## 41.1 Zone Purpose

The purpose of the Jacks Point Zone is to provide for residential, rural living, commercial, community and visitor accommodation in a high quality sustainable environment comprising residential areas, two mixed use villages and a variety of recreation opportunities and community benefits including access to public open space and amenities.

The village areas and associated residential activities at Jacks Point will be sustainable in their nature, constituting mixed density development, best practice methods of waste disposal and longevity in their quality and built form. The preparation of development controls and non-regulatory design guidelines, in conjunction with provisions of the District Plan and other methods, will ensure provision for the social, economic and cultural wellbeing of the wider community, while also assisting in ecological enhancement and the seamless integration of the built and natural environment.

In addition, the zoning anticipates an 18-hole championship golf course, a luxury lodge, small-scale commercial activities, provision for community facilities, craft and winery activities, outdoor recreation and enhanced access to and enjoyment of Lake Wakatipu.

- b. reduction in grazing around wetland areas; and
- c. the provision of links between grey shrublands, wetlands and the lakeshore escarpment, including indigenous vegetation links between Activity Areas where appropriate.

41.2.1.25 Ensure that development within the ecologically sensitive areas of the zone results in a net environmental gain.

41.2.1.26 Ensure that subdivision, development and ancillary activities within the Tablelands Landscape Protection Area maintain the character of the landscape.

41.2.1.27 Ensure substantial native revegetation of the gully within the Open Space Foreshore (OSF) Activity Area within Homestead Bay and the Homesite (HS) Activity Areas.

41.2.1.28 Ensure that use and development within Homesites HS<sub>38</sub> to HS<sub>56</sub> and any adjoining area of OSL or OSG, maintains and enhances the indigenous biodiversity, ecological values landscape character, and visual amenity values of these Homesites and this part of the Tablelands Landscape Protection Area through the implementation of a Vegetation Management Strategy.

41.2.1.30 Provide for the development of lakeside activities and low density residential development in the Homestead Bay area, in a manner which complements and enhances amenity values.

41.2.1.31 Ensure that use and development within Homesite Activity Areas HS<sub>39</sub> and HS<sub>40</sub> maintains or enhances the landscape character and visual amenity values of the Tablelands Landscape Protection Area, and protects the values of the Outstanding Natural Landscape, by:

- Ensuring building development is not visually prominent when viewed from State Highway 6, other Homesites within the Tablelands Landscape Protection Area, the access road to the Homesites, the Lodge Activity Areas, the Queenstown Trail, and the Jacks Point residential activity areas, recognising that buildings will be visible from these areas;
- Ensuring vehicle access harmonises with the landform, including by establishing native tree and shrub planting to mitigate visibility and utilising shared accessways as much practical;
- Avoiding light spill beyond the Homesite;
- Requiring the planting of predominantly indigenous vegetation species to enhance indigenous biological diversity, and build on existing ecological patterns, including wetland and grey shrubland habitats in accordance with Vegetation Management Strategy; and

- Does not detract from the visual amenity and open space values when viewed from the urban areas of Queenstown; is not visible from within residential activity areas of the Jacks Point Zone; and that the visual effects of effects of building development from Lake Wakatipu are restricted to views obtained from a distance of greater than 1.4 km;
- Is accessed by the private accessway shown on the Structure Plan (41.7) which is consistent in appearance to a simple farm type accessway, which incorporates native tree and shrub planting that screens it from views beyond Homesite 58;
- Avoids light spill beyond Homesite 58; and
- Enhances the nature conservation values, landscape values, and biodiversity values of HS58 and the adjoining OSL Activity Area through planting designed to reinforce existing landform and vegetation patterns.
