MEDIUM DENSITY RESIDENTIAL 8

Note: the annotations in this chapter reflect the Council's interpretation of the provisions affected by appeals.

8.1 Zone Purpose

The Medium Density Residential Zone has the purpose of providing land for residential development at greater density than the Lower Density Suburban Residential Zone. In conjunction with the High Density Residential Zone and Lower Density Suburban Residential Zone, this zone will play a key role in minimising urban sprawl and increasing housing supply. The zone will primarily accommodate residential land uses, but may also support limited non-residential activities where these enhance residential amenity or support an adjoining Town Centre, and do not impact on the primary role of the zone to provide housing supply.

The zone is situated in locations in Queenstown, Frankton, Arrowtown, Wānaka and Hāwea that are within identified urban growth boundaries, and easily accessible to local shopping zones, town centres or schools by public transport, cycling or walking. The Medium Density Residential Zone provides for an increased density of housing in locations that are supported by adequate existing or planned infrastructure.

The zone will enable a greater supply of diverse housing options for the District. The main forms of residential development anticipated are terrace housing, semi-detached housing and detached townhouses on small sites of 250m² or greater. The zone will undergo changes to existing densities and built form characteristics over time to provide for the social, economic, cultural and environmental wellbeing of the District's community. In particular, the zone will provide a greater diversity of housing options for smaller households including single persons, couples, small young families and older people seeking to downsize. It will also enable more rental accommodation for the growing population of transient workers in the District.

While providing for a higher density of development than is anticipated in the Lower Density Suburban Residential Zone, the zone incorporates development controls to ensure that the reasonable maintenance of amenity values is maintained. Building height will be generally two storeys.

Development will be required to achieve high standards of urban design, providing site responsive built forms and utilising opportunities to create vibrant public spaces and active transport connections (walking and cycling). In Arrowtown, where a resource consent is required, consideration will need to be given to the town's special character, and the design criteria identified by the Arrowtown Design Guidelines 2016.

Community activities are anticipated given the need for such activities within residential areas and the high degree of accessibility of the zone for residents.

Visitor accommodation is anticipated in the Visitor Accommodation Sub-Zones shown on the District Plan web mapping application, which have historically provided (and will continue to provide) important locations for visitor accommodation to meet the District's needs, and in the Wānaka Town Centre Transition Overlay. The sub-zones are located in residential areas, and applications for visitor accommodation activities and associated development must address matters that impact on residential amenity, including character, traffic and noise effects.

Visitor accommodation located outside of the Visitor Accommodation Sub-Zones and the Wānaka Town Centre Transition Overlay is restricted, although residential visitor accommodation is provided for in proximity to the Wānaka town centre.

The commercial letting of residential properties as short-term accommodation for paying guests on a year-round or permanent basis is restricted, where it would result in a loss of residential character,

MEDIUM DENSITY RESIDENTIAL 8

cohesion and amenity values. Low intensity use of residential units, including residential flats, to accommodate paying guests is enabled, where the predominant residential character of the environment is retained and the residential values amenity of nearby residents are maintained.

Visitor accommodation is defined in the District Plan separately from accommodation activities involving paying guests occurring in residential units and residential flats, which are defined as Residential Visitor Accommodation and Homestay activities.

8.2 Objectives and Policies

8.2.1 Objective-- Medium density development occurs close to employment centres which encourage travel via non-vehicular modes of transport or via public transport.

Policies

8.2.1.1 Provide opportunities for medium density housing close to town centres, local shopping zones, activity centres and public transport routes.

8.2.1.2 Provide for compact development forms that encourage a diverse housing supply and contribute toward containing the outward spread of residential growth away from employment centres.

8.2.1.3 Enable increased densities where they are located within easy walking distance of employment centres and public transport routes, subject to environmental constraints including local topography, stability and waterways, that may justify a limitation in density or the extent of development.

8.2.1.4 Enable medium density development through a variety of different housing forms including terrace, semi-detached, duplex, townhouse, or small lot detached housing.

8.2.2 Objective-- Development contributes to the creation of a new, high quality built character within the zone through quality urban design solutions which positively respond to the site, neighbourhood and wider context.

Policies

8.2.2.1 Ensure buildings address streets and other adjacent public space with limited presentation of unarticulated blank walls or facades to the street(s) or public space(s).

MEDIUM DENSITY RESIDENTIAL 8

- 8.2.2.2 Require visual connection with the street through the inclusion of windows, outdoor living areas, low profile fencing or landscaping.
- 8.2.2.3 Ensure street frontages are not dominated by garaging through consideration of their width, design and proximity to the street boundary.
- 8.2.2.4 Ensure developments reduce visual dominance effects through variation in facades and materials, roof form, building separation and recessions or other techniques.
- 8.2.2.5 Ensure landscaped areas are well designed and integrated into the design of developments, providing high amenity spaces for residents, and to soften the visual impact of development, with particular regard to any street frontage(s).
- 8.2.2.6 Require consideration of the relevant design elements identified in the Residential Zone Design Guide 2021.

8.2.3 Objective-- Development provides high quality living environments for residents and provides reasonable maintenance of amenity values enjoyed on adjoining sites taking into account the changed future character intended within the zone.

Policies

- 8.2.3.1 Apply permitted activity and resource consent requirements based on recession plane, building height, setbacks and site coverage controls as the primary means of ensuring reasonable maintenance of neighbours' privacy and amenity values.
- 8.2.3.2 Where a resource consent is required for new development, reasonably minimise the adverse effects of the new development on the amenity values enjoyed by occupants of adjoining sites, and have particular regard to the maintenance of privacy for occupants of the development site and neighbouring sites through the application of setbacks, offsetting of habitable room windows from one another, screening or other means.
- 8.2.3.3 Ensure development along the western side of Designation 270¹ has the least possible impact on views from the formed walkway to the west toward Lake Wānaka and beyond, and generally limit development on land immediately adjoining the western side of Designation 270 to the permitted building height, recession plane, site coverage and setback limits (including between units) to achieve this.

8.2.4 Objective-- In Arrowtown medium density development occurs in a manner compatible with the town's character.

¹ Running south from Aubrey Road, Wanaka

MEDIUM DENSITY RESIDENTIAL 8

Policies

8.2.4.1 Ensure development, including infill housing, community activities and commercial development is of a form that is compatible with the existing character of Arrowtown guided by the Arrowtown Design Guidelines 2016 with particular regard given to:

- a. building design and form;
- b. scale, layout and relationship of buildings to the street frontage(s);
- c. materials and landscape response(s) including how landscaping softens the building mass relative to any street frontage(s).

8.2.4.2 Avoid flat roofed dwellings in Arrowtown.

8.2.5 Objective-- Development efficiently utilises existing infrastructure and minimises impacts on infrastructure networks.

8.2.6 Objective - Community activities serving the needs of people within the zone locate within the zone on sites where adverse effects are compatible with residential amenity values.

Policies

- 8.2.6.1 Enable the establishment of community activities where adverse effects on residential amenity values including noise, traffic, lighting, glare and visual impact can be avoided or mitigated.
- 8.2.6.2 Ensure any community activities occur in areas which are capable of accommodating traffic, parking and servicing to a level which maintains residential amenity values.
- 8.2.6.3 Ensure any community activities are of a design, scale and appearance compatible with a residential context.

8.2.7 Objective - Commercial development is small scale and generates minimal adverse effects on residential amenity values.

Policies

- 8.2.7.1 Provide for commercial activities, including home occupation activities, that directly serve the day-to-day needs of local residents, or enhance social connection and vibrancy of the residential environment, provided these do not undermine residential amenity values or the viability of any nearby Town Centre.
- 8.2.7.2 Ensure that any commercial development is of low scale and intensity, and does not undermine the local transport network or availability of on-street vehicle parking for non-commercial use.
- 8.2.7.3 Ensure that the noise effects from commercial activities are compatible with the surrounding environment and residential amenity values.

MEDIUM DENSITY RESIDENTIAL 8

8.2.7.4 Ensure that commercial development is of a design, scale and appearance that is compatible with its surrounding residential context.

8.2.8 Objective - A high quality residential environment at Frankton North that is integrated with the surrounding roading network, pedestrian and cycle access, and appropriate servicing.

Policies

8.2.8.1 Ensure subdivision and development is undertaken in accordance with the Frankton North Structure Plan (Schedule 27.13.9) to promote integration and provision of access to and throughout Frankton North.

8.2.8.2 Encourage a low impact stormwater design that utilises on-site treatment and storage / dispersal approaches.

8.2.8.3 Avoid the impacts of stormwater discharges on the State Highway network.

8.2.8.4 Provide for safe transport connections that:

- a. avoid any new access to the State Highway;
- b. integrate with the pedestrian and cycle path as shown on the Frankton North Structure Plan (Schedule 27.13.9). and the road network and public transport routes on the southern side of State Highway 6; and
- c. ensure that, where direct access to the primary road shown on the Frankton North Structure Plan (Schedule 27 .13.9) is not available, the standard and layout of Internal Road connections are of a form that accounts for long-term traffic demand without the need for subsequent retrofitting or upgrade.

Note: Attention is drawn to the need to consult with the New Zealand Transport Agency (NZTA) prior to determining an internal and external road network design under this policy.

Note: Attention is drawn to the need to obtain a Section 93 notice from the NZ Transport Agency for all subdivisions on adjoining State Highways which are declared Limited Access Roads. The NZ Transport Agency should be consulted and a request made for a notice under Section 93 of the Government Roding Powers Act 1989.

MEDIUM DENSITY RESIDENTIAL 8

8.2.9 Objective – Non-residential developments which support the role of the Town Centre and are compatible with the transition to residential activities are located within the Wānaka Town Centre Transition Overlay.

Policies

8.2.9.1 Enable non-residential activities to establish in a discrete area of residential-zoned land adjoining the Wānaka Town Centre, where these activities suitably integrate with and support the role of the Town Centre.

8.2.9.2 Require non-residential and mixed use activities to provide a quality built form which activates the street, minimises the visual dominance of parking and adds visual interest to the urban environment.

8.2.9.3 Ensure the amenity values of adjoining residential properties outside of the Wānaka Town Centre Transition Overlay are maintained through design and the application of setbacks.

8.2.10 Objective – Manage the development of land within noise affected environments to ensure mitigation of noise and reverse sensitivity effects.

Policies

8.2.10.1 Require as necessary all new and altered buildings for Activities Sensitive to Road Noise located close to any State Highway to be designed to provide protection from sleep disturbance and to otherwise maintain reasonable amenity values for occupants.

8.2.10.2 Require all new and altered buildings containing an Activity Sensitive to Aircraft Noise (ASAN) located within the Queenstown Airport Air Noise Boundary or Outer Control Boundary to be designed and built to achieve an internal design sound level of 40 dB Ldn.

8.2.11 Objective - Visitor accommodation, residential visitor accommodation and homestays are enabled at locations, and at a scale, intensity and frequency, that maintain the residential character and amenity values of the zone.

8.2.11.1 Provide for visitor accommodation and residential visitor accommodation in the Visitor Accommodation Sub-Zones and the Wānaka Town Centre Transition Overlay Sub-Zones, and for residential visitor accommodation in proximity to the Wānaka town centre, that are appropriate for the medium density residential environment, ensuring that adverse effects on residential amenity values are avoided, remedied or mitigated.

8.2.11.2 Restrict the establishment of visitor accommodation in locations outside the Visitor Accommodation Sub-Zones and the Wānaka Town Centre Transition Overlay to ensure that the zone maintains a residential character.

8.2.11.3 Ensure that residential visitor accommodation and homestays are of a scale and character that are compatible with the surrounding residential context and maintain residential character and amenity values.

MEDIUM DENSITY RESIDENTIAL 8

8.2.11.4 Manage the effects of residential visitor accommodation and homestays outside the Visitor Accommodation Sub-Zone by controlling the scale, intensity and frequency of use and those effects that differentiate them from residential activities.

8.2.11.5 Provide opportunities for low intensity residential visitor accommodation and homestays as a contributor to the diversity of accommodation options available to visitors and to provide for social and economic wellbeing.

8.3 Other Provisions and Rules

8.3.1 District Wide

Attention is drawn to the following District Wide chapters.

8.3.2 Interpreting and Applying the Rules

8.3.2.1 A permitted activity must comply with all the rules listed in the Activity and Standards tables, and any relevant district wide rules, otherwise a resource consent will be required.

8.3.2.2 Where an activity does not comply with a Standard listed in the Standards table, the activity status identified by the Non-Compliance Status column shall apply.

8.3.2.3 Where an activity breaches more than one Standard, the most restrictive status shall apply to the Activity.

8.3.2.4 Additional activities are provided for in the Wānaka Town Centre Transition Overlay and apply in addition to the other activities provided for throughout the zone. In the event of any inconsistency arising, the more specific Wānaka Town Centre Transitional Overlay rules shall prevail.

8.3.2.5 Proposals for development resulting in more than one (1) residential unit per site shall demonstrate that each residential unit is fully contained within the identified net area for each unit.

MEDIUM DENSITY RESIDENTIAL 8

- 8.3.2.6 Each residential unit may include a single residential flat and any other accessory buildings.
- 8.3.2.7 The status of any Plantation Forestry will be determined by the Resource Management (National Environmental Standards for Plantation Forestry) Regulations 2017.
- 8.3.2.8 References to Visitor Accommodation Sub-Zones in this Chapter only apply to the sub-zones within the Medium Density Residential Zone.
- 8.3.2.9 The following abbreviations are used within this Chapter.

P	Permitted	C	Controlled
RD	Restricted Discretionary	D	Discretionary
NC	Non Complying	PR	Prohibited

- 8.3.2.9A Compliance with the New Zealand Electrical Code of Practice for Electrical Safe Distances ("NZECP34:200") is mandatory under the Electricity Act 1992. All activities, such as buildings, earthworks and conductive fences regulated by NZECP34: 2001, including any activities that are otherwise permitted by the District Plan must comply with this legislation. Chapter 30 Energy and Utilities part 30.3.3.2.c has additional information in relation to activities and obligations under NZECP34:2001.
- 8.3.2.10 For sites in Arrowtown, the Arrowtown Design Guidelines 2016 apply, instead of the Residential Design Guide 2021.
