flows off site. The proposed stormwater disposal system shall take into consideration up-stream flows into the site and seek to address known flooding issues associated with existing structures and earthworks.

   b. The provision of a sealed vehicle crossing to the site from State Highway 6 approved by Transit New Zealand. Construction of this crossing shall include the removal of a second illegal crossing located to the east.

9. Any outdoor storage of goods will be screened from views from public places.

C. 71 Designation #373, #374 and #375 – Forestry Purposes (RM100722)

(i) The purpose of the designation is to enable the Queenstown Lakes District Council (“the Council”) to carry out forestry operations within the designated forestry reserves. “Forestry operations” means the use of the land primarily for the purpose of planting, tending, managing and harvesting of trees for timber or wood production.

(ii) All forestry operations will be carried out using best management practices under the New Zealand Environmental Code of Practice for Plantation Forestry, Second Edition, May 2008; together with any subsequent updates or editions. (http://www.fitec.org.nz/Resources/NZ-Environmental-Code-of-Practice-for-Plantation-Forestry/)

(iii) All forestry operations must comply with the management policies and programmes set out in the following current plans:
   • Ben Lomond and Queenstown Hill Reserve Management Plan adopted 3 August 2005;
   • Ben Lomond and Queenstown Hill Forestry Plan adopted March 2006; and
   • Coronet Forest Management Plan dated 26 July 2001; or any updated versions of these plans adopted by the Queenstown Lakes District Council in accordance with condition (iv) below.

(iv) The current Ben Lomond and Queenstown Hill Forestry Plan and the Coronet Forest Management Plan (“the Forest Plans”) shall be reviewed and updated by 31 December 2012, and thereafter every 5 years, and shall address the following matters:

   (a) Policies and, where applicable, proposed programmes in relation to the re-establishment and/or re-vegetation of production forest, together with areas to be retired from production forestry
following harvesting operations. The re-establishment and/or re-vegetation plans shall include the following (as applicable):

- Details of any production forest re-establishment programmes; including plant schedules, density of planting and grades of plants by botanical name.
- Areas of land to be retired from production forest following harvesting operations, together with the proposed future re-vegetation (including plant schedules and botanical names) and maintenance programmes.
- Details of all indigenous species planting programmes, where applicable. Indigenous species should be planted, inter alia, to establish permanent non-linear forest and shrub land margins of no less than 20m in width to integrate production forest into the outstanding natural landscape, and to limit wilding spread. The botanical names of species, location and extent of planting to achieve landscape integration (where required), together with proposed maintenance programmes, should be included.
- Proposed control of any wilding regeneration following harvesting operations, both within re-established or re-vegetated areas and in proximity to remnant stands of existing indigenous Beech forest. The Forestry Plans shall provide that any wilding generation is to be eradicated within two years of harvesting.
- The Forestry Plans shall provide that re-establishment or re-vegetation of harvested areas will occur as soon as practicable and no later than two years after the completion of harvesting operations.

(b) Areas where additional indigenous Beech species are to be planted (adjacent to Beech remnants) with priority in those areas that will link Beech remnants. Planting programmes for the establishment of indigenous Beech species shall run concurrently with harvesting programmes.

(c) Details of indigenous eco-systems to be protected and extended within the Ben Lomond reserve, including One Mile Creek.

(d) Policies in relation to the impact and requirements of the New Zealand Emissions Trading Scheme and subsequent implications for the longer term management of the production and non-production forests.

All updates of the Forestry Plans shall be subject to consultation with the community using the Special Consultative Procedure set out in section 83 of the Local Government Act 2002 before adoption by the Council.

(v) No forestry harvesting operations will be undertaken within 30m of the Skyline or Ziptrek leased areas unless the prior consent of the affected leaseholder(s) has been obtained.

*Note: As lease operations expand or reduce, the 30 metre buffer zone will be adjusted accordingly to include/exclude the lease area from harvesting operations

(vi) The Requiring Authority shall consult with the following parties that may be potentially adversely affected by harvesting operations. These parties must be consulted at least one month prior to an Outline Plan being submitted in relation to the particular forest:

**Ben Lomond Forest**

- Department of Conservation;
- Skyline Enterprises Limited*;
- Queenstown Mountain Bike Club;
- Wakatipu Trails Trust;
- ZJV (NZ) Limited (Ziptrek)*;
- Ministry of Education;*
- Queenstown Primary School Board of Trustees;*
- Wakatipu High School Board of Trustees;*
- Vertigo Bikes;
- Kiwi Birdlife Park Limited*; and
- Any other lease holders within the designated area.
*Note: Consultation with those parties identified by * above shall be submitted to the consenting authority as part of any Outline Plan approval.

**Queenstown Hill Forest**
- Department of Conservation; and
- Any other lease holders within the designated area.

**Coronet Forest**
- Department of Conservation;
- Millbrook Country Club Limited;
- Arrowtown Village Association; and
- Any other lease holders within the designated area.

(vii) An Outline Plan is required for the harvesting of trees for timber or wood production prior to any harvesting taking place. The Outline Plan shall be prepared in accordance with the requirements of the New Zealand Environmental Code of Practice for Plantation Forestry (as defined in condition (ii) above) and shall address the following matters:

(viii) A site plan shall be prepared, defining:
- site and boundaries of the forestry designation;
- location and extent of existing beech remnants or other indigenous forest;
- location and extent of heritage or cultural sites to be protected;
- land contours and features;
- the location and extent of proposed harvesting and associated works, including proposed structures;
- the staging and stage boundaries of proposed harvesting;
- extent of replanting for production forest, for permanent forest margin ‘buffer’ planting, and all areas of indigenous planting;
- areas of marginal forestry to be retired;

(ix) The extent and location of existing and new tracking works required for the duration of the works shall be outlined;

(x) A re-establishment and/or re-vegetation programme for the harvested area in accordance with the relevant Forestry Plan shall be included. The programme should contain details of the matters set out in condition (iv) above where applicable (by reference to the relevant Forestry Plan) and shall comply with all of the requirements set out in that condition.

(xi) Forestry operations shall be undertaken in accordance with the Harvesting Hazard Management document (attached as Appendix 1 to these conditions). An assessment of natural hazards within the harvesting area shall be undertaken to identify the effects of natural hazards on and off site and the Outline Plan shall provide details of the following matters:
- Mitigation on-site and off-site of the natural hazards identified;
- Contingency plans to reduce adverse effects of hazards should the proposed mitigation not be effective;
- Long term management of slope stability, where appropriate.

(xii) The Outline Plan shall have regard to the relevant objectives and policies of the Queenstown Lakes District Council District Plan.

(xiii) Any structures necessary for forestry operations shall be located so as not to break the line or form of any ridges, hills or prominent slopes. Structures shall be located so as to be reasonably difficult to see from surrounding public locations and shall be coloured in dark recessive colours, within the tones of grey, green or brown with a light reflectivity value less than 36%, and shall appear recessive within the landscape. All structures and traces of their presence shall be removed on completion of silvicultural operations or harvesting as applicable.

(xiv) Harvesting should occur only along natural boundaries (such as the edges of stream beds or stands of indigenous vegetation), and should endeavour to avoid the creation of arbitrary lines in the landscape which do not harmonise with underlying features or topography. Harvesting in geometric blocks should be avoided where possible.
(xv) The method of harvesting should minimise any adverse effects on visual amenity and soil disturbance. To avoid adverse effects of any temporary or permanent roads or other earthworks on the landscape, helicopters should be used for harvesting operations where practicable. Otherwise earthworks should be undertaken in a way that minimises cut and fill. Batters must be rehabilitated as soon as possible and no less than 6 months following harvesting operations. All earthworks are to be restored to original ground level as soon as harvesting has been completed and re-vegetated immediately.

C. 72 Designation #376 – Wanaka Sports and Events Facility (RM120359)

Permitted Activities
This designation is to enable the establishment, operation and maintenance of an integrated indoor and outdoor sports and events facility. The nature of the activities covered by this designation includes:

- A multipurpose sports and event facility building(s), providing for:
  - An aquatic centre, fitness centre and indoor sports facilities catering for a variety of sports and recreation activities.
  - Special events, exhibitions, trade and home shows, markets, conferences, concerts, meetings and other community related activities.
  - Ancillary commercial, health, educational, day care and commercial recreation activities.

- Associated change rooms, toilets, administrative offices, meeting spaces, signage (including illuminated, variable message and banners), ground maintenance/utilities, recreation facilities, buildings and storage, fuel storage and equipment for heating, operation and maintenance of the pool.

- Café, catering and food preparation areas, entertainment areas, membership lounges, the sale and consumption of liquor.

- Outdoor court areas, sports fields and artificial turf field(s), including associated sports field lighting, practice facilities, temporary outside seating, toilets, embankments and marquees to cater for a range of sports, recreation activities and events.

- Vehicle parking, vehicle access, manoeuvre areas and vehicle pick up and drop off areas.

- Landscaping and earthworks.

The activities described above are intended to establish the scope of activities that fall with the purpose of the designation. They do not form the basis for exempting activities or works from the requirements relating to Outline Plans under Section 176A of the Resource Management Act.

The conditions that apply to these activities are:

Building Controls

1. All buildings shall be setback a minimum distance from road and internal boundaries by:

- Buildings less than 12 m in height – 5 metres;
- Buildings greater than or equal to 12 m in height – 10 metres.

Except for:

(i) Buildings necessary for the storage of equipment used for the maintenance of reserves which may be sited as a residential accessory building;

(ii) Lighting towers; and

(iii) Wire netting fences and practice nets up to a maximum height of 3.5 m.
No internal boundary setback applies adjoining the commercial core sub-zone of the Three Parks Zone.

2. The maximum height of buildings shall be 15 metres, except for flood lighting that shall not exceed 21 metres in height.

Noise

3. Outdoor sporting events, excluding practice and training, shall take place between the hours of 8:00am and 8:00pm.

4. The design and construction of any buildings and mechanical plant shall ensure that the overall noise level from all sources on site does not exceed 40 dB (L_{Aeq}) at the boundary of any residential property, nor 50 dB (L_{Aeq}) at the boundary of any commercial property.

Prior to construction of any building, a report from a suitably qualified acoustic consultant shall be submitted to Council demonstrating the design noise level for internal events, and confirming that the proposed construction will comply with these limits.

5. Any event conducted outside involving amplified sound shall:

   a. For any temporary activities, including carnivals, fairs, galas, markets, meetings, exhibitions, parades, rallies, filming, cultural events, and theatrical festivals and entertainment, shall be limited to:

      • The hours 8:00am to 8:00pm.

   b. For any activity involving a total power of all amplification greater than 500 Watts RMS and exceeding 2 hours in duration, shall be deemed a ‘Major Event’, and shall be limited to:

      • Operation of amplification equipment between the hours of 10:00am and 10:30pm;

      • A total sound duration no longer than four hours (including sound checks); and

      • A frequency of no more than 10 events per year.

At least 30 days before each major event, notice shall be given in appropriate media advising the community and residents within 500 metres of the site of the forthcoming Major Event, the times of operation, and the nature of the event.

6. Vehicle access onto the adjoining road network and car parking areas shall be located no less than 20 metres from adjoining land located within a low density or medium density residential sub-zone of the Three Parks Zone, except where that land may be designated by the Council for reserve or other recreation purposes.

Lighting

7. All artificial lighting shall comply with the following controls:

   a. Floodlighting on sports fields shall be turned off no later than 10:00pm, except as required in association with any Major Event conducted in accordance with Condition 5(b).

   b. No artificial lighting causing added illuminance shall result in excess of 60 lux measured horizontally or vertically at any point on or directly above the boundary of any adjoining land which is located within a low or medium density residential sub-zone between the hours of 7:00am to 10:00pm.

   c. No artificial lighting so as to cause an added illuminance shall result in excess of 3 lux, measured horizontally or vertically at any point on or directly above any adjoining boundary on land which is located within a low or medium density residential sub-zone between the hours of 10:00pm on one day and 7:00am on the next day.
(d) No artificial lighting so as to cause any added illuminance shall result in excess of 50 lux measured horizontally or vertically at any point on or directly above a street kerb line or the edge of the roadway where the kerb has been moved to create a vehicle parking area or bus or taxi stopping bay between dusk and dawn.

(e) Any exterior lighting that adjoins road or land located within a low or medium density residential sub-zone shall be so selected, located aimed, adjusted and screened as to ensure that glare resulting from the lighting does not cause an unreasonable and appreciable level of discomfort to any persons.

The standards of Tables 2.1 and 2.2 of Australian Standards AS4282 – 1997 (Control of Obtrusive Effect of Outdoor Lighting) shall be used to determine glare and discomfort.

(f) There shall be zero upward light spill from any luminaire mounted above ground.

Outline Plans

8. Prior to the commencement of any development, the requiring authority responsible for the designation shall submit Outline Plans as required by section 176A of the Resource Management Act 1991 to the territorial authority for consideration.

9. Any Outline Plan submitted pursuant to Section 176A of the Act relating to the first stage of works including the establishment of outside sports fields and the main indoor sports buildings shall incorporate a landscape ‘structure’ plan for the whole site. The landscape structure plan shall incorporate:
   - Development of the open space network and tree structure for the whole site so the site possesses a degree of maturity in line with the eventual full development of the site facilities; and
   - Measures to address the visual effects associated with the bulk and scale of the proposed sports facility building including reducing the visual bulk of the building while also anticipating the potential expansion of the building.

10. Any Outline Plan submitted pursuant to Section 176A of the Act shall incorporate sufficient information, reports and plans, including projected traffic generation assessments, as are relevant to the nature of the work covered by the Outline Plan to fulfil the following objectives:
   (a) Landscape mitigation of the visual effects of car parking areas, flood light towers, utility areas, buildings and other forms of built development when viewed from outside the site.
   (b) Integration of site design with the surrounding urban area, to the extent that urban area has been developed or approved for development by way of any resource consents, taking into account:
      (i) The location of vehicle access(es) onto the surrounding road network;
      (ii) Cycle, pedestrian and open space networks; and
      (iii) Streetscape in terms of soft landscape treatment (including trees and shrubs), hard landscape treatment (including paving and kerbs), the path and vehicle movement network.
   (c) Consideration of any comments from a review of any plans for building or landscape development by the Wanaka Urban Design Panel.
   (d) The demand for and provision of adequate on-site car parking, taking into account where relevant the outcome of any monitoring of parking demand, in accordance with objective f. below.
   (e) Identification of areas to accommodate:
      (i) Parking associated with future development stages of the facility;
(ii) Temporary or overflow parking within the site associated with any major events; and

(iii) Any off-site/on-street parking that might be required during peak demand periods.

(f) An investigation into the operation of the parking area(s) developed under preceding stages, including:

(i) The identification of any shortfall or over provision of parking spaces (including bicycle parking);

(ii) An assessment of the proportion of non-vehicle based trips to the site; and

(iii) The availability of public transport for accessing the site.

(g) Consideration of the projected traffic generation to ensure the design and location of the onsite street layout, circulation areas, and intersections (including ingress and egress to the site) are appropriate.

Engineering

11. All engineering works, including intersection design, vehicle manoeuvring, car parking areas, loading areas, and the formation of the access road and internal roading, shall be carried out in accordance with the Queenstown Lakes District Council’s policies and standards that are applicable at the time of any Outline Plan submitted pursuant to Section 176A of the Act.

12. Any Outline Plan application submitted pursuant to Section 176A for any buildings or works resulting in construction related effects shall incorporate a construction management plan to address the following matters:

• Control of dust;

• Silt and sediment control;

• Earthworks debris deposited on streets;

• Construction noise;

• Traffic management; and

• Hours of construction.

This condition is not intended to apply to minor works such as the construction of small scale buildings, signs, lighting towers, fences or internal building alterations that do not give rise to any significant earthworks, noise, construction or traffic effects.

13. Any Outline Plan submitted pursuant to Section 176A of the Act relating to the first stage of works including the establishment of outside sports fields and the main indoor sports buildings shall include a geotechnical report and excavation methodology prepared by a suitably qualified professional in relation to the whole site. The report shall combine all relevant geotechnical information in both a factual and interpretive manner, provide justifiable statements about all pertinent geotechnical aspects, and recommend suitable construction methodologies. The submission of a geotechnical report is not required upon submission of subsequent Outline Plans.

C. 73 Designation #377 – Education Purposes (RM130104)

Volunteered Conditions

1. The designation shall lapse on the expiry of 10 years from the date on which it is included in the District Plan if it has not been given effect to before the end of that period.

2. The minimum setback of buildings from road boundaries shall be 3m.

3. Solid fences within the minimum road setback should be no higher than 1.2m in height.
4. The minimum setback of buildings from internal boundaries to Activity Area 2b shall be 10m and from all other internal boundaries, 5m.

5. The maximum height of all buildings above ground level shall not exceed 12m.

6. The maximum building coverage within the NOR area shall not exceed 30%.

7. Airport Noise - Queenstown Airport

(a) On any site located within the zone, any building or part of a building used for an Activity Sensitive to Aircraft Noise shall be insulated from aircraft noise so as to meet an indoor design level of 40 dBA Ldn, except for non-critical listening environments where no special sound insulation is required. This control shall be met in either of the following two ways:

EITHER:
(i) By providing a certificate from a recognised acoustic engineer stating that the proposed construction will achieve the indoor design noise level.

OR:
(ii) The building shall be constructed and finished in accordance with the provisions of Table 4 in rule 12.25.9.2 of the district plan.

8. Activity Noise

(a) Sound from activities in the NOR area measured in accordance with NZS 6801 :2008 and assessed in accordance with NZS 6802:2008 shall not exceed the following noise limits at any point within any other site in the Shotover Country Special Zone:

1. daytime (0800 to 2200 hrs) 60 dB LAeq (15 min)
2. night-time (2200 to 0800 hrs) 50 dB LAeq (15 min)
3. night-time (2200 to 0800 hrs) 70 dB LAFmax

(b) Sound from activities which is received in another zone shall comply with the noise limits set in the zone standards of the district plan for that zone.

(c) The noise limits in (a) and (b) shall not apply to construction sound which shall be assessed in accordance with NZS 6803:1999.

(d) The noise limits in (a) and (b) shall not apply to sound from sources outside the scope of NZS 6802:2008. Sound from these sources shall be assessed in accordance with the relevant New Zealand Standard, either NZS 6805:1992, NZS 6807:1994 or NZS 6808:1998.

9. The minimum parking to be provided within the NOR area:

(a) for any school facility shall be 1 parking space per 10 students over 15 years of age plus 1 parking space per 2 staff; and

(b) for any pre-school facility shall be 1 per 10 children.

10. In providing the above required car parking, consideration should be given to integrating car parks and access for school and pre-school facilities. Design of the car park and number of car parking spaces to be provided should ensure that the majority of student and children drop off and pick up can take place within the site.

11. The Requiring Authority, either directly or through the School Board of Trustees, shall develop, maintain and implement a Travel Plan which provides specifically for measures to reduce vehicle dependence, including measures for walking school buses, cycling, car pooling and public transport, provisions of some onsite parking for school and other public events, and provision of a bus drop-off and collection area. The Travel Plan shall be maintained and regularly updated while the school is operating under this designation.

12. No goods, materials or equipment shall be stored outside a building, except for vehicles associated with the activity parked on the site overnight and the storage of outdoor items ancillary to activities located on the site.
13. All fixed exterior lighting shall be capped and directed downwards to avoid direct light above a plane horizontal with the bottom of the light bulb.

14. The colour of any roof on any building shall be within the range of browns, greens, greys and blue greys.

15. Where vegetation clearance associated with earthworks results in areas of exposed soil, these areas should be revegetated within 12 months following the completion of the operations. If the area of exposed soil forms part of building platform or intended hard surfaces, the base course shall be laid within 12 months following the completion of the operation.

16. Any person carrying out earthworks shall:
   (i) Implement erosion and sediment control measures to avoid soil erosion or any sediment entering any water body. Refer to the Queenstown Lakes District earthworks guideline to assist in the achievement of this condition.
   (ii) Ensure that any material associated with the earthworks activity is not positioned within the site where it may dam or divert or contaminate water.
   (iii) Implement appropriate dust control measures to avoid nuisance effects of dust beyond the boundary of the site. Refer to the Queenstown Lakes District earthworks guideline to assist in the achievement of this condition.

17. Planting of the following species of vegetation shall be prohibited activities:
   (i) Pinus radiata
   (ii) Pinus muricata
   (iii) Pinus contorta
   (iv) Pinus ponderosa
   (v) Pinus sylvestris
   (vi) Pinus nigra
   (vii) Douglas Fir
   (viii) All Eucalyptus varieties

18. A report shall be provided with the first Outline Plan from a suitably qualified designer demonstrating the following:
   (a) How the layout and design of the education facility will promote a positive relationship to the adjoining street network in terms of:
      (i) Pedestrian connectivity and desire lines
      (ii) Building location and arrangement
      (iii) Locations and design of playing fields
   (b) How vehicle circulation, demands for onsite parking and vehicle crossings have been integrated into a street design surrounding the facility that continues to encourage pedestrian and cycle movements to the site.
   (c) How the consideration of a potential location for a public bus stop could be integrated into the site design to provide a logical connection for pedestrians to the site.
   (d) How cycle parking has been given priority in terms of location to ensure it is conveniently located and is also well designed to encourage cycle use.
   (e) How the arrangement of buildings and playing fields will maximise solar orientation and have been designed in accordance with the principles of Crime Prevention Through Environmental Design (CPTED) including mutual passive surveillance between adjoining dwellings, buildings, street/public space.

19. Prior to the opening of the school the Requiring Authority shall ensure that the roading link (known as the lake Hayes link Road) to lake Hayes Estate is operational.

Additional Conditions Recommended
20. With the Outline Plan of Works the Requiring Authority shall submit to Council copies of specifications, calculations and design plans to detail the following:

(a) The general site layout;

(b) Vehicle crossing access points and proposed kerbside parking controls to promote parents to drive into the site rather than drop off and collect kerbside;

(c) Sufficient queuing space within the site to avoid disruption to vehicle movements on adjoining streets; and

(d) Covered on-site cycle parking at a minimum rate of one cycle park per 10 primary school students.

21. All design for vehicle access, manoeuvring and parking areas associated with the facility shall be subject to a safety audit in accordance with the NZTA Manual TFM9 "Road Safety Audit Procedures for Projects" at the Requiring Authority's cost and the results shall be submitted to the Council. Any recommendation contained within the audit with respect to access design and agreed by Council as the Territorial Authority as necessary shall be completed prior to operation of the facility.

22. At the time of outline plan, details of external appearance including signage shall be submitted to Council.

C. 75 Designation #570 – Electricity Substation (RM120701)

1. The proposed designation is confirmed in accordance with the plan titled Aurora 33kV Substation – Queenstown: Site Survey and Mapping stamped as approved on 8 May 2012.

2. The maximum height of any building or structure as the site shall be 8m as determined in accordance with Rule 7.5.6.3 iii.

3. All buildings and structures on the site shall be finished with colours in the natural range of browns, greens and greys with a reflectivity of less than 36%.

4. The Outline Plan shall include a plan for the consideration by Council prepared by a qualified arborist for the maintenance of the existing vegetation on the site in accordance with the regime that mitigates any adverse effects on the adjoining properties.

5. The Outline Plan shall include a lighting plan submitted for consideration by Council. This lighting plan shall ensure that all exterior light is mounted on buildings and directed away from adjoining properties. No freestanding light poles are permitted.

6. Any on-site signage shall have a maximum area of 2m².

7. Any outdoor storage of materials shall be screened from view from the adjoining properties.

C. 78 Designation #571 – Electricity Switching/Substation (RM120328)

1. Prior to the construction of, or external alterations to, the switching/substation, the Requiring Authority responsible for the designation shall submit outline plans as required by section 176A of the Resource Management Act 1991, to the territorial authority for consideration.

2. The maximum height for buildings shall be 7 metres set from a ground level determined as 315.38 masl.

3. The maximum height for structures shall be 9 metres set from a ground level determined as 315.38 masl.

4. The minimum setback distance from road boundaries for any building (except fences and structures) shall be 4.5 metres.

5. The minimum setback from internal boundaries for any building (except fences and structures) shall be 2 metres.
6. Signage shall be limited to one 2 m² sign along the road frontage.

7. All fixed exterior lighting shall be mounted on buildings. The mountings shall be below the level of the roof pitch and directed away from the adjacent sites and roads.

8. The Requiring Authority shall offer to provide to the Council a sufficient number of grade PB3 or PB5 plants for the purposes of establishing a line of screening vegetation on the south western terrace adjacent to the designated land with plants to be established at 1.5 metre spacing in one row of not more than 100 lineal metres (maximum 68 plant specimens). The offer shall contain a list of available plant species from a local plant nursery that are capable of attaining a height of not less than 3 metres at maturity. The offer shall be made as soon as the designation is confirmed and shall remain open for acceptance for 12 months after the commencement of work on site pursuant to any Outline Plan. If the Council communicates their acceptance of the offer to the Requiring Authority then the Council shall specify the plant species to be provided from the list and those specimens shall be delivered at the Requiring Authority's cost before the end of the current or next planting season (whichever is the sooner). For the avoidance of doubt, the Requiring Authority shall have no responsibility to plant, maintain, or replace the plant specimens provided.

9. A landscape plan shall be submitted as part of an outline plan of works. In this instance the landscape plan shall demonstrate the following:
   - A boundary hedge or shelterbelt along the Ballantyne and Riverbank Road frontages and no less than 2 metres in width. The hedge or shelterbelt shall be maintained at a height no greater than 3 metres and no less than 2 metres as measured from the roadside of the designation boundary. Species shall be in keeping with the rural landscape such as non-wilding conifers, poplars, alders, or indigenous species and shall be planted at a density to provide a fast establishing and effective dense screen to a height of 3 metres within 5 years.

10. Planting shown on the approved landscape plan shall be implemented within 8 months upon completion of construction and thereafter be maintained and irrigated in accordance with the plan. If any tree or plant shall die or become diseased it shall be replaced in the next available planting season.

11. Colours for all structures and buildings shall be in the range of natural browns, greys or greens as per the surrounding landscape with a light reflectivity value of between 5 and 25%.

12. Noise:
   (a) Sound shall be measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 and shall not exceed the following noise limits at any point within the boundary of any other site in the adjoining Rural General and Rural Lifestyle Zones:
      (i) daytime (0800 to 2000 hrs) 50 dB LAeq(15 min)
      (ii) night-time (2000 to 0800 hrs) 40 dB LAeq(15 min)
      (iii) night-time (2000 to 0800 hrs) 70 dB LAFmax
   (b) The noise limits in (a) shall not apply to construction sound which shall be assessed in accordance and comply with NZS 6803:1999.

13. All engineering works shall be carried out in accordance with the Queenstown Lakes District Council’s current (as at the date of submitting the outline plan of works) policies and engineering standards.

14. With any outline plan of works, the Requiring Authority shall submit to the Principal Engineer at Council for review and certification, copies of specifications, calculations and design plans to detail the following engineering works:
   (a) Formed legal access shall be provided to the site in accordance with Council standards, with no vehicular access permitted within 30 metres of the intersection of Ballantyne and Riverbank Roads. The existing informal crossing located at the intersection of Ballantyne
DESIGNATIONS

and Riverbank Roads shall be permanently and physically closed off to vehicular traffic.

(b) All earthworks, batter slopes, and retaining shall be undertaken in accordance with the recommendations of the report by Tonkin & Taylor Ltd (dated October 2012, T & T ref: 892698).

(c) Foundations for all structures within the site shall be designed by a Chartered Professional Engineer in accordance with the recommendations of the report by Tomkin & Taylor Ltd (dated October 2012. T&T ref: 892698).

C. 81 Designation #584 – Relocation of Wakatipu High School (RM130877)

Designation lapse period

1. The designation shall lapse on the expiry of 10 years from the date on which it is included on the District Plan if it has not been given effect to before the end of that period.

Standards

2. The maximum height of buildings shall not exceed 12m above ground level.

3. No part of any building shall protrude through a height of RL353M under the surface of a 1:20 upslope fan with a 10% divergence angle originating from the 14/32 southern runway threshold or transitional side surface plane of 1:5, as shown on the District Plan Map Remarkables Park Zone – Figure 3: Height Restrictions Plan of the District Plan. Building height shall be measured with respect to discrete building components.

4. Airport Noise - Queenstown Airport

Educational facilities occurring within the green area shown on the Airport Measures and Land Use Control map attached shall comply with the following standards:

(a) No classrooms, halls or any other buildings which are used as internal teaching areas shall be located within that area.

(b) Outdoor areas shall not be regularly used for high quality listening or communication, such as occurs in academic teaching. This condition shall not preclude recreation and recreation related activities (ie: Sports coaching).

5. All buildings (except Non Critical Listening Environments) shown within the green area on the Airport Measures and Land Use Control Map attached shall be designed to achieve an Indoor Design Sound Level of 40dB Ldn, based on the 2037 Noise Contours (as shown in the 2037 Noise Contour Plan attached following these conditions) and if that indoor Design Sound Level cannot be met with windows open, then those buildings shall be fitted with mechanical ventilation that meets the following requirements:

<table>
<thead>
<tr>
<th>Room Type</th>
<th>Outdoor Air Ventilation Rate (Air Changes per Hour, ac/hr)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Low Setting *</td>
</tr>
<tr>
<td>Bedrooms</td>
<td>1-2 ac/hr</td>
</tr>
<tr>
<td>Other critical listening environments</td>
<td>1-2 ac/hr</td>
</tr>
</tbody>
</table>

Noise from ventilation systems shall not exceed 35 dB LAn(1 min), on High Setting and 30 dB LAn(1 min), on Low Setting. Noise levels shall be measured at a distance of 1 m to 2 m from any diffuser.

Each system must be able to be individually switched on and off and when on, be controlled across the range of ventilation rates by the occupant with a minimum of 3 stages.

Each system providing the low setting flow rates is to be provided with a heating system which, at any time required by the occupant, is able to provide the incoming air with an 18 deg C heat rise when the airflow is set to the low setting. Each heating system is to have a minimum of 3 equal heating stages.
If air conditioning is provided to any space then the high setting ventilation requirement for that space is not required.

6. Activity Noise

a. Sound from activities in the NOR area measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 shall not exceed the following noise limits at any point within any other site within Activity Areas 2a, 3, 4, 5, 7 and 8 of Remarkables Park Special Zone:

(i) daytime (0700 to 2200 hrs) 60 dBA L10
(ii) night-time (2200 to 0700 hrs) 50 dBA L10
(iii) night-time (2200 to 0700 hrs) 70 dBA LAFmax

b. Sound from activities which is received in another zone shall not exceed the above noise levels at any point within the site.

c. Construction noise shall comply with and be measured and assessed in accordance with the relevant New Zealand Standard.

d. The noise limits in (a) and (b) shall not apply to sound from sources outside the scope of NZS 6802:2008. Sound from these sources shall be assessed in accordance with the relevant New Zealand Standard, either NZS 6805:1992, NZS 6807:1994 or NZS 6808:1998.

e. Prior to commencement of construction the consent holder shall submit an acoustic design certificate prepared by a suitably qualified and experienced acoustic engineer. The certificate must demonstrate that plant and other mechanical equipment has been selected and will be installed to ensure noise limits proposed are not exceeded.

f. The consent holder shall ensure that the operation and management of the premises is carried out in accordance with an approved Noise Management Plan. At least one month prior to the facility becoming operational the applicant must submit a noise management plan outlining how the proposed noise levels will be met. Once approved, this will become the approved noise management plan.

Parking and Transport

7. The minimum on-site car parking provision to be provided within the NOR area shall be as follows or a lower number based on the outcomes of the demand for car parking based on the Travel Plan (as per condition 9):

a) For any school facility shall be 1 parking space per 10 students over 15 years of age plus 1 parking space per 2 staff; and

b) For any pre-school facility shall be 1 per 10 children.

c) Parking provision for people with disabilities in accordance with Rule 14.2.4.1 (vi) of the District Plan;

d) Car park dimensions in accordance with AS/NZ 2890.1:2004;

8. In providing the car parking, consideration should be given to integrating car parks and access to school facilities. Design of the car park and number of car parking spaces to be provided should ensure that the majority of student pickups and set-downs, including those required by school buses, can take place within the site.

9. The Requiring Authority, either directly or through the School Board of Trustees, shall develop, maintain and implement a Travel Plan which provides specifically for measures to reduce vehicle dependence, including measures to better facilitate walking, cycling, carpooling and public transport. The Travel Plan shall be maintained and regularly updated while the school is operating under this designation.

Other Requirements

10. No goods, materials or equipment shall be stored outside a building, except for vehicles associated with the activity parked on the site.
overnight and the storage of outdoor items ancillary to activities located on the site.

11. No open solid fuel fires shall be operated on the site.

12. All fixed exterior lighting shall be directed away from adjacent sites and roads. No activity on the site shall result in greater than a 3.0 lux spill (horizontal and vertical) of light onto any other site measured at any point inside the boundary of the site, provided that this condition shall not apply when it can be demonstrated that the design of adjacent buildings adequately mitigates such effects.

13. The colour of any roof on any building shall be within the range of browns, greens, greys and blue-greys.

**Earthworks**

14. Where vegetation clearance associated with earthworks results in areas of exposed soil, these areas are to be re-vegetated within 12 months following completion of the operations. If the area of exposed soil forms part of a building platform or other intended hard surface, the base course shall be laid within 12 months following completion of the operation.

15. Any person carrying out earthworks shall:
   a. Implement erosion and sediment control measures to avoid soil erosion or any sediment entering any water body. Reference should be made to the Queenstown Lakes District Earthworks Guideline to assist in achieving this.
   b. Ensure that any material associated with the earthworks activity is not positioned within the site where it may dam or divert or contaminate water.
   c. Implement appropriate dust control measures to avoid nuisance effects of dust beyond the boundary of the site. Reference should be made to the Queenstown Lakes District Earthworks Guideline to assist in the achievement of this condition.

16. Planting of the following species of vegetation shall be prohibited:
   a. Pinus radiata;
   b. Pinus muricata;
   c. Pinus contorta;
   d. Pinus ponderosa;
   e. Pinus sylvestris;
   f. Pinus nigra;
   g. Douglas Fir;
   h. All Eucalyptus varieties.

**Outline Plan**

17. A report shall be provided with the first Outline Plan, from a suitably qualified urban designer demonstrating the following:
   a. How the layout and design of the education facility will promote a positive relationship to the adjoining street network and neighbourhood, in terms of:
      i. Pedestrian connectivity and desire lines
      ii. Building location and arrangement
      iii. Location and design of playing fields
   b. How vehicle circulation, demands for on-site parking and vehicle crossings have been integrated into a street design surrounding the facility that continues to encourage pedestrian and cycle movements to the site.
   c. How a public bus stop can be integrated into the site design to provide a logical connection for pedestrians to the site.
   d. How cycle parking has been given priority in terms of location to ensure it is conveniently located and is also well designed to encourage cycle use.
18. With the Outline Plan of Works, the Requiring Authority shall submit to the Council copies of specifications, calculations and design plans to detail the following:

   a. The general site layout including the location of the site works relative to the Outer Control Boundary;

   b. Vehicle crossing access points and proposed kerbside parking controls to promote those transporting students to and from the site driving into the site, rather than dropping off students to and picking them up from the roadside;

   c. On-site car and cycle parking at a rate considered appropriate in the School Travel Plan;

   d. Building elevations demonstrating compliance with height restrictions as shown in the Remarkables Park Zone Figure 3 – Height Restrictions District Planning map and the Airport Approach and Land Use Controls specified in Designation 3.

   e. Landscape plans.

   f. Sufficient queuing space within the site to minimise any potential disruption to vehicle movements;

   g. On-site cycle parking shall be provided consistent with the defined cycle targets identified within the Travel Plan;

   h. A school bus drop-off and collection facility design by a suitably qualified traffic engineer and sufficiently sized to allow for expected levels of demand as outlined within the Travel Plan;

   i. A passenger vehicle drop-off and collection facility design by a suitably qualified traffic engineer and sufficiently sized to allow for expected levels of demand as outlined within the Travel Plan. The early childhood centre passenger vehicle drop off and collection facility shall be separated to avoid undue conflict.

19. All internal vehicle drop-off and parking areas with the facility shall be subject to a post construction safety audit by a suitably qualified traffic engineer. Any recommendations contained within the audit shall be completed prior to operation of the facility.

20. All vehicle and cycle access points to the facility shall be subject to a post construction safety audit in accordance with the NZTA Manual TFM9 “Road Safety Audit Procedures For Projects” at the Requiring Authority’s cost and the results shall be submitted to Council’s Chief Executive Officer or their delegate. Any recommendations contained within the audit and agreed by Council as the Territorial Authority as necessary shall be completed prior to operation of the facility.

21. At the time of Outline Plan, details of external appearance including signage shall be submitted to the Council.

**Additional conditions Proposed by Council**

22. The cycle parking referred to in condition 18(g) above shall be covered.

**C. 82 Designation #585 – Recreation Reserve (Arrowtown Sports and Recreation Centre)**

1. The development of the land contained within the designation must be undertaken in accordance with the following plans:

   - The architectural plans produced by Murray Bennett Design Limited, dated 21 November 2014, Drawings 1 and 2;
   - The Concept Landscape Plan produced by Michelle Snodgrass Landscape Architecture, dated 16 February 2015; and
   - The following plans and specifications produced by Aurum Survey Consultants Limited, dated 17 February 2015:
     - ‘Site Plan Jack Reid Park’, Drawing & Issue No. 3647.10R.2A
     - ‘Overview and Earthworks’, Drawing & Issue No. 3648.8E.1D
     - ‘Engineering Details’, Drawing & Issue No. 3648.8E.2F
     - ‘Road Long Sections ACSC’, Drawing & Issue No. 3648.8E.3C
DESIGNATIONS

‘Road Cross Sections ACSC’, Drawing & Issue No. 3648.8E.4C
‘Road Cross Sections ACSC’, Drawing & Issue No. 3648.8E.5C

stamped as approved on 9 June 2015.

2. The scope of the designation is limited to the building and works shown on the above plans.

3. The building and car parking area may not be located any further east than is shown on Aurum Survey Consultants Ltd drawing ‘Site Plan Jack Reid Park’, Drawing & Issue No. 3647.10R.2A.

Hours of Operation

4. Other than in the event of an emergency, the hours that the Sports and Recreation Centre will be open to users will be limited to 7.00am to 10.00pm, Monday to Sunday, 365 days of the year, provided that on a maximum of eight occasions per calendar year, the Sports and Recreation Centre can to operate to 11.30pm. On such occasions, the building must be vacated by visitors by 11.00pm, with the site (being the building and car parking area) being completed vacated by 11.30pm.

Provision of Alcohol

5. Alcohol shall only be sold through the bar facilities in the Sports and Recreation Centre between 10.00 am and 10.00pm, 7 days a week, or to 10.45pm on the eight occasions per year designated in Condition 4.

6. Alcohol shall only be sold to any patron, member, visitor and/or competitor in accordance with the Sale and Supply of Alcohol Act 2012. Alcohol sold at the Sports and Recreation Centre shall only be sold for consumption in the proposed building and on the outside terrace located on the southern side of the building.

Engineering: General

7. All engineering works shall be carried out in accordance with the Queenstown Lakes District Council’s policies and standards, being New Zealand Standard 4404:2004 with the amendments to that standard adopted on 5 October 2005, except where specified otherwise.

Engineering: To be completed prior to the commencement of any works on-site

8. At least 5 working days prior to commencing work on site the Requiring Authority shall advise the Principal Resource Management Engineer at Council of the scheduled start date of physical works. Compliance with the prior to commencement of works conditions detailed in Condition 13 below shall be demonstrated.

9. Prior to commencing works on site, the Requiring Authority shall obtain and implement a traffic management plan approved by Council if any parking, traffic or safe movement of pedestrians will be disrupted, inconvenienced or delayed, and/or if temporary safety barriers are to be installed within or adjacent to Council’s road reserve.

10. Prior to commencing any work on the site the Requiring Authority shall install a construction vehicle crossing, which all construction traffic shall use to enter and exit the site. The minimum standard for this crossing shall be a minimum compacted depth of 150mm AP40 metal that extends 10m into the site.

11. The Requiring Authority shall install measures to control and/or mitigate any dust, silt run-off and sedimentation that may occur, in accordance with NZS 4404:2004 and ‘A Guide to Earthworks in the Queenstown Lakes District’ brochure, prepared by the Queenstown Lakes District Council. These measures shall be implemented prior to the commencement of any earthworks on site and shall remain in place for the duration of the project, until all exposed areas of earth are permanently stabilised.

12. Prior to the commencement of any works on site, the Requiring Authority shall provide a letter to the Principal Resource Management Engineer at Council advising who their representative is for the design and execution of the infrastructure engineering works required in association with this development and shall confirm that these representatives will be responsible for all aspects of the works covered.
13. Prior to the commencement of any works on the site the Requiring Authority shall provide to the Principal Resource Management Engineer at Council for review and certification, copies of specifications, calculations and design plans as is considered by Council to be both necessary and adequate, in accordance with Condition (5), to detail the following engineering works required:

a) The provision of a water supply to the development. This shall include an Acuflo CM2000 as the toby valve. This shall include any necessary relocation of the existing main out of the building footprint. The costs of the connection shall be borne by the Requiring Authority.

b) The provision of a foul sewer connection to the development. This shall include any necessary relocation of the existing main out of the building footprint. The costs of the connection shall be borne by the Requiring Authority.

c) The provision of a connection from all potential impervious areas within the development to the Council reticulated stormwater disposal system. The individual lateral connections shall be designed to provide gravity drainage for the entire area within each lot.

d) The provision of Design Certificates for all engineering works associated with this subdivision/development submitted by a suitably qualified design professional (for clarification this shall include all Roads, Water, Wastewater and Stormwater reticulation). The certificates shall be in the format of the NZS4404 Schedule 1A Certificate.

e) The provision of a fire hydrant with adequate pressure and flow to replace the fire hydrant being removed with a minimum Class FW2 firefighting water supply in accordance with the NZ Fire Service Code of Practice for Firefighting Water Supplies SNZ PAS 4509:2008.

f) The provision of an access to the proposed Sport and Recreation Centre building and carpark, in accordance with the stamped as approved plans. This shall include the provision of giveaway signage as detailed in Condition 22.

g) The provision of a single coach park within the road reserve on Centennial Avenue. This shall include signage restricting the parking to 180 minutes Monday to Sunday at all times.

h) The construction and sealing of all vehicle manoeuvring and car parking areas to Council’s standards. Parking and loading spaces shall be clearly and permanently marked out. Provision shall be made for stormwater disposal.

i) The provision of road lighting in accordance with Council’s road lighting policies and standards, including the Southern Light lighting strategy. Any road lighting installed on private roads/rights of way/access lots shall be privately maintained and all operating costs shall be the responsibility of the lots serviced by such access roads. Any lights installed on private roads/rights of way/access lots shall be isolated from the Council’s lighting network circuits.

**Engineering: To be monitored throughout earthworks**

14. No permanent batter slope within the site shall be formed at a gradient that exceeds 1:1.

15. The Requiring Authority shall implement suitable measures to prevent deposition of any debris on surrounding roads by vehicles moving to and from the site. In the event that any material is deposited on any roads, the Requiring Authority shall take immediate action, at his/her expense, to clean the roads. The loading and stockpiling of earth and other materials shall be confined to the subject site.

**Engineering: On completion of earthworks and prior to the construction of any buildings**
16. Prior to the construction of the building a suitably qualified engineer experienced in soils investigations shall undertake further investigations to determine the bearing capacity of the underlying soils in accordance with the GeoSolve report (Dated February 2015 GSL ref: 140239).

17. The foundations of the building shall be designed by a suitably qualified engineer taking into consideration the soil conditions as determined by the investigation in condition 16 above.

**Engineering: On completion of earthworks and prior to the use of the playing field for organised sport**

18. Prior to use of the reconfigured playing field for organised sport, the Requiring Authority shall complete the following:

   a) The completion and implementation of the works detailed in Condition 13(g) above.

   b) The construction of the footpath along Inverness Crescent as shown on Drawing 3647.10R.2A.

**Engineering: To be completed when works finish and before occupation of building**

19. Prior to the occupation of the building, the Requiring Authority shall complete the following:

   a) The submission of ‘as-built’ plans and information required to detail all engineering works completed in relation to or in association with this subdivision/development at the Requiring Authority’s cost. This information shall be formatted in accordance with Council’s ‘as-built’ standards and shall include all Roads (including right of way and access lots), Water, Wastewater and Stormwater reticulation (including private laterals and toby positions).

   b) The completion and implementation of all certified works detailed in Condition 13 above.

   c) The Requiring Authority shall remedy any damage to all existing road surfaces and berms that result from work carried out for this consent.

   d) Any power supply and/or telecommunications connections to the building shall be underground from existing reticulation and in accordance with any requirements/standards of the network provider’s requirements.

   e) All newly constructed foul sewer and stormwater mains shall be subject to a closed circuit television (CCTV) inspection carried out in accordance with the New Zealand Pipe Inspection Manual. A pan tilt camera shall be used and lateral connections shall be inspected from inside the main. The CCTV shall be completed and reviewed by Council before any surface sealing.

   f) The submission of Completion Certificates from both the Contractor and Approved Engineer for all infrastructure engineering works completed in relation to or in association with this subdivision/development (for clarification this shall include all Roads, Water, Wastewater and Stormwater reticulation). The certificates shall be in the format of the NZS4404 Schedule 1B and 1C Certificate.

**Landscaping**

20. The landscaping shown on The Concept Landscape Plan shall be implemented within the first planting season following the development of the building, access and car parking area. If any tree or planting shall die it shall be replaced in the next available planting season with the same species.

21. A qualified arborist shall supervise the construction of the vehicular access to the building from Centennial Avenue, so as to ensure the survival of the remaining trees in the north-eastern corner of Jack Reid Park. If any tree does not survive or impedes the vehicular access, such tree shall be replaced with the same species (at a minimum 45L grade).
Traffic Engineering

22. That a give way control system is designed and implemented on the cross intersection to be created at the new vehicle access to the Sports and Recreation Centre. The minor approaches, to the existing car park and the new Sports and Recreation Centre, shall be controlled with give way signs and markings. The detailed design of these works shall be submitted to Council for approval prior to any construction works being undertaken within the new designation.

23. Lighting is to be provided within the proposed car parking area. This lighting shall be designed to meet the minimum requirements of the QLDC District Plan (Section 14.2.4.1(xiv) illumination). The detailed design should be provided to the Council prior to any construction works being undertaken within the new designation.

24. Floodlights are only to be used between 5.00pm and 10.00pm from March until October.

External Lighting

25. Any exterior lighting shall be selected, located, aimed, adjusted and screened so as to ensure that glare resulting from the lighting does not cause an unreasonable and appreciable level of discomfort to any persons. There shall be zero upward light spill from any lighting mounted above ground.

Noise Controls

26. Activities, other than organised sports, outdoor recreation and vehicle movements on the site, shall be conducted such that the following noise levels are not exceeded at any point within any residential site:

<table>
<thead>
<tr>
<th>Time</th>
<th>Noise Level</th>
</tr>
</thead>
<tbody>
<tr>
<td>Daytime</td>
<td>50 dB L_Aeq (15 min)</td>
</tr>
<tr>
<td>Night time</td>
<td>40 dB L_Aeq (15 min) and 70 dB L_AFmax</td>
</tr>
</tbody>
</table>

Where the daytime period is 8.00am to 8.00pm hours and night time period is 8.00pm to 8.00am hours except for on up to eight (8) occasions per year the daytime period is 8.00am to 11.30pm. To enable the noise limit to be met, the site must be vacated by 11.30pm hours with the centre closed at 11.00pm hours.

These activities shall be measured in accordance with the provisions of NZS 6801:2008 Acoustics – Measurement of environmental sound, and assessed in accordance with the provisions of NZS 6802:2008 Acoustics – Environmental noise.

27. For avoidance of doubt, the following types of entertainment can be provided for within the Sports and Recreation Building:

- Low key amplified arrangements such as blues, jazz, light rock, or acoustic live bands.
- Recorded music or DJ using a small amplification system (i.e. loudspeaker with 300 W RMS power handling, subwoofer with 500 W RMS amplifier power) if limited to an internal level of 95 dB L_Aeq.

28. For avoidance of doubt, the following type of entertainment cannot be provided for in the Sports and Recreation Centre:

- Dance music with a high bass content and the use of 1000 W RMS amplifiers paired with high powered subwoofers or ‘bass bins’.
- Full amplified rock/pop bands with percussion.

29. An appropriately qualified Acoustic Engineer shall review the mechanical services design of all proposed external plant installations associated with the Sports and Recreation Centre as part of the Building Consent process, to ensure any noise emissions comply with the relevant noise limits.

31. Before 8.00pm, when all the community rooms are in use concurrently, the central and western doors to the terrace must remain closed. Only the eastern sliding door may be used to access the terrace.

32. After 8.00pm, when all the community rooms are in use concurrently, the terrace must be vacated and the entry doors from the community rooms onto the terrace will need to remain closed, with entry into the building through the main lobby.

33. For commercial events, all external doors and windows must remain shut when amplified music above background levels occurs within the community rooms, with access to the building through the main entry on the east of the building. No access to the southern terrace is permitted when music above background levels occurs in the community rooms.

34. A Noise Management Plan shall be prepared by the Requiring Authority and submitted for approval to the Council, prior to public use of the building. The Council shall then engage an independent acoustic expert to assess the Noise Management Plan, to confirm that the Noise Management Plan achieves the objective for the Plan.

35. The objective of the Noise Management Plan is to ensure that use of the Sports and Recreation Building can comply with the noise limits in condition 26.

36. The Noise Management Plan shall include the following methods, measures and techniques to achieve the objective set out in Condition 35:

   - A description of each of the noise generating activities associated with the site (traffic, recreation activities, patrons, music) and best practice for minimising each source.

   - Management procedures including provisions for the use of the terrace area and the ability to lock the sliding doors and prevent access to the terrace during commercial events or when the facility is in full use, designation of an outdoor smokers area at the main entry to the building, and timely and orderly departure at the end of an event.

   - A complaints procedure that specifies actions to be taken following receipt of a complaint, including records to be kept and responses to any complaints including remedial action taken.

37. The Noise Management Plan shall be reviewed within 2 years of commencement of use of the Sport and Recreation Centre, and then every 5 years. The results of each review, including any changes made to the Noise Management Plan, are to be provided to the Council within 3 months of the review being due. Where changes are made to the Noise Management Plan the Council shall engage an independent acoustic expert to peer review the Plan in the same manner as in condition 34.

38. The Requiring Authority shall provide the Council with a written record of the number of times the building is used after 10pm for the 12 month period preceding the reporting date. The reporting date shall be the first Monday in February in each calendar year.

Preliminary Site Investigations - NES

39. There shall be no off-site disposal of cut material.

External Appearance of Building

40. The colours and materials of the approved Sports and Recreation Centre shall be as follows:

   - Roof: Colour steel “Weatherboard Copper”; light grey butynol to verandah roof.
   - Wall cladding: Vertical Coloursteel Tray “Weatherboard Copper”
   - Feature Wall – Stacked local stone
   - Spouting/Fascia – Coloursteel “Weathered Copper”

Any amendment to this schedule of colours and materials shall be first certified as appropriate in writing by the Council, prior to being used on the building.

Lessee and Operator Obligations
41. In the event that the Requiring Authority authorises any other entity to take possession of and/or to operate the Sports and Recreation Centre then it shall be a term of any lease or agreement authorising the same that the operator or lessee, as the case may be, shall comply with all conditions specified in this designation.

C.83 Designation #XXX – Bore Field and Water Treatment Plant (Wanaka Marina)

Building Colours

1. Colours for all buildings contained within designation Area A shall be in the range of natural browns, greys, or greens with a light reflectivity value of less than 36%.

Building Height

2. The maximum height of all buildings shall sit below a datum height level of 286.4masl.

Building Location

3. No buildings or above ground structures (excluding electrical cabinetry) associated with the Water Treatment Plant and Bore Field designation are permitted with designation area B. This area is designated to contain underground bores and infrastructure and any earthworks associated with the designation purpose.

Lighting

4. All fixed exterior lighting shall be mounted on buildings and that these mountings shall be below the level of the roof pitch and directed away from the adjacent sites and roads.

Geotechnical

5. All earthworks, batter slopes, retaining and building foundations shall be undertaken in accordance with the recommendations of the report by GeoSolve Ltd (dated January 2016, GeoSolve ref: 150821).

Noise

6. Noise:

(a) Sound shall be measured in accordance with NZS 6801:2008 and assessed in accordance with NZS 6802:2008 and shall not exceed the following noise limits at any point within the notional boundary of any residential unit:

(i) daytime (0800 to 2000 hrs) 50 dB LAeq(15 min)
(ii) night-time (2000 to 0800 hrs) 40 dB LAeq(15 min)
(iii) night-time (2000 to 0800 hrs) 70 dB LAFmax

(b) The noise limits in (a) shall not apply to:

- Construction sound which shall be assessed in accordance and comply with NZS 6803:1999.
- The use of an electricity generator for emergency use.

D Queenstown Airport

The area of land covered by the Aerodrome Designation shall include the sites described below:

- Part Sections 59, 60, 61, 62, 63, 65 Block 1 Shotover Survey District
- Lots 1-3 DP 12475
- Lot 9, DP 22121
- Part Glenda Drive, and all legal roads within the above described land.
- Lots 2, 8, 11, 22 and 32, DP 304345
- Part of Lots 1 and 2, DP 394343
- Lots 1 and 2 DP 300177
- SO 14262
- Parts of Lot 1, DP 306621
D.1 Aerodrome Purposes

The following conditions and provisions be included in the Plan as D.1 - Aerodrome Purposes.

This designation is defined to protect the operational capability of the airport, while at the same time minimising adverse environmental effects from aircraft noise on the community at least to the year 2037.

Permitted Activities

1. The nature of the activities authorised by this designation are described as follows:

a) aircraft operations, private aircraft traffic, domestic and international aircraft traffic, rotary wing operations, aircraft servicing, fuel storage and general aviation.

(b) associated activities, buildings and infrastructure, navigational aids and lighting, car parking, offices and cafeteria provided there is a functional need for the activity to be located within the designation;

(c) the main runway has a maximum usable length of 1,931 metres oriented 05-23 and a width of 45 metres. The main runway will have a runway seal dimension of 1,891 metres, 60 metre sealed starter extension/strip west, 118 metre runway extension west, 1,341 metre original runway, a 320 metre runway extension east and a 52 metre starter extension strip allowance east, with 20 metre strip lengths beyond both starter extension thresholds and a 90 metre runway end safety area at both the eastern and western ends of the runway end strip;

(d) a crosswind runway orientated 14-32 with a runway strip length of 944 metres including a 90 metre starter extension to the south and a 60 metre width.

(e) the following roading alterations:

• stopping the southern part of Glenda Drive
• stopping three roads off Glenda Drive
• provision of a road link to provide access to Hawthorne Drive from Glenda Drive

The fixed wing operations are concentrated on runways 05-23 and 14-32.

(f) Within the General Aviation Precinct located on Part Lot 6 DP 304345:

• general aviation operations, including private aircraft traffic, rotary wing and helicopter operations, and
• hangars, including those for Code C aircraft; and
• associated activities, offices, aircraft servicing, fuel supply and storage, maintenance, buildings, signage and infrastructure, navigational aids and lighting, vehicle access, car parking and landscaping.

Restrictions on Aerodrome Purposes Activities

Building Height

2. Maximum height of any building shall be 9.0 metres except that this restriction does not apply to the control tower, hangars, lighting towers or navigation and communication masts and aerials.

Building Setback

3. Minimum setback from all aerodrome designation boundaries shall be 10.0m, with the exception of the following:
(i) Security fencing around the perimeter of the Airport which comprises a mesh fence being a maximum height of 2.5 metres and includes an 45° outrigger post with 3 strands of barbed wire, or such security fencing that is required by the Civil Aviation Authority to ensure compliance with Civil Aviation regulations.

(ii) A 3 metre high blast fence at the western end of the runway.

Operational Hours

4. No aircraft operations, other than emergency aircraft operations shall occur between 10pm and 6am.

Prohibited Activities

5. Non-airport related activities are prohibited within the Aerodrome designation.

Aircraft Noise

6. 
   I. Aircraft noise shall be measured, predicted and assessed in accordance with NZS 6805:1992 Airport Noise Management and Land Use Planning and NZS 6801:2008 Acoustics – Measurement of Environmental Sound, by a person suitably qualified in acoustics. The terms ANB, OCB, ASAN, 2037 Noise Contours and Indoor Design Sound Level shall be as defined in the District Plan.
   II. The term Annual Aircraft Noise Contours (AANC) shall be defined as the annual Ldn contours 55 dB, 60 dB, and 65dB that have been derived using airport noise prediction software to be determined by the Queenstown Airport Liaison Committee (QALC) in accordance with the Noise Management Plan (NMP) and records of actual aircraft movements for the busiest three consecutive months of the preceding year.
   III. The term Compliance AANC shall be defined as the AANC adjusted for any differences between calculated noise levels and measured noise levels described in Conditions 8 and 9 of this designation.
   IV. The term Projected AANC shall be defined as the Compliance AANC adjusted for annual growth estimated for the following year based on trends derived from historical aircraft movement data.
   V. If NZS 6805:1992 is superseded by a revised or new standard, the adoption of this revised/new standard in place of NZS 6805:1992 shall be at the discretion of the QALC under the NMP. Note the detail and the content of the NMP are set out in Condition 22, Condition 23 and Condition 24.

7. The Airport shall be managed so that the noise from aircraft operations does not exceed 65 dB Ldn outside the Air Noise Boundary (ANB) or 55 dB Ldn outside the Outer Control Boundary (OCB). The ANB and OCB are as shown on the District Plan Maps. Compliance with the ANB and OCB shall be determined on the basis of the Compliance AANC required to be prepared by Conditions 8 and 9.

8. Each year, QAC, shall produce 55 dB, 60 dB and 65 dB AANC, using airport noise prediction software to be determined by the QALC in accordance with the NMP and records of actual aircraft movements for the busiest three consecutive months of the preceding year.

9. At least every three years, QAC shall undertake a monitoring programme to compare the measured aircraft noise levels with the AANC. The AANC shall be corrected for any differences arising from the measured levels to produce the Compliance AANC. The monitoring programme shall include the following measurements within a three year period: a minimum of one month summer and one month winter undertaken at a minimum of three points located west, north-east and south of the airport with the exact positions to be determined by the QALC under the NMP.

10. Each year the Compliance and Projected AANC (required under conditions 9 and 14 respectively) shall be reported to the QALC. Compliance AANC produced for years when noise measurements have not been undertaken shall be prepared using the same corrections determined from the most recently measured aircraft noise levels undertaken for Condition 9.

Other Noise
11. Sound from activities which are outside the scope of NZS 6805:1992, shall comply with the District Plan noise limits set in the zone standards for each zone in which the sound is received. This requirement includes engine testing other than for essential unplanned engine testing of aircraft for scheduled passenger services.

12. No noise limits shall apply to essential unplanned engine testing of aircraft for scheduled passenger services. The NMP shall detail noise management practices for unplanned engine testing including preferred locations and times. Following each unplanned engine test the QAC shall report to the next meeting of the QALC why the testing was required and what noise management practices were followed.

13. Queenstown Airport Corporation Limited (QAC), shall provide the Queenstown Lakes District Council (QLDC) with the 2037 Noise Contours in 1 dB increments from 70 dB Ldn to 55 dB Ldn inclusive. The methodology used to calculate these 2037 Noise Contours shall be the same as that used to calculate the ANB and the OCB. These contours shall be provided in an electronic format and shall also be appended to the NMP.

14. Each year QAC shall produce 55 dB, 60 dB and 65 dB Projected AANC for the purpose of determining when mitigation shall be offered under Conditions 15 and 16 using the same aircraft noise prediction software as used for the Compliance AANC required under Condition 8, adjusted for annual growth estimated for the following year based on trends derived from historical aircraft movement data.

15. Each year the QAC shall offer to provide 100% funding of noise mitigation for Critical Listening Environments of buildings that existed on 8 May 2013 containing an ASAN that are within the 65 dB Projected AANC. This offer may be earlier at QAC’s discretion. Where a building owner accepts this offer they shall not be eligible for further funding of mechanical ventilation if the building later becomes within the 65 dB Projected AANC, but they shall become eligible for 100% funding of any sound insulation required.

16. QAC shall offer to part fund retrofitting, over time, of mechanical ventilation of any Critical Listening Environment within existing buildings containing an ASAN located between the Air Noise Boundary and the 2037 60 dB Noise Contour. In particular, each year the QAC shall offer to provide 75% funding of mechanical ventilation for Critical Listening Environments of buildings that existed on 8 May 2013 containing an ASAN that are within the 60 dB Projected AANC. This offer may be earlier at QAC’s discretion. Where a building owner accepts this offer they shall not be eligible for further funding of mechanical ventilation if the building later becomes within the 65 dB Projected AANC, but they shall become eligible for 100% funding of any sound insulation required.

17. Mechanical ventilation shall be in accordance with Table 3 of Appendix 13 to the District Plan.

18. Noise mitigation funding offered by the QAC shall only be required where the benefitting building owner agrees to the methods offered and agrees to enter into a binding property agreement or covenant to the effect that the owners or occupiers of the property:
   
   (a) are aware that the property may be subject to increased levels of aircraft noise, and

   (b) agree that any complaint arising from noise related activities shall be dealt with in accordance with the complaints procedures set out in the NMP, and

   (c) will not remove or lessen the effectiveness of the acoustic insulation and/or mechanical ventilation that is installed by QAC without its prior approval.

19. Alternative mitigation strategies may be adopted by agreement of QAC and the building owner. A procedure for dispute resolution shall be provided in the NMP.

20. A Noise Mitigation Plan detailing the processes required to give effect to the funding of sound insulation and mechanical ventilation shall be included as part of the NMP.

21. Any offer made under Conditions 15 or 16 remains open for acceptance by the landowner for a period of 12 months. If the landowner declines the offer, this shall be recorded by QAC. If, at a later date that landowner wishes to take up the offer, the landowner shall notify the QAC of its desire to do so. The QAC shall determine whether it will make the offer available again and shall communicate the reasons for its decision to the landowner. Acceptance of the request by the QAC shall not be unreasonably withheld. QAC shall monitor change of ownership records and if the ownership of the
property subsequently changes and the offer made above was not taken up by the landowner at that time, the QAC shall offer the new landowner funding in accordance with Conditions 15 and 16. In these circumstances the offer will remain open for acceptance for a further 12 month period.

Noise Management Plan

22. Within 6 months of 8 May 2013 and without in any way limiting its obligations to fully comply with the conditions attaching to this designation, QAC shall complete and provide to the QALC a NMP which describes how QAC proposes to manage the Airport in order to comply with the conditions of this designation. The NMP shall describe, in detail, the following matters:

a) procedures for the convening, ongoing maintenance and operation of the QALC;

b) the QALC’s discretion to adopt any revised/new standard which may replace NZS6805:1992 and to choose the noise modelling software to be used for the ongoing AANC compliance monitoring through the Compliance AANCS;

c) the mechanisms for giving effect to a noise monitoring programme to assess compliance with Conditions 7, 8, 9, and 10 and in 22 (h);

d) the ongoing investigations, methods, processes and resources that QAC proposes to put in place to provide for:

i. the reduction of noise levels from all aspects of Aircraft Operations and engine testing; and

ii. alternative methods of noise management to achieve the reduction of these noise levels;

e) noise minimisation procedures which include:

i. procedures and measures adopted to ensure compliance with noise limits for: -

• aircraft operations in Condition 7; and

• engine testing in Condition 12;

ii. Civil Aviation Authority (CAA) noise rules applicable to the Airport from time to time;

iii. voluntary or self imposed procedures or measures for the reduction of aircraft noise;

f) the procedures for modifying and enhancing the noise minimisation procedures to take into account:

i. any findings made pursuant to any investigation undertaken in accord with 22(d) above;

ii. the need to ensure compliance with all of the requirements of this designation;

g) the procedures for reporting to the QALC any Aircraft Operations and engine testing activities which contravene a condition of this designation and the details of noise mitigation procedures for unplanned engine testing including preferred locations and times;

h) the procedure for the annual preparation and publication of the Compliance AANC by QAC, as required by Conditions 9 and 10 above;

i) a procedure for dealing with complaints including: the recording of complaints; acknowledgement to the complainant of receipt of their complaint and the outcome once resolved; any corrective action(s) to be taken including if non compliance with the conditions is identified, and reporting to the QALC;

j) the dispute resolution procedures, to resolve disputes between QAC and QALC about the contents and implementation of the NMP;

k) the detailed procedures and processes for implementing a Noise Mitigation Plan above except that those procedures and processes shall not in any way limit the obligations set out in Conditions 15 to 21 above.

l) the procedures for amending the NMP.
23. The NMP shall include provisions for a Queenstown Airport Liaison Committee including:
   a) the membership of the QALC, which shall comprise of: a chair, QAC (up to 2 members), QLDC (1 member), community (3 members), Airways Corporation (1 member), a representative of the airlines operating flights at Queenstown Airport (1 member), a representative of the Queenstown Airport general aviation/helicopter operators (1 member);
   b) a quorum of the QALC shall be four members including at least one representative of each of QAC, QLDC and the community;
   c) the QALC shall have an independent chair appointed by QAC in consultation with the QLDC;
   d) the QAC will provide a venue and secretarial and support services for the QALC which will be provided at QAC’s own expense, and
   e) the meeting times of the QALC which shall be up to 4 times per annum or as agreed by the QALC.

24. The NMP shall provide guidance for noise mitigation by owners of new and altered buildings containing ASANs within the OCB. This shall include details of the likely mitigation required within each 2037 Noise Contour, including identification of the point at which no mitigation is required.

25. The current version of the NMP shall be made available to the public on QAC’s web site.

Traffic/Access Arrangements to Lot 6

26. In the event that the Eastern Access Road (EAR) is formed and operational from Hawthorne Drive through to Glenda Drive, and access from the EAR to the eastern end of the General Aviation Precinct (the GAP) is constructed and operational then the eastern access shall become the primary access to the GAP. The eastern access shall have a controlled intersection with the EAR approved by the road controlling authority and allow all movements from all approaches. Any access arrangement at the western (Hawthorne Drive) access shall revert to left-in access only.

27. In the event that a connection to the GAP is constructed and operational from a northern extension of Red Oaks Drive, then the western access from Hawthorne Drive shall be closed and full access and egress to the precinct shall be made from the Red Oaks Drive connection, irrespective of whether an eastern access to the precinct is constructed and operational.

28. If development within the GAP occurs prior to the construction and operation of an eastern access, and no extension from the current termination of Hawthorne Drive toward the western access has occurred, then access to the GAP shall occur through an extension of Hawthorne Drive by the QAC to the western access point, in a manner generally consistent with Figure 1.

29. If development within the GAP occurs prior to the construction and operation of an eastern access, and Hawthorne Drive has been extended beyond its current termination past the western access but not as far as Red Oaks Drive, then full ingress and egress will be allowed at the western access.

30. If development within the GAP occurs prior to the construction and operation of an eastern access and Hawthorne Drive is extended to or beyond Red Oaks Drive (which is to be either a roundabout or signal controlled at the discretion of the road control authority) then the western access at the connection with Hawthorne Drive shall operate on a left in and left out basis with pre-signals controlling traffic travelling east on Hawthorne Drive to enable egress from the western access in a manner generally consistent with Figure 2.

Advice Note: all intersections and roading improvements shall be designed and constructed to Council standards and be subject to Council approval as road controlling authority.

Landscape and Design

31. Not less than three (3) months prior to an outline plan for the GAP being submitted to the territorial authority pursuant to section 176A of the Act, the requiring authority shall prepare and submit to the territorial authority...
for certification an "Integrated Design Management Plan". The purpose of the Integrated Design Management Plan shall be to provide a structure plan showing the general configuration of roading, parking and areas of landscaping, open space and key view corridors and to determine the approach to be adopted for the design and development of buildings and infrastructure (including signage). No outline plan shall be submitted by the requiring authority until such time as the territorial authority has certified that the Integrated Design Management Plan achieves the following objectives:

**Outstanding Natural landscapes**
(a) Identify and maintain views to the surrounding mountains and Outstanding Natural Landscapes, and including those referred to in the Remarkables Park Zone. This may be achieved by:
(i) providing sufficient separation between buildings and infrastructure to ensure that identified views to the mountains from neighbouring land to the south and north of the GAP are maintained;
(ii) Interspersing buildings and infrastructure with carparking and/or open space;
(iii) Clustering of buildings.

**Landscaping:**
(b) Provide landscaping within the GAP that achieves a high level of onsite and offsite amenity and ensures that any adverse effects on neighbouring land arising from development of the GAP are appropriately mitigated. This may be achieved by:
(i) landscaping of buildings, infrastructure and carparking areas that softens, integrates and where possible screens built form when viewed from neighbouring land and from the airport passenger terminal;
(ii) where necessary, planting along the boundary of the GAP to provide for the screening of buildings and infrastructure within the site and/or visual integration within the surrounding landscape;
(iii) a planting palette with sufficient range to enable the creation of character areas, but with elements that remain consistent throughout the GAP so as to create a consistent theme;
(iv) a hard landscaping palette including paving, retaining structures, drainage grates, kerb profiles, bollards, fencing, light standards and any other GAP infrastructure. More than one paving type may be included to enable the creation of character areas but all other hard elements should be consistent so as to create a consistent theme;
(v) a consistent carpark design, including soft and hard landscaping in all locations but allowing for some variation to enable the development of character areas.

**Buildings and Signage:**
(c) Design and locate buildings so they are recessive and integrated within the surrounding landscape (including the immediately adjoining Remarkables Park Zone), whilst recognising and providing for the buildings' function and use. This may be achieved by:
(i) avoiding linear arrangements of buildings where practicable;
(ii) varied rooflines that avoid uniformity, particularly when viewed from the south and elevated viewpoints;
(iii) limiting roof colours to browns, greens and greys with a reflectivity of less than 36%, with no signage permitted on the roofs of buildings;
(iv) limiting the external colour of the material used for walls buildings to a natural range of browns, greens and greys with a reflectivity of less than 36%, with the exception that the trims, highlights and signage totalling up to 10% of the façade area may exceed this level and be of contrasting colours in order to add visual interest;
(v) ensuring variation in the bulk, form and scale of buildings;
(vi) providing interesting detailing and articulation of building facades, particularly when viewed from the south;
(vii) the identification of signage platforms on buildings.

**Infrastructure:**
(d) Mitigate any adverse visual and amenity effects of infrastructure for visitors to the airport and users of neighbouring land. This may be achieved by:
(i) locating aviation related infrastructure on the airside part of the GAP land where practicable and where possible, ensuring such infrastructure is integrated into the development by appropriate landscaping measures;
(ii) providing details of methods for managing stormwater and earthworks for the purpose of avoiding, remedying or mitigating any relevant adverse effect.

33. The Integrated Design Management Plan shall allow for staged implementation of development within the GAP. If staged development is provided for then an overall plan showing the likely stages and the method for ensuring a consistency of design and landscaping approach across the development of the entire GAP shall be included in the Integrated Design Management Plan. If the development is to be staged then the development of a precinct accessway shall be part of Stage 1.

34. The requiring authority shall ensure that all outline plans submitted pursuant to section 176A of the Resource Management Act 1991 demonstrate that the works subject to it are to be developed in a manner that achieves the objectives of the Integrated Design Management Plan. Outline plans shall contain a detailed landscape design plan including planting and maintenance plans to achieve objectives (a) and (b) of the Integrated Design Management Plan on an on-going basis. Each outline plan shall also contain details of buildings, signage, parking, and other built infrastructure to demonstrate how objectives (c) and (d) of the Integrated Design Management Plan are to be achieved. Each outline plan shall be accompanied by a report from a suitably qualified and experienced landscape architect addressing how the outline plan achieves the objectives of the Integrated Design Management Plan.

35. The requiring authority may seek the approval of the territorial authority to make any necessary amendment to the Integrated Design Management Plan, without an application under the Resource Management Act 1991 to make such a change, provided that such amendments do not result in changing the purpose, or derogating from the purpose and the objectives of the Integrated Design Management Plan set out in condition [31].

36. If a review of the Integrated Design Management Plan is undertaken by the requiring authority then that review shall be undertaken in consultation with the consent authority.
Eastern Runway End Safety Area (RESA)

Construction Management Plan

37. (i) Prior to the commencement of construction of the RESA, and in conjunction with the outline plan required by Section 176A, a Construction Management Plan shall be submitted to the Council for review and approval. The purpose of the Construction Management Plan shall be to:

(a) Describe the methods proposed for the construction of the RESA and the programme for construction of each element;
(b) Describe what actions will be taken to manage the actual or potential effects of construction activities associated with the RESA and to satisfy conditions on the designation;
(c) Provide a list of key personnel and points of contact during RESA construction;
(d) Describe how stakeholders will be kept informed during construction of the RESA and how complaints will be managed; and
(e) Ensure compliance with the conditions of the designation as they relate to RESA construction work.

(ii) The Construction Management Plan shall include the following details:

(a) A staging plan, identifying the RESA works and proposed duration of each stage;
(b) Description of all RESA construction works including (as required) identification of fill sources and additional construction material required, access roads and tracks, identification of areas for storing plant and machinery, locations and colours of any temporary buildings, design details of the blast fence at the west of the runway, mitigation measures, rehabilitation, monitoring and reporting to be undertaken;
(c) Design responsibilities and method of RESA construction, including methods of conducting vegetation clearance and earthworks, disposal (if required) of excavation material, in river works management, sediment management, surface water and erosion management, methods for management of hazardous substances, dust management, noise (including vibration) management and fire fighting;
(d) The name and contact details of personnel holding key positions during RESA construction, including an appropriately qualified person on site to have responsibility for managing environmental issues, responding to community complaints, and ensuring that conditions in the designation and management plans are adhered to throughout the RESA construction; and
(e) Details of the minimum requirements for investigations, inspections and monitoring throughout RESA construction to ensure that construction is being undertaken in accordance with the requirements of this designation.

(iii) The Requiring Authority shall adhere to the requirements of the Construction Management Plan at all times during the construction of the RESA.

38. The earth-fill embankment shall be constructed such that it generally incorporates the ability to provide for the horizontal and vertical alignment of the future arterial road, as outlined on Airey Consultants Ltd, plan number 5814/155, SK02-1. The construction shall allow for this road corridor to have a width of between 16 and 22 metres, a design speed of 60km/hr and a posted speed limit of 50km/hr.

39. The use of Old School Road and Spence Road, Hawthorne Drive and Glenda Drive shall not be permitted as haulage routes for truck movements during the construction period for the RESA.

40. Prior to commencing works on site, and after consultation with potentially affected occupiers, the Requiring Authority shall submit a RESA Construction Traffic Management Plan, endorsed by the New Zealand...
Transport Agency, to Council for approval. The RESA Construction Traffic Management Plan shall include a Traffic Impact Assessment that provides an assessment of the actual and potential effects of construction traffic on the surrounding State highways and other roads (including the Shotover Delta Access Track outside the construction area) by an appropriately qualified traffic engineer. The Traffic Impact Assessment shall incorporate:

(i) Proposed construction haulage routes, excluding Glenda Drive, Hawthorne Drive and Old School Road/Spence Road and excluding use of the public road network for night time deliveries of any materials;

(ii) Construction traffic volumes over haulage routes; and

(iii) Recommendations for the RESA Construction Traffic Management plan, including any physical works including ongoing maintenance work required on the State highways, other roads and/or other access routes (including the Shotover delta access track) to provide for safe and efficient access, and mitigate against all adverse effects including those of dust and noise (including vibration).

41. The RESA Construction Traffic Management Plan shall be prepared by a Site Traffic Management Supervisor (certification gained by attending the STMS course and getting registration) and incorporate the recommendations of the Traffic Impact Assessment. All contractors obligated to implement temporary traffic management plans shall employ a qualified STMS on site. The STMS shall implement the Construction Traffic Management Plan.

42. Prior to the commencement of works on site, all recommendations for physical improvement works on the State highways and/or other roads or access routes, as outlined in the RESA Construction Traffic Management Plan, and as approved or required the New Zealand Transport Agency and/or Council, shall be implemented.

43. During RESA construction the Requiring Authority shall monitor all access roads used as part of the construction to ensure that they are maintained in a suitable condition (including being kept free from potholes) in order to assist in achieving condition 8 and to mitigate the effects of dust.

RESA Construction Noise and Vibration Management Plan

44. Prior to the commencement of RESA construction works on site the Requiring Authority shall prepare and submit to Council for review and approval a noise and vibration management plan. The purpose of that Plan is:

(i) To identify the measures the Requiring Authority will take to comply with the requirements of Section 16 RMA, including in relation to vibrations;

(ii) To ensure that at all times during the RESA construction, construction noise complies with NZS 6803.1999 — Acoustic Construction Noise. For the avoidance of doubt compliance with the Acoustic Construction Noise Standard is not required for residential occupiers located in the Glenda Drive Industrial zone;

(iii) To identify the measures for reducing the noise generated by vehicles associated with the RESA construction work including alternative methods for dealing with reversing vehicle warning systems;

(iv) The Noise and Vibration Management Plan may make different provisions for daytime and night time noise; and

(v) To provide details of a leaflet drop to all neighbouring residents situated on Glenda Drive recommending they keep windows shut during the short term night construction phase.

45. The Requiring Authority will ensure that all work and operations are carried out in accordance with the Noise and Vibration Management Plan.

Lighting (Night Time) Management Plan

46. Prior to the commencement of construction works at night on the site, a Lighting (night time) Management Plan shall be submitted to Council for review and approval. This shall detail the best practicable options to reduce off site light spill if RESA construction work is undertaken during night time hours. The Requiring Authority shall adhere to the provisions of this plan during night time construction.
General

47. No RESA construction machinery shall be parked within the active Shotover riverbed at any time.

48. Prior to the commencement of the RESA construction work a detailed planting and ongoing planting maintenance plan for the RESA shall be submitted to Council for review and approval. The planting plan shall have the following objectives:

   (i) To visually integrate the RESA and the future arterial road bench into the surrounding landscape;
   (ii) To improve the ecological integrity and functioning of the site; and
   (iii) To assist in the management of surface erosion.

The planting plan shall be progressively implemented as the RESA is constructed and shall be completed within the first planting season following the construction of the RESA.

49. If the Requiring Authority:

   (i) Discovers koiwi tangata (human skeletal remains), waahi taoka (resources of importance), waahi tapu (places or features of special significance) or other Maori artefact material, the requiring authority shall without delay;
   (ii) Notify the Consent Authority, Tangata Whenua and New Zealand Historic Places Trust and in the case of skeletal remains, the New Zealand Police;
   (iii) Stop work within the immediate vicinity of the discovery to allow a site inspection by the New Zealand Historic Places Trust and the appropriate runanga and their advisors, who shall determine whether the discovery is likely to be extensive, if a thorough site investigation is required, and whether an Archaeological Authority is required;
   (iv) Any koiwi tangata discovered shall be handled and removed by tribal elders responsible for the tikanga (custom) appropriate to its removal or preservation;
   (v) Site work shall recommence following consultation with the requiring authority, the New Zealand Historic Places Trust, Tangata Whenua, and in the case of skeletal remains, the New Zealand Police, provided that any relevant statutory permissions have been obtained; and
   (v) Te Ao Marama shall be advised about construction activity prior to construction commencing.

50. The RESA fill shall at all times, including after completion of the RESA construction work, be protected in an appropriate manner from the risk of erosion by the river in accordance with accepted engineering practice.

D.2 Air Noise Boundary Controls

An Air Noise Boundary has been defined around Queenstown Airport to protect the operational capability of the airport, while at the same time minimising adverse environmental effects from aircraft noise on the community.

The purpose of the air noise boundary is to identify the area of airport operations where noise sensitive activities are prohibited.

The extent of the air noise boundary is shown on the Planning Maps.

Restrictions on Activities

Noise

The Airport shall be managed so the noise does not exceed a day/night level (L_{dn}) of 65 dBA outside the Air Noise Boundary and 55 dBA outside the Outer Control Boundary. Aircraft Noise shall be measured in accordance with NZS 6805:1992 Airport Noise Management and Land Use Planning and calculated as a 90 day rolling average or calculated from a record of the individual aircraft movements and single event noise levels obtained from a detailed noise monitoring study for a minimum of 3 months.
Aircraft operations which will involve:

(a) aircraft landing in an emergency

(b) aircraft using the Airport as a planned alternative to landing at a scheduled airport

(c) military aircraft movements shall be excluded from the calculation of the three month average.

A noise monitoring regime is to be established and implemented by Queenstown Airport Corporation, the purpose of which is to meet the minimum reporting requirements set out in Clause 2.3.3.1 of NZS 6805:1992. This regime is to be recorded in a noise management plan, a copy of which is to be lodged with the Council not later than six months after the date this designation is included in the District Plan.

The data recorded and evaluated is to be reported at not more than 90 day intervals and a copy of the report forwarded to the Queenstown Lakes District Council not later than 20 working days after the expiry of the 90 day interval.

Queenstown Airport Corporation is to convene a standing Airport Liaison committee comprising at least one representative each from aircraft and airline operators, Airways Corporation of New Zealand, Queenstown Lakes District Council and the local community. The purpose of the committee is to foster a co-operative approach to the management of airport noise and other environmental effects.

Prohibited Activities

Any activity other than an airport related activity shall not be permitted inside the $L_{dn}$ 65 Air Noise Boundary, without prior approval of the Queenstown Airport Corporation Limited.

New residential, school, hospital and other noise sensitive activities are prohibited inside the Air Noise Boundary.

No alterations or additions to existing residential, school, hospital and other noise sensitive activities shall be permitted inside the Air Noise Boundary.

Where any existing buildings within the Air Noise Boundary are proposed to be used for residential or other noise sensitive activity then that building must first be fitted with acoustic insulation so that the night-weighted sound exposure inside the building does not exceed $40 \, L_{dn}$.

Note: The location of the Air Noise Boundary is shown on Planning Map 31(a)

D.3 Airport Approach and Land Use Controls

Objective

The objective of these restrictions is to limit the construction of any structure or facility which may inhibit the safe and efficient operation of Queenstown Airport. These restrictions directly relate to the runways specified in Designation 2 – Aerodrome Purposes.

Overview

The following height restrictions are based on combinations of various Civil Aviation (CAR 139-6 and 139-7) and ICAO Annex 14 obstacle limitation surfaces. The main runway take off climb surfaces are for Code 3 or 4 aerodromes. These are set out below.

All measurements are in metres above average mean sea level unless otherwise stated.

Airport Protection

Written consent of Queenstown Airport Corporation is to be obtained prior to a resource consent or building consent application being made to the Queenstown Lakes District Council or prior to the carrying out of any works involving the construction of any structure including any building, aerial, antennae or other object which in any way penetrates any of the surfaces described in D3 and indicated on the Planning Maps. These surfaces are as follows:

Take-off Climb and Approach Surfaces
There is a take off climb and approach protection surface at each end of the main runway and cross wind runway strips. The takeoff and approach surfaces differ in detail, but both are protected by a slope extending upward and outward from each end of the strip.

The take off climb/approach surface at the western and eastern end of the main strip rises at a gradient of 1.6% (1 in 62.5) over a horizontal distance of 18,750m and continues along the extended runway centreline. The inner edge of the main strip is 75 metres either side of the main runway centreline and the rate of lateral divergence from the inner edge is 12.5% (1 in 8) on each side of the fan.

The take off climb/approach surfaces at each end of the crosswind runway strip rises at a gradient of 5.0% (1 in 20) over a horizontal distance of 1600 metres. The inner edge of the crosswind strip is 30 metres either side of the runway centreline and the rate of divergence from the inner edge is 10.0% (1 in 10) on each side of the fan.

There is also a curved take-off climb and approach surface at the northern end of the crosswind runway, which turns to the north at the end of the runway strip with a radius of 900 metres and rises at a gradient of 5.0% (1 in 20) over a horizontal distance of 1600 metres. The inner edge of the crosswind strip is 30 metres either side of the runway centreline and the rate of divergence from the inner edge is 10.0% (1 in 10) on each side of the fan.

Note: (A and B in the note below apply)

Transitional Surfaces

The transitional surface provides for a situation where an approaching aircraft is either off centreline or where it has executed a missed approach and allows for an area free of obstacles to protect aircraft in the final phase of the approach to land manoeuvre.

These extend upwards and outwards from the sides of each runway strip. For the main strip the gradient is 14.3% (1 in 7). For the crosswind strip the gradient is 20% (1 in 5) to a height of 45 metres above the aerodrome.

Transition slopes extend at the same heights beyond each end of the runway strip to intercept the approach protection surfaces.

Inner Horizontal Surface

The inner horizontal surface is a plane surface at a height of 45 metres above the airport datum level of 355 metres enclosed within a 4000 metres radius drawn from the periphery of the main runway strip, and a 4000 metres distance either side of the main runway strip.

Note: (A and B in the note below apply)

Conical Surface

The conical surface extends from the periphery of the inner horizontal surface upwards and outward at a slope of 5.0% (1 in 20) to a height of 150m above the aerodrome datum level.

Note: (A and B in the note below apply)

Lake Hayes Flight Path

The centreline of the engine failed take-off surface for light and medium weight aircraft at the eastern end of the proposed extended strip follows the heavy aircraft take off climb/approach surface for a distance of 78 metres from the end of the strip. At this point the engine failed take off surface turns left through an angle of 32 degrees, at a radius of 1442 metres before continuing straight ahead for 3550 metres when it make a further left turn through 50 degrees around Slope Hill at a radius of 3250 metres.

Immediately on completing this turn a right turn through 195 degrees at a radius of 1475 metres is initiated. When this third turn is completed, Northeast of Morven Hill the path continues straight ahead for 2625 metres before turning right through 67 degrees at a radius of 1475 metres between Morven Hill and The Remarkables. After completing this last turn it passes straight back over the Airfield.

The sides of the engine failed surface follow a 12.5% lateral divergence from each end of a 75 metre long strip inner edge either side of the extended runway centreline for a horizontal distance of 4200 metres and thereafter continues at a constant width of 600 metres either side of the centreline. The
upward slope of the engine failed protection surface is 1.6% (1 in 62.5) for a
distance of 78 metres at which point the surface drops 4.6 metres. The
surface then continues to rise at 1.6% (1 in 62.5) terminating overhead the
runway.

**Note:**
A. New objects or extensions to objects shall be prohibited activities above
the approach or transitional surfaces except when the new object or
extension is shielded by an existing immovable object, provided that
temporary short term penetrations of these surfaces may be authorised
by the Queenstown Airport Corporation.

B. New objects or extensions of existing objects shall not be permitted
above the conical surface or inner horizontal surface except when the
object is shielded by an existing immovable object, or the Council has
consented to a penetration as a discretionary activity following an
aeronautical study which has determined that the object will not
adversely affect the safety or significantly affect the regularity of
operations or aeroplanes.

**Note:**
Pursuant to Part 77 of the Civil Aviation Rules, a person proposing to
construct or alter a structure must notify the Director of Civil Aviation of the
proposal if the proposed structure or alteration to a structure is located below
the approach or take-off surfaces described in this designation as shown on
the Planning Maps and extends to a height greater than a surface extending
outwards and upwards at one of the following:

(i) A slope of 1:83 from the fan origin if the take-off surface of a runway
where the runway is used or intended to be used by aircraft with a
Maximum Certified Take-Off Weight above 5700kg.

(ii) A slope of 1:50 from the fan origin of the take-off surface of a runway
where the runway is intended to be used by aircraft with a Maximum
Certified Take-Off Weight at or below 5700kg.

Notification must be in the form specified in Rule 77-13 and be submitted at
least 90 days before the proposed date of commencement of construction or
alteration.

---

**E Wanaka Airport**

The land area covered by the Aerodrome Purposes designation shall include
the sites described below:

- Lot 2 DP 341605
- Lots 1, 2, 3, 4, 5 DP 18824
- Lot 2 DP 368240
- Lot 1 DP 341605
- Lots 4 – 5 DP 340031
- Lot 6 DP 22636
- Lot 7 DP22637
- Lots 2, 3, 4, 5 DP23517
- Lots 10 and 11 DP 24410
- Lot 6 DP 24685
- Lots 1 and 2 DP 26239
- Section 1 Survey Office Plan 24776
- Legal Road

**E.1 Aerodrome Purposes**

This designation is defined to protect the operational capability of the airport,
while at the same time minimising adverse environmental effects from aircraft
noise.

**Permitted Activities**

The nature of the activities covered by this designation is described as follows:

(a) aircraft operations, rotary wing aircraft operations, aircraft servicing,
    fuel storage and general aviation, navigational aids and lighting,
    aviation schools, facilities and activities associated with veteran,
    vintage and classic aircraft operations, aviation museums and aero
    recreation.
(b) associated buildings and infrastructure, car parking, offices and cafeteria.

(c) an extension of the main runway (11-29) of 550 metres to the north west to provide a runway length of 1,700 metres, plus a 50 metre starter extension.

(d) an increase in width of the main runway to 150 metres.

(e) the formation of runway end safety areas of 240 metres long by 90 metres wide at both ends of the main runway.

(f) expansion of the main apron area.

(g) helicopter aprons and associated touch-down and lift-off areas.

(h) a new passenger terminal and control tower.

(i) alterations to ancillary facilities.

(j) realignment of the road to the south east of the airport.

(k) provision for a new alternative runway 93 metres to the north of and parallel to the existing main runway. The alternative runway will be 1,700 metres long and 30 metres wide contained in a strip 2,300 metres long by 150 metres wide.

Restrictions on Aerodrome Purposes Activities

Building Height

(a) Maximum height of any building shall not exceed 9.0 metres except that:

(b) This restriction does not apply to the control tower, lighting towers or navigation and communication masts and aerials associated with airport operations.

(c) No buildings, other than a control tower shall infringe the restrictions of the Approach and Land Use Controls designations.

Building Setback

(a) Minimum setback from all boundaries of the designation shall be 10.0 metres.

(b) Minimum setback from the eastern side of the centre line of the proposed parallel runway shall be 124 metres.

(c) Minimum setback from the western side of the centre line of the runway shall be 124 metres.

Building Location and Appearance

(a) All space should be utilised in the south east area of the Airport before buildings are constructed in other areas.

(b) Buildings shall comply with the QLDC Guide to Reducing Glare and Reflective Surfaces.

(c) Before buildings are constructed on the northern side of the runway the airport operator will undertake a visual impact assessment of development in this area. The purpose of this assessment will be to serve as the guide to future development through the identification of view shafts or other mitigation methods to be implemented through the outline plan process as development occurs.

Operations During Hours of Darkness

The airport shall not be used for scheduled passenger services during the hours of darkness unless a suitable lighting plan is produced. No aircraft operations, other than emergency aircraft operations, shall occur between 10 pm and 7 am.

Wanaka Airport Liaison Committee

The airport operator shall establish and facilitate a Wanaka Airport Liaison Committee (‘WALC’). The WALC shall include membership from: the airport
operator, Lakes Environmental Ltd, Wanaka Airport Users Group, commercial airlines, Airways Corporation and the community. The WALC shall meet at least once every six months with a quorum of four members including at least one representative of each of the airport operator, the QLDC and the community.

Within one year of this designation taking effect, the airport operator shall establish and maintain at its cost a Wanaka Airport Liaison Committee (‘WALC’). The WALC shall include (but not be limited to) membership from:

(a) An independent chair appointed by the airport operator,
(b) The airport operator,
(c) Lakes Environmental Ltd,
(d) Wanaka Airport Users Group,
(e) Commercial airlines,
(f) Airways Corporation, and
(g) The Wanaka Community Board.

The WALC shall meet at least once every six months with a quorum of four members including the chair and at least one representative of each of the airport operator, Lakes Environmental Ltd and the Wanaka Community Board. The WALC shall:

(a) Review any complaints or issues relating to the operation of the airport, and responses by the airport operator,
(b) Assist the airport operator develop procedures to minimise adverse environmental effects on the community,
(c) Assist the airport operator to communicate and engage with the community,
(d) Develop noise management procedures for unplanned engine testing of aircraft for scheduled passenger services, and review any such occurrences,
(e) Review progress on airport development and the master plan, and
(f) Encourage parties to work together co-operatively, sharing information and making recommendations by consensus and agreement.

Airport Noise
Airport noise shall be measured, predicted and assessed in accordance with NZS 6805:1992 “Airport Noise Management and Land Use Planning”, by an acoustics specialist.

The Airport shall be managed so airport the noise does not exceed a day/night level of 65 dB outside the Air Noise Boundary and 55 dB Ldn outside the Outer Control Boundary.

Compliance with the 55 dB Ldn noise limit at the OCB shall be determined every two years by the calculation of noise contours using the IMNv7b acoustics computer model and records of actual aircraft activity at the Airport. A report shall be provided every two years to the WALC, including the noise contour results and the methodology used in the preparation of the contours.

Once the calculated noise levels at any point on the Outer Control Boundary shown on the Planning Maps is 54 dB Ldn or greater, noise level measurements shall be carried out for a minimum of one month in the summer and one month in the winter at each of two measurement locations every two years. The noise measurement locations should be selected to allow confirmation of compliance with the 55 dB Ldn limit at the OCB. The measurement locations do not need to be on the OCB. The difference between the measured sound level and the calculated sound level at a measurement location shall be added to the calculated sound level at the OCB to determine compliance. A report on the results of such monitoring shall be forwarded to the WALC within two months of the monitoring being undertaken.

Note: This designation does not provide for an Air Noise Boundary at the 65 dB Ldn contour as the provisions and extent of the OCB render this unnecessary at Wanaka Airport at this time.

Noise from the following Aircraft Operations shall be excluded from the compliance calculations set out above:

(a) (i) aircraft landing or taking off in an emergency; and
(ii) emergency flights required to rescue persons from life threatening situations or to transport patients, human organs or medical personnel in medical emergency, and
(iii) aircraft using the airport due to unforeseen circumstances as an essential alternative to landing at another scheduled airport, and
(iv) flights required to meet the needs of a national or civil defence emergency declared under the Civil Defence Act 1983, and
(b) flights certified by the Minister of Defence as necessary for reasons of National Security in accordance with Section 4 of the Act; and
(c) aircraft undertaking fire fighting duties;
(d) aircraft using the airport in preparation for and participation in the biennial Warbirds Over Wanaka air shows (this applies 5 days prior to and 3 days after the air show).

Other Noise

Sound from activities operating in this designation, which is outside the scope of NZS 6805:1992, shall comply with the District Plan noise limits set in the zone standards for each zone in which the sound is received. This requirement includes engine testing other than for essential unplanned engine testing of aircraft for scheduled passenger services.

No noise limits shall apply to essential unplanned engine testing of aircraft for scheduled passenger services. The WALC shall determine noise management practices for unplanned engine testing including preferred locations and times. Following each unplanned engine test the airport operator shall report to the next meeting of the WALC why the testing was required and what noise management practices were followed.

Proposed Parallel Runway

(a) Prior to the commencement of construction of the proposed parallel runway, and in conjunction with the outline plan of works required by Section 176A, a Construction Management Plan shall be submitted to the Council for review and approval. The purpose of the Construction Management Plan shall be to:
(i) Describe the methods proposed for the construction of the runway;
(ii) Describe what actions will be taken to manage the actual or potential effects of construction activities associated with the runway constructions;
(iii) Ensure compliance with the conditions of the designation as they relate to construction of the parallel runway.
(b) The Construction Management Plan shall include the following information:
(i) Description of all the runway construction works including identification of fill sources, access roads and tracks, identification of areas for storing plant and machinery, mitigation measures, monitoring and reporting to be undertaken.

(c) If fill is to be transported from off-site a Construction Traffic Management Plan shall be prepared in conjunction with the New Zealand Transport Agency and submitted to Council for approval. The Construction Traffic Management Plan shall incorporate:
(i) Proposed construction haulage routes;
(ii) Construction traffic volumes over haulage routes.

E.2 Airport Approach and Land Use Controls

This designation applies in respect of the airspace in the vicinity of the Wanaka Airport. It defines essential airport protection measures, transitional slopes and surfaces, aircraft take off climb and approach slopes and airport height and obstacle clearances as defined below and as shown on District Plan Maps.

The objective of these restrictions is to limit any activity and the construction of any structure which may inhibit the safe and efficient operation of the Wanaka Airport. These restrictions directly relate to the main runway and runway extension specified in Designation 64 - Aerodrome Purposes and the future alternative parallel runway. The strip and RESA end locations of the existing, extended and replacement runway are contained in Table 1 below:

<table>
<thead>
<tr>
<th>Location</th>
<th>Co-ordinates (NZMG)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Existing runway south east strip end</td>
<td>5602307.23  2213157.69</td>
</tr>
<tr>

<td>5603250.88  2212232.91</td>
</tr>
<tr>
<td>Extended runway north west RESA end</td>
<td>5603815.09  2211679.99</td>
</tr>
<tr>
<td>Replacement runway south east RESA end</td>
<td>5602236.60  2213357.12</td>
</tr>
<tr>
<td>Replacement runway north west RESA end</td>
<td>5603880.18  2211746.41</td>
</tr>
</tbody>
</table>

Airport Protection
The airport protection surfaces are described as:

(a) **Take-off Climb and Approach Surfaces**

**General**

In order to provide the maximum flexibility for the existing and future development of the runway layout, the protection surfaces and associated height controls extend laterally to include the existing sealed runway as well as the proposed replacement sealed runway. This requires the length of the origin points of the OLS (referred to as ‘inner edges’) to be 243.0m being 121.5m either side of the inner edge centreline position defined in Table 2 below.

For this reason the area that is covered be height controls is larger than would be the case with a single runway that was not planned to be extended or replaced.

The nominal centreline of this enlarged inner edge arrangement is 46.50m north east of the existing runway centreline and the ends of the inner edges and 121.50m either side of the centreline.

**Table 2: Location of inner edge centre points**

<table>
<thead>
<tr>
<th>Inner Edge</th>
<th>Co-ordinates (NZMG)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>X</td>
</tr>
<tr>
<td>South east end</td>
<td>5602375.47</td>
</tr>
<tr>
<td>North west end</td>
<td>5603676.22</td>
</tr>
</tbody>
</table>

The runway strip edges are 75m south west of and parallel to the existing runway centreline and 75m north east of and parallel to the future replacement runway centreline. For height control purposes the strip edges end where they intersect the inner edges of the approach surfaces.

South East End of Existing and Future Main Runways

(i) **Inner edge location**

The south east takeoff and approach surfaces are combined into a single takeoff/approach surface.

The takeoff and approach surfaces have the same inner edge location (as defined in table 2) and length of 243.0m.

The inner edge commences at a height of 339.4m AMSL at the south east end.

(ii) **Takeoff/Approach Surface**

The take-off/approach surface at the south eastern end commences at the inner edge and rises at a gradient of 2.0% with its centreline on a bearing of 135.6° grid. The surface continues on a bearing of 135.6° until a distance of 15,000m from the inner edge.

The edges of the approach surface commence at the inner edge end point locations and expand outward at 15% of the distance along the centreline until the end of the surface.

The final total width of the approach surface is 4743.0m at 15,000m from its inner edge.

North West End of Future Main Runway

(iii) **Inner edge location**

The north west takeoff and approach surfaces are combined into a single takeoff/approach surface.

The takeoff/approach surface inner edge location is defined in table 2 and its length is 243.0m.

The inner edge commences at a height of 347.84m AMSL at the north west end.

(iv) **Takeoff/approach Surface**
The combined takeoff/approach surface at the north west end commences at the inner edge and rises at a gradient of 2.0% with its centreline on a bearing of 315.6° grid. The surface continues on a bearing of 315.6° until a distance of 4,780m from the inner edge. At that point the surface turns 195° north with a radius of 2400m and continues on a bearing of 150.6°.

The edges of the surface commence at the inner edge end point location and expand outward at 15% of the distance along the centreline until the end of the surface 15,000m from the inner edge.

The final total width of the surface is 4743.0m at 15,000m from its inner edge.

(b) Transitional, Inner Horizontal and Conical Surfaces

The transitional, inner horizontal and conical surfaces described below are based on the extremities of the runway strip edges for the combined existing and future parallel runways. The strip edge on the north east is 75m to the north east of and parallel to the proposed alternative runway centreline. The strip edge on the south west side is 75m to the south west of and parallel to the existing runway centreline.

For height control purposes the strip edges end where they meet the inner edges of the approach surfaces.

(i) Transitional Side Surfaces

The transitional side surfaces extend from the sides of the strip and the approach surfaces, upwards and outwards at a gradient of 1v:7h (14.3%) extending until they reach the inner horizontal surface.

(ii) Inner Horizontal Surface

The inner horizontal plane is located at a height of 393m AMSL (45m above the runway reference height) and extends out to a distance of 4000m measured from the periphery of the runway strip.

(iii) Conical Surface

The conical surface slopes upward and outward from the periphery of the inner horizontal surface rising at a gradient of 5% to a height of 498m AMSL (150m above the aerodrome reference height).

Penetration of airport protection surfaces

No object, including any building, structure, mast, pole or tree, but excluding a control tower, shall penetrate the takeoff/approach or transitional surfaces without prior approval of the requiring authority.

No object, including any building, structure, mast, pole, or tree shall penetrate the horizontal and conical surfaces except with prior approval of the requiring authority, or where the object is determined to be shielded by an existing immovable object in accordance with recognised aeronautical practice.

If requested by a landowner with a site specific development proposal affected by the obstacle limitation surfaces, the requiring authority shall provide them with a terrain shielding drawing for that portion of their site.

Note: any person proposing to construct or alter a structure that penetrates the airspace protection surfaces described in this designation is subject to the requirements of Part 77 of the Civil Aviation Rules and must notify the director of Civil Aviation Rules and must notify the director of Civil Aviation 90 days before the proposed date of commencement of construction or alteration. Notification must be in the form specified in Rule 77-13 and be submitted at least 90 days before the proposed date of commencement of construction or alteration.

F Motor Parks and Golf Clubs

1. Setback from Road

All structures and buildings shall be setback the following minimum distances from the road boundary:

- Residential Zones: 4.5m
- Rural Zone: 20m
2. **Separation from Neighbours**

All structures and buildings shall be setback the following minimum distances from internal boundaries:

- Residential Zones: 4.5m
- Rural Zones: 10m

3. **Height**

No structure or building shall exceed the following maximum heights:

- Residential Zones: 8m
- Rural Zones: 8m

4. **Recession Lines**

Within residential zones, or on boundaries adjoining a residential zone, buildings shall not project beyond a building envelope constructed by a recession line inclined towards the site at an angle of 25 degrees and commencing at 2.5m above ground level at any given point along each internal boundary.

5. **Building Coverage**

A single building shall not exceed 600m² in total floor area. The combined total of all buildings on site shall not exceed a maximum of 5% of the total site area for golf clubs and 40% of the total site area for motor parks. These standards are exclusive of play equipment.

6. **Access and Car parking**

Shall be provided in accordance with the transport rules.

7. **Surfacing**

No more than 25% of the site shall be covered by impervious surfaces, including courts, footpaths, swimming pools, car-parking areas and/or areas under lease arrangements.

8. **Glare**

All exterior lighting shall be directed away from adjacent properties and roads.

No activity shall result in greater than a 2.5 lux spill (horizontal and vertical) of light on to any adjoining property in Residential or Rural-Residential Zone, measured 2m inside the boundary of the adjoining property.

9. **Noise**

Activities, other than outdoor recreation, shall be conducted such that the following noise levels are not exceeded at the boundary of the site:

- Residential Zones:
  - * 0800 - 2000 40 dBA L10
  - * 2000 - 0800 30 dBA L10

- Rural Zones:
  - * 0800 - 2000 55 dBA L10
  - * 2000 - 0800 40 dBA L10

**G Recreation Reserves**

1. **Setback from Road**

All structures and buildings shall be setback from the road boundary as follows:

- All Zones except Rural and Town Centre: 5m
- Rural Zones: 20m

2. **Separation from Neighbours**

All structures and buildings shall be setback from internal boundaries as follows:

- All Zones except Rural and Town Centre: 5m, except for buildings necessary for the storage of equipment used for the maintenance of reserves which may be sited as a residential accessory building.
- Rural Zones: 10m
3 Height
No structure or building shall exceed the following maximum heights:

<table>
<thead>
<tr>
<th>Zone</th>
<th>Height</th>
</tr>
</thead>
<tbody>
<tr>
<td>All Zones except Rural and Town Centre</td>
<td>8m</td>
</tr>
<tr>
<td>Rural Zones</td>
<td>10m</td>
</tr>
<tr>
<td>Queenstown Town Centre Zone</td>
<td>8m</td>
</tr>
</tbody>
</table>

4 Recession Lines
Within Residential and Township Zones or on boundaries adjoining a residential or township zone, buildings shall not project beyond a building envelope constructed by a recession line inclined towards the site at an angle of 25 degrees and commencing at 2.5m above ground level at any given point along each internal boundary.

5 Site Coverage
A single building shall not exceed 100m² in total floor area. The combined total of all buildings on site shall not exceed a maximum of 5% of the total site area. These standards are exclusive of play equipment.

6 Access and Parking
Shall be provided in accordance with the general Transport Rules.

7 Surfacing
No more than 30% of the site area in all Zones except Rural and Town Centre and 20% of the site area in Rural Zones shall be covered by impervious surfaces, including courts, footpaths, swimming pools, car-parking areas and/or areas under lease arrangements.

8 Glare
All exterior lighting shall be directed away from adjacent properties and roads.

No activity shall result in greater than a 2.5 lux spill, horizontal and vertical, of light on to any adjoining property in all Zones except Rural and Town Centre, measured 2 metres inside the boundary of the adjoining property.

9 Noise
Activities, other than outdoor recreation, shall be conducted such that the following noise levels are not exceeded at the boundary of the site:

<table>
<thead>
<tr>
<th>Zone</th>
<th>Daytime</th>
<th>Nighttime</th>
</tr>
</thead>
<tbody>
<tr>
<td>All Zones except Rural</td>
<td>40 dBA</td>
<td>30 dBA</td>
</tr>
<tr>

</table>

10 Hours of Operation
Where a site adjoins or faces a residential area no activities shall be conducted from the site between the hours of midnight and 7am.

H LOT 13 DP 322851 & LOT 312 DP329276

1. (Transpower’s Development Free Zone) All trees/vegetation (in excess of 1 metre in height) and/or buildings/structures on Lot 13 DP 322851 and Lot 312 DP 329276 shall be setback by a horizontal distance of at least 12 metres either side (total of 24 metres) from the centre line of the Cromwell – Frankton A transmission line.

2. (NZECP 34:2001 safe distances from conductors where engineering advice is necessary) Prior to construction, the Requiring Authority must submit to the Queenstown Lakes District Council (and a copy to Transpower) certification from a suitably qualified electrical engineer confirming that any building or structure on Lot 13 DP 322851 and Lot 312 DP 329276 complies with the minimum safe distances from the Cromwell – Frankton A line as specified in Table 3 of the NZECP 34:2001.

3. (NZECP 34:2001 safe distances from support structures) Buildings or any part of a building on Lot 312 DP 329276 shall not be located within 12 metres of the closest visible edge of any high voltage transmission line support structure foundation.

4. (NZECP 34:2001 safe distances from support structures - fences) With reference to NZECP 34:2001 Figure 2, fences of conductive materials
shall not be constructed within 5 metres of any tower of a high voltage overhead electric line of 66 kV or greater.

5. (NZECP 34:2001 safe distances of mobile plant from conductors) All machinery and mobile plant operated on Lot 13 DP 322851 and Lot 312 DP 329276 shall maintain a minimum clearance distance of 4 metres from the Cromwell – Frankton A transmission line conductors at all times.

6. (NZECP 34:2001 access to support structures) All buildings, structures and vegetation located on Lot 312 DP 329276 shall not be located to preclude existing vehicle access to the existing support structure on site.

7. (NZECP 34:2001 excavation near support structures) In the case of any tower supporting any conductor, no person may excavate or otherwise interfere with any land:
   a. at a depth greater than 300mm within 6 metres of the outer edge of the visible foundations of the tower; or
   b. at a depth greater than 3 metres, between 6 metres and 12 metres of the outer edge of the visible foundation of the tower; or
   c. in such a way as to create an unstable batter.

8. (NZECP 34:2001 safe distances of conductors from ground) Excavated or other material must not be deposited under or near the Cromwell – Frankton A line so as to reduce the vertical distance from the ground to the conductors to a distance less than:
   a. 7.5 metres vertically, across or along driveways or on any other land traversable by vehicles;
   b. 6.0 metres vertically, on any land not traversable by vehicles due to inaccessibility; and
   c. 4.5 metres in any distance other than vertical on all land.

Please note that the distances specified include an allowance for mechanic creep (i.e. permanent elongation).

9. On Lot 13 DP 322851 and Lot 312 DP 329276 all tree trimming activities around the Cromwell – Frankton A transmission line, shall be carried out in accordance with the Electricity (Hazards from Trees) Regulations 2003.

10. All land use activities, including earthworks located on Lot 13 DP 322851 and Lot 312 DP 329276 must comply with the New Zealand Code of Practice for Electrical Safe Distances (NZECP 34:2001).

11. All trees and vegetation planted on Lot 13 DP 322851 and Lot 312 DP 329276 must comply with the Electricity (Hazards from Trees) Regulations 2003.
