27 Subdivision and Development

Please Note: Variations to parts of this chapter have been decided by Council on 7 March 2019 as part of Stage 2 of the PDP. You can view the Stage 2 Decisions, appeals and section 274 notices on our website. The appeal and section 274 periods for the Stage 1 and 2 Decisions have closed.

27.1 Purpose

Subdivision and the resultant development enables the creation of new housing and land use opportunities, and is a key driver of the District’s economy. The council will support subdivision that is well designed, is located in the appropriate locations anticipated by the District Plan with the appropriate capacity for servicing and integrated transportation.

All subdivision requires resource consent unless specified as a permitted activity. It is recognised that subdivisions will have a variable nature and scale with different issues to address. Good subdivision design, servicing and the appropriate management of natural hazards are underpinned by a shared objective to create healthy, attractive and safe places.

Good subdivision can help to create neighbourhoods and places that people want to live or work within, and should also result in more environmentally responsive development that reduces car use, encourages walking and cycling, and maximises access to sunlight.

Good subdivision design will be encouraged by the use of the QLDC Subdivision Design Guidelines 2015. The QLDC Subdivision Design Guidelines includes subdivision and urban design principles and outcomes that give effect to the objectives and policies of the Subdivision and Strategic Directions Chapters, in both designing and assessing subdivision proposals in urban areas. Proposals at odds with this document are not likely to be consistent with the policies of the Subdivision and Strategic Directions chapters, and therefore, may not achieve the purpose of the Act. Some aspects of the Subdivision Design Guidelines may be relevant to rural subdivisions.

The QLDC Land Development and Subdivision Code of Practice provides assistance in the design of subdivision and development infrastructure in the District and should also be considered by subdivision applicants.

The Council uses its Development Contributions Policy set out in its 10 Year Plan to fix the contributions payable by subdividers for infrastructure upgrades. That policy operates in parallel with the provisions of this chapter and should also be referred to by subdivision consent applicants.

The subdivision chapter is the primary method to ensure that the District’s neighbourhoods are quality environments that take into account the character of local places and communities.

27.2 Objectives and Policies – District Wide

27.2.1 Objective - Subdivision that will enable quality environments to ensure the District is a desirable place to live, visit, work and play.

Policies

27.2.1.1 Require subdivision infrastructure to be constructed and designed so that it is fit for purpose, while recognising opportunities for innovative design.
27.2.1.2 Enable urban subdivision that is consistent with the QLDC Subdivision Design Guidelines 2015, recognising that good subdivision design responds to the neighbourhood context and the opportunities and constraints of the application site.

27.2.1.3 Require that allotments are a suitable size and shape, and are able to be serviced and developed for the anticipated land use under the applicable zone provisions.

27.2.1.4 Discourage non-compliance with minimum allotment sizes. However, where minimum allotment sizes are not achieved in urban areas, consideration will be given to whether any adverse effects are mitigated or compensated by providing:
   a. desirable urban design outcomes;
   b. greater efficiency in the development and use of the land resource;
   c. affordable or community housing.

27.2.1.5 Recognise that there is an expectation by future landowners that the key effects of and resources required by anticipated land uses will have been resolved through the subdivision approval process.

27.2.1.6 Ensure the requirements of other relevant agencies are fully integrated into the subdivision development process.

27.2.1.7 Recognise there will be certain subdivision activities, such as boundary adjustments, that will not require the provision of services.

27.2.2 Objective - Subdivision design achieves benefits for the subdivider, future residents and the community.

Policies

27.2.2.1 Ensure subdivision design in urban areas provides a high level of amenity for future residents by aligning roads and allotments to maximise sunlight access.

27.2.2.2 Ensure subdivision design maximises the opportunity for buildings in urban areas to front the road.

27.2.2.3 Locate open spaces and reserves in appropriate locations having regard to topography, accessibility, use and ease of maintenance, while ensuring these areas are a practicable size for their intended use.

27.2.2.4 Urban subdivision shall seek to provide for good and integrated connections and accessibility to:
   a. existing and planned areas of employment;
   b. community facilities;
   c. services;
   d. trails;
   e. public transport; and
f. existing and planned adjoining neighbourhoods, both within and adjoining the subdivision area.

27.2.2.5 Urban subdivision design will integrate neighbourhoods by creating and utilising connections that are easy and safe to use for pedestrians and cyclists and that reduce vehicle dependence within the subdivision.

27.2.2.6 Encourage innovative subdivision design that responds to the local context, climate, landforms and opportunities for views or shelter.

27.2.2.7 Promote informal surveillance for safety in urban areas through overlooking of open spaces and transport corridors from adjacent sites and dwellings and by effective lighting.

27.2.2.8 Manage subdivision within the National Grid Corridor or near to electricity distribution lines to facilitate good amenity and urban design outcomes, while minimising potential adverse effects (including reverse sensitivity effects) on the National Grid and avoiding, remedying or mitigating potential adverse effects (including reverse sensitivity effects) on electricity distribution lines.

27.2.3 Objective - The potential of small scale and infill subdivision in urban areas is recognised and provided for while acknowledging their design limitations.

Policies

27.2.3.1 Accept that small scale subdivision in urban areas, (for example subdivision involving the creation of fewer than four allotments), and infill subdivision where the subdivision involves established buildings, might have limited opportunities to give effect to policies 27.2.2.4, 27.2.2.5 and 27.2.2.7.

27.2.3.2 While acknowledging potential limitations, encourage small scale and infill subdivision in urban areas to:

a. ensure lots are shaped and sized to allow adequate sunlight to living and outdoor spaces, and provide adequate on-site amenity and privacy;

b. where possible, locate lots so that they over-look and front road and open spaces;

c. avoid the creation of multiple rear sites, except where avoidance is not practicable;

d. where buildings are constructed with the intent of a future subdivision, encourage site and development design to maintain, create and enhance positive visual coherence of the development with the surrounding neighbourhood;

e. identify and create opportunities for connections to services and facilities in the neighbourhood.

27.2.4 Objective - Natural features, indigenous biodiversity and heritage values are identified, incorporated and enhanced within subdivision design.

Policies

27.2.4.1 Incorporate existing and planned waterways and vegetation into the design of subdivision, transport corridors and open spaces where that will maintain or enhance biodiversity, riparian and amenity values.
PART 5  SUBDIVISION & DEVELOPMENT  27

27.2.4.2 Ensure that subdivision and changes to the use of land that result from subdivision do not reduce the values of heritage features and other protected items scheduled or identified in the District Plan.

27.2.4.3 Encourage subdivision design to protect and incorporate archaeological sites or cultural features, recognising these features can contribute to and create a sense of place. Where applicable, have regard to Maori culture and traditions in relation to ancestral lands, water, sites, wāhi tapu and other taonga.

27.2.4.4 Encourage initiatives to protect and enhance landscape, vegetation and indigenous biodiversity by having regard to:

a. whether any landscape features or vegetation are of a sufficient value that they should be retained and the proposed means of protection;

b. where a reserve is to be set aside to provide protection to vegetation and landscape features, whether the value of the land so reserved should be off-set against the development contribution to be paid for open space and recreation purposes.

27.2.5 Objective - Infrastructure and services are provided to new subdivisions and developments.

Policies

Transport, Access and Roads

27.2.5.1 Integrate subdivision roading with the existing road networks in a safe and efficient manner that reflects expected traffic levels and the provision for safe and convenient walking and cycling.

For the purposes of this policy, reference to ‘expected traffic levels’ refers to those traffic levels anticipated as a result of the zoning of the area in the District Plan.

27.2.5.2 Ensure safe and efficient pedestrian, cycle and vehicular access is provided to all lots created by subdivision and to all developments.

27.2.5.3 Provide linkages to public transport networks, and to trail, walking and cycling networks, where useful linkages can be developed.

27.2.5.4 Ensure the physical and visual effects of subdivision and roading are minimised by utilising existing topographical features.

27.2.5.5 Ensure appropriate design and amenity associated with roading, vehicle access ways, trails and trail connections, walkways and cycle ways are provided for within subdivisions by having regard to:

a. the location, alignment, gradients and pattern of roading, vehicle parking, service lanes, access to lots, trails, walkways and cycle ways, and their safety and efficiency;

b. the number, location, provision and gradients of access ways and crossings from roads to lots for vehicles, cycles and pedestrians, and their safety and efficiency;

c. the standard of construction and formation of roads, private access ways, vehicle crossings, service lanes, walkways, cycle ways and trails;
d. the provision and vesting of corner splays or rounding at road intersections;

e. the provision for and standard of street lighting, having particular regard to siting and location, the provision for public safety and the avoidance of upward light spill adversely affecting views of the night sky;

f. the provision of appropriate tree planting within roads in urban areas;

g. any requirements for widening, formation or upgrading of existing roads;

h. any provisions relating to access for future subdivision on adjoining land;

i. the provision and location of public transport routes and bus shelters in urban areas.

**Water supply, stormwater, wastewater**

27.2.5.6 All new lots shall be provided with connections to a reticulated water supply, stormwater disposal and/or sewage treatment and disposal system, where such systems are available or should be provided for.

**Water**

27.2.5.7 Ensure water supplies are of a sufficient capacity, including fire fighting requirements, and of a potable standard, for the anticipated land uses on each lot or development.

27.2.5.8 Encourage the efficient and sustainable use of potable water by acknowledging that the Council’s reticulated potable water supply may be restricted to provide primarily for households’ living and sanitation needs and that water supply for activities such as irrigation and gardening may be expected to be obtained from other sources.

27.2.5.9 Encourage initiatives to reduce water demand and water use, such as roof rain water capture and use and greywater recycling.

27.2.5.10 Ensure appropriate water supply, design and installation by having regard to:

a. the availability, quantity, quality and security of the supply of water to the lots being created;

b. water supplies for fire fighting purposes;

c. the standard of water supply systems installed in subdivisions, and the adequacy of existing supply systems outside the subdivision;

d. any initiatives proposed to reduce water demand and water use.

**Stormwater**

27.2.5.11 Ensure appropriate stormwater design and management by having regard to:

a. any viable alternative designs for stormwater management that minimise run-off and recognises stormwater as a resource through re-use in open space and landscape areas;

b. the capacity of existing and proposed stormwater systems;

c. the method, design and construction of the stormwater collection, reticulation and disposal systems, including connections to public reticulated stormwater systems;
PART 5  SUBDIVISION & DEVELOPMENT  27

d. the location, scale and construction of stormwater infrastructure;

e. the effectiveness of any methods proposed for the collection, reticulation and disposal of stormwater run-off, including opportunities to maintain and enhance water quality through the control of water-borne contaminants, litter and sediments, and the control of peak flow.

27.2.5.12 Encourage subdivision design that includes the joint use of stormwater and flood management networks with open spaces and pedestrian/cycling transport corridors and recreational opportunities where these opportunities arise and will maintain the natural character and ecological values of wetlands and waterways.

Wastewater

27.2.5.13 Treat and dispose of sewage in a manner that:

a. maintain public health;

b. avoids adverse effects on the environment in the first instance; and

c. where adverse effects on the environment cannot be reasonably avoided, mitigates those effects to the extent practicable.

27.2.5.14 Ensure appropriate sewage treatment and disposal by having regard to:

a. the method of sewage treatment and disposal;

b. the capacity of, and impacts on, the existing reticulated sewage treatment and disposal system;

c. the location, capacity, construction and environmental effects of the proposed sewage treatment and disposal system.

27.2.5.15 Ensure that the design and provision of any necessary infrastructure at the time of subdivision takes into account the requirements of future development on land in the vicinity.

Energy Supply and Telecommunications

27.2.5.16 Ensure adequate provision is made for the supply and installation of reticulated energy, including street lighting, and communication facilities for the anticipated land uses while:

a. providing flexibility to cater for advances in telecommunication and computer media technology, particularly in remote locations;

b. ensure the method of reticulation is appropriate for the visual amenity and landscape values of the area by generally requiring services are underground, and in the context of rural environments where this may not be practicable, infrastructure is sited in a manner that minimises visual effects on the receiving environment;

c. generally require connections to electricity supply and telecommunications systems to the boundary of the net area of the lot, other than lots for access, roads, utilities and reserves.
Easements

27.2.5.17 Ensure that services, shared access and public access is identified and managed by the appropriate easement provisions.

27.2.5.18 Ensure that easements are of an appropriate size, location and length for the intended use of both the land and easement.

Objective - Esplanades created where opportunities arise.

Policies

27.2.6.1 Create esplanade reserves or strips where they would provide nature conservation, natural character, natural hazard mitigation, infrastructural or recreational benefits. In particular, Council will encourage esplanades where they:

a. are important for public access or recreation, would link with existing or planned trails, walkways or cycleways, or would create an opportunity for public access;

b. have high actual or potential value with regard to the maintenance of indigenous biodiversity;

c. comprise significant indigenous vegetation or significant habitats of indigenous fauna;

d. are considered to comprise an integral part of an outstanding natural feature or outstanding natural landscape;

e. would benefit from protection, in order to safeguard the life supporting capacity of the adjacent lake and river;

f. would not put an inappropriate burden on Council, in terms of future maintenance costs or issues relating to natural hazards affecting the land.

27.2.6.2 Use opportunities through the subdivision process to improve the level of protection for the natural character and nature conservation values of lakes and rivers, as provided for in Section 230 of the Act.

Objective - Boundary adjustments, cross-lease and unit title subdivision are provided for.

Policies

27.2.7.1 Enable cross-lease and unit title subdivision of existing units in urban areas without the need to obtain resource consent where there is no potential for adverse effects associated with the change in boundary location.

27.2.7.2 Ensure boundary adjustment, cross-lease and unit title subdivisions are appropriate with regard to:

a. the location of the proposed boundaries;

b. in rural areas, the location of boundaries with regard to approved residential building platforms, existing buildings, and vegetation patterns and existing or proposed accesses;
c. boundary treatment;
d. the location and terms of existing or proposed easements or other arrangements for access and services.

27.3 Location-specific objectives and policies

In addition to the district wide objectives and policies in Part 27.2, the following objectives and policies relate to subdivision in specific locations.

Peninsula Bay

27.3.1 Objective - Ensure effective public access is provided throughout the Peninsula Bay land.

Policies

27.3.1.1 Ensure that before any subdivision or development occurs within the Peninsula Bay Lower Density Suburban Residential Zone, a subdivision consent has been approved confirming easements for the purposes of public access through the Open Space Zone.

27.3.1.2 Within the Peninsula Bay site, to ensure that public access is established through the vesting of reserves and establishment of easements prior to any further subdivision.

27.3.1.3 Ensure that easements for the purposes of public access are of an appropriate size, location and length to provide a high quality, recreational resource, with excellent linkages, and opportunities for different community groups.

Kirimoko

27.3.2 Objective - A liveable urban environment that achieves best practice in urban design; the protection and incorporation of landscape and environmental features into the design of the area; and high quality built form.

Policies

27.3.2.1 Protect the landscape quality and visual amenity of the Kirimoko Block and preserve sightlines to local natural landforms.

27.3.2.2 Protect the natural topography of the Kirimoko Block and incorporate existing environmental features into the design of the site.

27.3.2.3 Ensure that urban development of the site is restricted to lower areas and areas of concealed topography, such as gullies and that visually sensitive areas such as the spurs are left undeveloped.

27.3.2.4 Ensure the provision of open space and community facilities that are suitable for the whole community and that are located in safe and accessible areas.

27.3.2.5 Develop an interconnected network of streets, footpaths, walkways and open space linkages that facilitate a safe, attractive and pleasant walking, cycling and driving environment.

27.3.2.6 Provide for road and walkway linkages to neighbouring developments.

27.3.2.7 Ensure that all roads are designed and located to minimise the need for extensive cut and fill and to protect the natural topographical layout and features of the site.
27.3.2.8 Minimise disturbance of existing native plant remnants and enhance areas of native vegetation by providing linkages to other open space areas and to areas of ecological value.

27.3.2.9 Design for stormwater management that minimises run-off and recognises stormwater as a resource through re-use in open space and landscape areas.

27.3.2.10 Require the roading network within the Kirimoko Block to be planted with appropriate trees to create a green living environment appropriate to the areas.

Large Lot Residential A Zone between Studholme Road and Meadowstone Drive.

27.3.3 Objective - Landscape and amenity values of the zone’s low density character and transition with rural areas be recognised and protected.

Policies

27.3.3.1 Have regard to the impact of development on landscape values of the neighbouring rural areas and features of these areas, with regard to minimising the prominence of housing on ridgelines overlooking the Wanaka township.

27.3.3.2 Subdivision and development within land located on the northern side of Studholme Road shall have regard to the adverse effects of development and associated earthworks on slopes, ridges and skylines.

Bob’s Cove Rural Residential Zone (excluding sub-zone)

27.3.4 Objective - The special character of the Bob’s Cove Rural Residential Zone is recognised and provided for.

Policies

27.3.4.1 In order to maintain the rural character of the zone, any required street lighting shall be low in height from the ground, of reduced lux spill and directed downwards to avoid adverse effects on views of the night sky.

Wyuna Station Rural Lifestyle Zone

27.3.5 Objective - Provision for a deferred rural lifestyle zone on the terrace to the east of, and immediately adjoining, the Glenorchy Township.

Policies

27.3.5.1 Prohibit or defer development of the zone until such a time that:

   a. the zone can be serviced by a reticulated wastewater disposal scheme within the property that services both the township and proposed zone. This may include the provision of land within the zone for such purpose; or
   b. the zone can be serviced by a reticulated wastewater disposal scheme located outside of the zone that has capacity to service both the township and proposed zone; or
   c. the zone can be serviced by an on-site (individual or communal) wastewater disposal scheme no sooner than two years from the zone becoming operative on the
condition that should a reticulated scheme referred to above become available and have capacity within the next three years then all lots within the zone shall be required to connect to that reticulated scheme.

27.3.6 **Objective - Subject to Objective 27.3.5, rural living development is enabled in a way that maintains the visual amenity values that are experienced from the Glenorchy Township, Oban Street and the Glenorchy-Paradise Road.**

**Policies**

27.3.6.1 The subdivision design, identification of building platforms and associated mitigation measures shall ensure that built form and associated activities within the zone are reasonably inconspicuous when viewed from Glenorchy Township, Oban Street or the Glenorchy-Paradise Road. Measures to achieve this include:

a. prohibiting development over the sensitive areas of the zone via building restriction areas;

b. appropriately locating buildings within the zone, including restrictions on future building bulk;

c. using excavation of the eastern part of the terrace to form appropriate building platforms;

d. using naturalistic mounding of the western part of the terrace to assist visual screening of development;

e. using native vegetation to assist visual screening of development;

f. the maximum height of buildings shall be 4.5m above ground level prior to any subdivision development.

27.3.6.2 Maintain and enhance the indigenous vegetation and ecosystems within the building restriction areas of the zone and to suitably and comprehensively maintain these areas into the future. As a minimum, this shall include:

a. methods to remove or kill existing wilding exotic trees and weed species from the lower banks of the zone area and to conduct this eradication annually;

b. methods to exclude and/or suitably manage pests within the zone in order to foster growth of indigenous vegetation within the zone, on an ongoing basis;

c. a programme or list of maintenance work to be carried out on a year to year basis on order to bring about the goals set out above.

**Jacks Point Zone**

27.3.7 **Objective - Subdivision occurs consistent with the Jacks Point Structure Plan.**

**Policies**

27.3.7.1 Ensure that subdivision and development achieves the objectives and policies located within Chapter 41.

27.3.7.2 Within the R(HD) Activity Areas, subdivision design shall provide for the following matters:
a. the development and suitability of public transport routes, pedestrian and cycle trail connections within and beyond the Activity Area;

b. mitigation measures to ensure that no building will be highly visible from State Highway 6 or Lake Wakatipu;

c. road and street designs;

d. the location and suitability of proposed open spaces;

e. commitments to remove wilding trees.

27.3.7.3 Within the R(HD-SH) Activity Areas, minimise the visual effects of subdivision and future development on landscape and amenity values as viewed from State Highway 6.

27.3.7.4 Within the R(HD) Activity Area, in the consideration of the creation of sites sized less than 550m², particular regard shall be given to the following matters and whether they should be given effect to by imposing appropriate legal mechanism of controls over:

a. building setbacks from boundaries;

b. location and heights of garages and other accessory buildings;

c. height limitations for parts of buildings, including recession plane requirements;

d. window locations;

e. building coverage;

f. roadside fence heights.

27.3.7.5 Within the OS Activity Areas shown on the Jacks Point Zone Structure Plan, implement measures to provide for the establishment and management of open space, including native vegetation.

27.3.7.6 Within the R(HD) A - E Activity Areas, ensure cul-de-sacs are straight (+/- 15 degrees).

27.3.7.7 In the Hanley Downs areas where subdivision of land within any Residential Activity Area results in allotments less than 550m² in area:

a. such sites are to be configured:

i. with good street frontage;

ii. to enable sunlight to existing and future residential units;

iii. to achieve an appropriate level of privacy between homes;

b. parking, access and landscaping are to be configured in a manner which:

i. minimises the dominance of driveways at the street edge;

ii. provides for efficient use of the land;

iii. maximises pedestrian and vehicular safety; and.

iv. addresses nuisance effects such as from vehicle lights.
c. subdivision design should ensure:
   i. public and private spaces are clearly demarcated, and ownership and management arrangements are proposed to appropriately manage spaces in common ownership.

d. consideration is to be given as to whether design parameters are required to be secured through an appropriate legal mechanism. These are height, building mass, window sizes and locations, building setbacks, fence heights, locations and transparency, building materials and landscaping.

Waterfall Park

27.3.8 Objective – Subdivision that provides for a range of visitor, residential and recreational facilities, sympathetic to the natural setting and has regard to location specific opportunities and constraints identified within the Waterfall Park Structure Plan.

Policies

27.3.8.1 Enable subdivision which provides for appropriate, integrated and orderly development in accordance with the Waterfall Park Structure Plan located within Section 27.13.

Millbrook

27.3.9 Objective – Subdivision that provides for resort development while having particular regard to landscape, heritage, ecological, water and air quality values.

Policies

27.3.9.1 Enable subdivision which provides for appropriate, integrated and orderly development in accordance with the Millbrook Structure Plan located within Section 27.13.

Coneburn Industrial

27.3.10 Objective - Subdivision that creates opportunities for industrial activities and Service activities to occur.

Policies

27.3.10.1 Enable subdivision which provides for a combination of lot sizes and low building coverage to ensure that this area is retained for yard based industrial and service activities as well as smaller scale industrial and service activities.

27.3.10.2 Require the establishment, restoration and ongoing maintenance of the open space areas (shown on the Coneburn Structure Plan located in Section 27.13) to:
   a. visually screen development using the planting of native species;
   b. retain existing native garden species unless they are wilding;
   c. give effect to the Ecological Management Plan required by Rule 44.5.2 so its implementation occurs at the rate of development within the Zone.

27.3.10.3 Ensure subdivision works and earthworks results in future industrial and service development (buildings) being difficult to see from State Highway 6.
27.3.10.4  At the time of subdivision ensure that there is adequate provision for road access, onsite parking (staff and visitors) and loading and manoeuvring for all types of vehicle so as to cater for the intended use of the site.

27.3.10.5  Ensure subdivision creates lots and sites that are capable of accommodating development that meets the relevant zone standards for the Coneburn Industrial Zone.

27.3.10.6  Ensure that shared infrastructure (water, wastewater and stormwater) is provided, managed, and maintained if development cannot connect to Council services.

27.3.10.7  Require safe accesses to be provided from the State Highway into the Zone at the rate the Zone is developed.

West Meadows Drive

27.3.11  Objective - The integration of road connections between West Meadows Drive and Meadowstone Drive.

Policies

27.3.11.1  Enable subdivision at the western end of West Meadows Drive which has a roading layout that is consistent with the West Meadows Drive Structure Plan.

27.3.11.2  Enable variances to the West Meadows Drive Structure Plan on the basis that the roading layout results in the western end of West Meadows Drive being extended to connect with the roading network and results in West Meadows Drive becoming a through-road.

Frankton North

27.3.12  Objective - Subdivision of the Medium Density Residential and Business Mixed Use Zones on the north side of State Highway 6 between Hansen Road and Quail Rise enables development integrated into the adjacent urban areas while minimising traffic impacts on the State Highway.

Policies

27.3.12.1  Limit the roading access to Frankton North to Hansen Road, Ferry Hill Drive or the Hawthorne Drive/SH6 roundabout.

27.3.12.2  Ensure subdivision and development enables access to the roading network from all sites in the Frankton North Medium Density Residential and Business Mixed Use Zones and is of a form that accounts for long-term traffic demands without the need for subsequent retrofitting or upgrade.

27.3.12.3  Ensure subdivision and development in the Frankton North Medium Density Residential and Business Mixed Use Zones provides, or has access to, a safe and legible walking and cycling environment adjacent to and across the State Highway linking to other pedestrian and cycling networks.

27.4  Other Provisions and Rules

27.4.1  District Wide

The rules of the zone the proposed subdivision is located within are applicable. Attention is drawn to the following District Wide chapters.
Earthworks associated with subdivision

Refer to Chapter 25 Earthworks, Rule 25.3.2.5. Earthworks associated with subdivisions are subject to the earthworks standards in Chapter 25 (except the maximum total volume, cut and fill standards). Applications for subdivision involving earthworks shall be assessed against the matters of discretion and assessment matters in Chapter 25.

Natural Hazards

The Natural Hazards Chapter of the District Plan sets a policy framework to address land uses and natural hazards throughout the District. All subdivision is able to be assessed against a natural hazard through the provisions of section 106 of the RMA. In addition, in some locations natural hazards have been identified and specific provisions apply.

Rules - Subdivision

All subdivision requires resource consent unless specified as a permitted activity. The abbreviations set out below are used in the following tables. Any activity which is not permitted (P) or prohibited (PR) requires resource consent.

P Permitted  C Controlled  RD Restricted Discretionary
D Discretionary  NC Non-Complying  PR Prohibited

Where an activity falls within more than one rule, unless stated otherwise, its status shall be determined by the most restrictive rule.

### Boundary Adjustments

**Advice Note:**

In order to undertake such a subdivision a certificate of compliance (s139 of the Act) will need to be obtained (see s223(1)(b)).

#### 27.5.3

For boundary adjustment subdivision activities where there are two or more existing lots which each have separate Certificates of Title, new lots may be created by subdivision for the purpose of an adjustment of the boundaries between the existing lots, provided:

- a. in the case of the Rural, Gibbston Character and Rural Lifestyle Zones the building platform is retained in its approved location;
- b. no additional or relocated residential building platform is identified and approved as part of a boundary adjustment within Rural, Gibbston Character and Rural Lifestyle Zones;
- c. no additional separately saleable lots are created;
- d. the areas of the resultant lots either comply with the minimum lot size requirement for the zone (where applicable) or where any lot does not comply with an applicable minimum lot size requirement for the zone, the extent of such non-compliance is not increased; and
- e. lots must be immediately adjoining each other.

Control is reserved to:

- a. the location of the proposed boundaries;
- b. boundary treatment;
- c. easements for existing and proposed access and services.

#### 27.5.4

For boundary adjustments that either:

- a. involve any site that contains a heritage or any other protected item identified on the District Plan maps; or
- b. are within the urban growth boundary of Arrowtown;

where there are two or more existing lots which each have separate Certificates of Title, new lots may be created by subdivision for the purpose of an adjustment of the boundaries between the existing lots, provided:

- a. no additional separately saleable lots are created;
- b. the areas of the resultant lots comply with the minimum lot size requirement for the zone;
- c. lots must be immediately adjoining each other;

Discretion is restricted to:

### Unit Title or Leasehold Subdivision

**27.5.5** Where land use consent is approved for a multi unit commercial or residential development, including visitor accommodation development, and a unit title or leasehold (including cross lease) subdivision is subsequently undertaken in accordance with the approved land use consent, provided:

- a. all buildings must be in accordance with an approved land use resource consent;
- b. all areas to be set aside for the exclusive use of each building or unit must be shown on the survey plan, in addition to any areas to be used for common access or parking or other such purpose;
- c. all service connections and on-site infrastructure must be located within the boundary of the site they serve or have access provided by an appropriate legal mechanism.

Control is reserved to:

- a. the effect of the site design, size, shape, gradient and location, including existing buildings, manoeuvring areas and outdoor living spaces;
- b. the effects of and on infrastructure provision.

This rule does not apply a subdivision of land creating a separate fee simple title.

The intent is that it applies to subdivision of a lot containing an approved land use consent, in order to create titles in accordance with that consent.

### Subdivision Activities - District Wide

**27.5.6** Any subdivision that does not fall within any rule in this section 27.5.

**27.5.7** All urban subdivision activities, unless otherwise provided for, within the following zones:

1. Lower Density Suburban Residential Zone;
### Subdivision Activities - District Wide

**Queenstown Lakes District Council - Proposed District Plan Decisions Version (May 2020)**

27-28
Zone and Location Specific Rules | Activity Status
--- | ---
a. safe and effective functioning of the State Highway network; | nc
b. integration with other access points through the zones to link up to Hansen Road, Ferry Hill Drive or the Hawthorne Drive/State Highway 6 roundabout; | 
c. integration with pedestrian and cycling networks, including those across the State Highway. | 
27.7.9.2 Any subdivision activity in the Business Mixed Use Zone and Medium Density Residential Zone located north of State Highway 6 between Hansen Road and Ferry Hill Drive that does not comply with Rule 27.7.9.1. | nc

27.7.10 In the following zones, every allotment created for the purposes of containing residential activity shall identify one building platform of not less than 70m² in area and not greater than 1000m² in area.

a. Rural Zone;
b. Gibbston Character Zone;
c. Rural Lifestyle Zone;

27.7.11 The dimensions of lots in the following zones, other than for access, utilities, reserves or roads, shall be able to accommodate a square of the following dimensions:

<table>
<thead>
<tr>
<th>Zone</th>
<th>Minimum Dimensions (m²)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Residential Medium Density</td>
<td>12m x 12m</td>
</tr>
<tr>
<td>Large Lot</td>
<td>30m x 30m</td>
</tr>
<tr>
<td>All others</td>
<td>15m x 15m</td>
</tr>
<tr>
<td>Rural Residential Rural Residential (inclusive of sub-zones)</td>
<td>30m x 30m</td>
</tr>
</tbody>
</table>

27.7.12 Subdivision applications not complying with either Rule 27.7.10 or Rule 27.7.11 shall be non-complying activities.

27.7.13 Subdivision associated with infill development

The specified minimum allotment size in Rule 27.6.1, and minimum dimensions in Rule 27.11 shall not apply in the High Density Residential Zone, Medium Density Residential Zone and Lower Density Suburban Residential Zone where each allotment to be created, and the original allotment, all contain at least one established residential unit (established meaning a Building Code of Compliance Certificate has been issued or alternatively where a Building Code of Compliance Certificate has not been issued, construction shall be completed to not less than the installation of the roof).

27.7.14 Subdivision associated with residential development on sites less than 450m² in the Lower Density Suburban Residential Zone
27.7.14.1 In the Lower Density Suburban Residential Zone, the specified minimum allotment size in Rule 27.6.1 shall not apply in cases where the residential units are not established, providing:

a. a certificate of compliance is issued for a residential unit(s); or

b. a resource consent has been granted for a residential unit(s).

In addition to any other relevant matters pursuant to s221 of the Act, the consent holder shall register on the Computer Freehold Register of the applicable allotments:

a. that the construction of any residential unit shall be undertaken in accordance with the applicable certificate of compliance or resource consent (applies to the additional undeveloped lot to be created);

b. the maximum building height shall be 5.5m (applies to the additional undeveloped lot to be created).

c. there shall be not more than one residential unit per lot (applies to all lots).

27.7.14.2 Rule 27.7.14.1 shall not apply to the Lower Density Suburban Residential Zone within the Queenstown Airport Air Noise Boundary and Outer Control Boundary as shown on the planning maps.

27.7.15 Standards related to servicing and infrastructure

Water

27.7.15.1 Subject to Rule 27.7.15.3, all lots, other than lots for access, roads, utilities and reserves except where irrigation is required, shall be provided with a connection to a reticulated water supply laid to the boundary of the net area of the lot, as follows:

To a Council or community owned and operated reticulated water supply:

a. all Residential, Business, Town Centre, Local Shopping Centre Zones, and Airport Zone - Queenstown;

b. Rural Residential Zones at Wanaka, Lake Hawea, Albert Town, Luggate and Lake Hayes;

c. Millbrook Resort Zone and Waterfall Park Zone.

27.7.15.2 Where any reticulation for any of the above water supplies crosses private land, it shall be accessible by way of easement to the nearest point of supply.

27.7.15.3 Where no communal owned and operated water supply exists, all lots other than lots for access, roads, utilities and reserves, shall be provided with a potable water supply of at least 1000 litres per day per lot.

Telecommunications/Electricity

27.7.15.4 Electricity reticulation must be provided to all allotments in new subdivisions (other than lots for access, roads, utilities and reserves).
27.7.15.5 Telecommunication services must be available to all allotments in new subdivisions in the Rural Zone, Gibbston Character Zone and Rural Lifestyle Zone (other than lots for access, roads, utilities and reserves).

27.7.15.6 Telecommunication reticulation must be provided to all allotments in new subdivisions in zones other than the Rural Zone, Gibbston Character Zone and Rural Lifestyle Zone (other than lots for access, roads, utilities and reserves).

27.8 Rules - Esplanade Reserve Exemptions

27.8.1 Esplanade reserves or strips shall not be required where a proposed subdivision arises solely due to land being acquired or a lot being created for a road designation, utility or reserve or in the case of activities authorised by Rule 27.5.2.

27.9 Assessment Matters for Resource Consents

27.9.1 Boundary Adjustments

In considering whether or not to impose conditions in respect to boundary adjustments under Rule 27.5.3 and in considering whether or not to grant consent or impose conditions in respect to boundary adjustments under 27.5.4, the Council shall have regard to, but not be limited by, the following assessment criteria:

27.9.1.1 Assessment Matters in relation to Rule 27.5.3 (Boundary Adjustments)

a. whether the location of the proposed boundaries is appropriate, including in relation to their relationship to approved residential building platforms, existing buildings and vegetation patterns and existing or proposed accesses;

b. whether the site design, size, shape, gradient and location, including existing buildings, manoeuvring areas and outdoor living spaces:

i. is able to accommodate development in accordance with the relevant district-wide and zone rules; and

ii. the potential effects on the safety of pedestrians and cyclists and other users of the space or access;

c. whether any landscape features or vegetation, including mature forest, on the site are of a sufficient amenity value that they should be retained and if so, the proposed means for their protection;

d. the extent to which Policies 27.2.1.7, 27.2.3.2, 27.2.5.10, 27.2.5.11, 27.2.5.14 and 27.2.7.2 are achieved.

27.9.1.2 Assessment Matters in relation to Rule 27.5.4 (Boundary Adjustments involving Heritage Items and within Arrowtown’s urban growth boundary)

a. whether the location of the proposed boundaries is appropriate, including in relation to their relationship to existing buildings and vegetation patterns and existing or proposed accesses;

b. whether the site design, size, shape, gradient and location, including existing buildings, manoeuvring areas and outdoor living spaces:
PART 5 SUBDIVISION & DEVELOPMENT 27

i. is able to accommodate development in accordance with the relevant district-wide and zone rules; and

ii. the potential effects on the safety of pedestrians and cyclists and other users of the space or access;

c. whether any landscape features or vegetation, including mature trees, on the site are of a sufficient amenity value that they should be retained and, if so, the proposed means for their protection;

d. the effect of subdivision on any places of heritage value including existing buildings, archaeological sites and any areas of cultural significance.

e. where lots are being amalgamated within the Medium Density Residential Zone and Lower Density Suburban Residential Zone, the extent to which future development will affect the historic character of the Arrowtown Residential Historic Management Zone;

f. the extent to which Policies 27.2.1.7, 27.2.3.2, 27.2.4.2, 27.2.4.4, 27.2.5.10, 27.2.5.11, 27.2.5.14 and 27.2.7.2 are achieved.

27.9.2 Controlled Unit Title and Leasehold Subdivision Activities

In considering whether or not to impose conditions in respect to unit title or leasehold subdivision under Rule 27.5.5, the Council shall have regard to, but not be limited by, the following assessment criteria:

27.9.2.1 Assessment Matters in relation to Rule 27.5.5 (Unit Title or Leasehold Subdivision)

a. whether all buildings comply with an approved resource consent;

b. whether the location of the proposed boundaries is appropriate, including in relation to their relationship to existing buildings and existing or proposed accesses;

c. whether the site design, size, shape, gradient and location, including existing buildings, manoeuvring areas and outdoor living spaces:

i. is able to accommodate development in accordance with the relevant district-wide and zone rules; and

ii. the potential effects the safety of pedestrians and cyclists and other users of the space or access;

d. the effects of and on infrastructure provision;

e. The extent to which Policies 27.2.1.7, 27.2.3.1, 27.2.3.2, 27.2.5.10, 27.2.5.11 and 27.2.5.14 are achieved.

27.9.3 Restricted Discretionary Activity Subdivision Activities

In considering whether or not to grant consent or impose conditions under Rules 27.5.7 and 27.5.8, the Council shall have regard to the following assessment criteria:

27.9.3.1 Assessment Matters in relation to Rule 27.5.7 (Urban Subdivision Activities)
a. whether lot sizes and dimensions are appropriate in respect of widening, formation or upgrading of existing and proposed roads and any provisions required for access for future subdivision on adjoining land;

b. consistency with the principles and outcomes of the QLDC Subdivision Design Guidelines;

c. whether any landscape features or vegetation, including mature forest, on the site are of a sufficient amenity value that they should be retained and the proposed means for their protection;

d. the effect of subdivision on any places of heritage value including existing buildings, archaeological sites and any areas of cultural significance;

e. whether the location, alignment, gradients and pattern of roading, service lanes, pedestrian accessways and cycle ways is appropriate, including as regards their safety and efficiency;

f. the extent to which the provision for open space and recreation is consistent with the objectives and policies of the District Plan relating to the provision, diversity and environmental effects of open spaces and recreational facilities;

g. whether the purposes for the creation of esplanade reserves or strips set out in section 229 of the Act are achieved;

h. whether services are to be provided in accordance with Council’s Code of Practice for Subdivision

i. whether effects on electricity and telecommunication networks are appropriately managed;

j. whether appropriate easements are provided for existing and proposed access and services;

k. the extent to which natural hazard risk is appropriately managed in accordance with the relevant provisions of Chapter 28;

l. the extent to which Policies 27.2.1.1, 27.2.1.2, 27.2.1.3, 27.2.3.2, 27.2.4.4, 27.2.5.5, 27.2.5.6, 27.2.5.10, 27.2.5.11, 27.2.5.14, 27.2.5.16 and 27.2.6.1 are achieved.

27.9.3.2 Assessment Matters in relation to Rule 27.5.8 (Rural Residential and Rural Lifestyle Subdivision Activities)

a. the extent to which the design maintains and enhances rural living character, landscape values and visual amenity;

b. the extent to which the location and size of building platforms could adversely affect adjoining non residential land uses;

c. whether and what controls are required on buildings within building platforms to manage their external appearance or visibility from public places, or their effects on landscape character and visual amenity;

d. the extent to which lots have been orientated to optimise solar gain for buildings and developments;
e. whether lot sizes and dimensions are appropriate in respect of widening, formation or upgrading of existing and proposed roads and any provision required for access for future subdivision on adjoining land.

f. whether any landscape features or vegetation, including mature forest, on the site are of a sufficient amenity value that they should be retained and the proposed means for their protection;

g. the effect of subdivision on any places of heritage value including existing buildings, archaeological sites and any areas of cultural significance;

h. whether the location, alignment, gradients and pattern of roading, service lanes, pedestrian accessways and cycle ways is appropriate, including as regards their safety and efficiency;

i. the extent to which the provision for open space and recreation is consistent with the objectives and policies of the District Plan relating to the provision, diversity and environmental effects of open spaces and recreational facilities;

j. whether the purposes for the creation of esplanade reserves or strips set out in section 229 of the Act are achieved;

k. whether services are to be provided in accordance with Council’s Code of Practice for Subdivision;

l. whether effects on electricity and telecommunication networks are appropriately managed;

m. whether appropriate easements are provided for existing and proposed access and services;

n. where no reticulated water supply is available, whether sufficient water supply and access to water supplies for firefighting purposes in accordance with the New Zealand Fire Service Fire Fighting Water Supplies Code of Practice SNZ PAS 4509:2008 is provided.

o. the extent to which Policies 27.2.1.2, 27.2.4.4, 27.2.5.4, 27.2.5.5, 27.2.5.10, 27.2.5.11, 27.2.5.14, 27.2.5.16 and 27.2.6.1 are achieved.

27.9.3.3 Assessment Matters in relation to Rule 27.5.9 (Wakatipu Basin Rural Amenity zone and Wakatipu Basin Lifestyle Precinct Subdivision Activities)

General

a. The extent to which the proposal is consistent with objectives and policies relevant to the matters of discretion.

b. The extent to which the subdivision provides for low impact design that avoids or mitigates adverse effects on the environment.

Subdivision Design

c. The extent to which the location of future buildings, ancillary elements and the landscape treatment complements the existing landscape character, visual amenity values and wider amenity values of the Wakatipu Basin Rural Amenity Zone or Wakatipu Basin Lifestyle Precinct, including consideration of:
PART 5  SUBDIVISION & DEVELOPMENT  27

i. the retention of existing vegetation and landform patterns;
ii. the alignment of lot boundaries in relation to landform and vegetation features and neighbouring development;
iii. earth mounding, and framework planting to integrate buildings and accessways;
iv. planting of appropriate species that are suited to the general area having regard to the matters set out in Schedule 24.8 — Landscape Character Units;
v. riparian restoration planting;
vi. the retirement and restoration planting of steep slopes over 15° to promote slope stabilisation and indigenous vegetation enhancement;
vii. how controls addressing such matters as building height, building colours and materials, building coverage, earthworks, retaining, fencing, gates, accessways (including paving materials), external lighting, domestic infrastructure (including water tanks), vegetation removal, and proposed plantings might be incorporated in the development in a manner ensuring ongoing compliance;
viii. the integration of existing and provision for new public walkways and cycleways/bridlepaths.

d. The extent to which existing covenants or consent notice conditions need to be retained or are otherwise integrated into the conditions governing the proposed development so as to ensure that landscape character and visual amenity values are maintained or enhanced.

e. The extent to which the development maintains visual amenity from public places and neighbouring properties.

f. Whether clustering of future buildings or varied allotment sizes as part of subdivision design would offer a better solution for maintaining a sense of openness and spaciousness, or the integration of development with existing landform, vegetation or settlement patterns.

g. The extent to which the development avoids, remedies or mitigates adverse effects on the features, elements and patterns that contribute to the value of adjacent or nearby ONLs and ONFs. This includes consideration of an appropriate setback from such features as well as the maintenance of views from public roads and other public places to the surrounding ONL and ONF context.

h. The extent to which development adversely affects Escarpment, Ridgeline and River Cliff Features shown on the planning maps, and in particular the visual amenity values of those features in views from public places outside of the Wakatipu Basin Lifestyle Precinct.

i. Whether mitigation elements such as a landscape management plan or proposed plantings should be subject to bonds and consent notices.

j. Whether the layout of reserves and accessways provides for adequate public access and use.

k. Whether the proposed subdivision provides an opportunity to maintain landscape character and visual amenity through the registration of covenants or consent notices requiring open space to be maintained in perpetuity.

Access and Connectivity
I. Whether proposed sites are located and designed so that each site has a minimum frontage that provides for practical, legal and safe access from a formed public road that is suitable for both normal road going vehicles and construction traffic.

m. Whether the location and design of any proposed pedestrian, cycle, bridlepaths and vehicle accessways on the proposed site(s) avoid or minimise any adverse effects on soil stability, landform patterns and features, and vegetation.

n. Whether subdivision provides for safe and practical pedestrian paths and cycle ways (whether sealed or unsealed) and bridle paths that are located in a manner which connect, or have the potential to connect, to reserves (existing or proposed), roads and existing rural walkways.

o. Whether site design recognises any impact of roading and access on waterbodies, ecosystems, drainage patterns and ecological values.

p. Whether any subdivision provides for future roads to serve surrounding land or for road links that need to pass through the subdivision.

Infrastructure and Services

q. Ensuring there is sufficient capacity and treatment to provide for the safe and efficient disposal of stormwater and wastewater from possible future development without adversely affecting natural water systems and ecological values.

r. Ensuring the design of stormwater and wastewater disposal systems incorporate measures to reduce runoff rates where there may be damage caused to natural waterway systems.

s. Whether any subdivision proposal demonstrates how any natural water system on the site will be managed, protected or enhanced.

t. Whether subdivision provides for an adequate and reliable supply of potable water to each proposed site.

u. Whether subdivision provides for an adequate and reliable supply of emergency water supply to each site in the event of fire.

v. Whether subdivision has sufficient capacity for the disposal of any effluent or other wastewater flow within the boundaries of each proposed site regardless of seasonal variations and loading.

w. Assessing where more than one site will be created, whether a shared or individual wastewater treatment and disposal system is the most appropriate, having regard to any known physical constraints.

x. Considering the extent to which easements and consent notices should be applied to protect the integrity of stormwater and/or wastewater treatment and disposal systems.

y. Assessing the extent to which access easements should provide for lines, including electric lines, telecommunication lines and other lines, where such lines or cables are or may be located within any private property and serve other properties or sites.

z. Whether sites can be connected to services such as telecommunications and electricity using low impact design methods including undergrounding of services.
Natural Environment and Cultural values

aa. Considering the extent to which the subdivision provides for ecological restoration and enhancement. Ecological enhancement may include enhancement of existing vegetation, replanting and weed and pest control.

bb. Assessing the extent to which the subdivision and subsequent land use on the proposed site(s) adversely affects the historical, cultural or spiritual significance of any site or waahi tapu of significance to iwi.

cc. Assessing the extent to which the subdivision design and layout preserves and enhances areas of archaeological, cultural or spiritual significance.

dd. Assessing the extent to which the integrity of any identified heritage feature(s) is maintained and enhanced.

ee. Considering the benefits of the removal of identified wilding exotic trees.

Earthworks and Hazards

ff. Considering how earthworks can be undertaken in a manner which mitigates and remedies adverse effects from soil erosion and the generation of sediments into receiving environments.

gg. Considering whether earthworks are likely to have adverse effects on landscape character or visual amenity values which cannot be avoided, remedied or mitigated.

hh. Considering the extent to which subdivision will increase the risks associated with any natural hazard and/or how the subdivision avoids, remedies or mitigates any hazard prone area.

ii. Considering the extent to which contaminated or potentially contaminated soil is able to be treated or disposed of.

jj. Where the subdivision land includes waterbodies, considering the extent to which remediation measures and methodologies can be employed to avoid, remedy or mitigate any adverse effects on human health, water quality, and to the downstream receiving environment.

kk. Considering whether consent notices or other protective instruments are needed to ensure that any hazard or contamination remediation measures and methodologies are implemented at the time of development.

27.9.4 Restricted Discretionary Activity - Subdivision Activities within National Grid Corridor

In considering whether or not to grant consent or impose conditions in respect to subdivision activities under Rules 27.5.10, the Council shall have regard to, but not be limited by, the following assessment criteria:

27.9.4.1 Assessment Matters in relation to Rule 27.5.10. (National Grid Corridor)

a. whether the allotments are intended to be used for residential or commercial activity;

b. the need to identify a building platform to ensure future buildings are located outside the National Grid Yard;
c. the ability of future development to comply with NZECP34:2001;
d. potential effects of the location and planting of vegetation on the National Grid;
e. whether the operation, maintenance and upgrade of the National Grid is restricted;
f. the extent to which Policy 27.2.2.8 is achieved.

27.9.5 Controlled Subdivision Activities – Structure Plan

In considering whether or not to impose conditions in respect to subdivision activities undertaken in accordance with a structure plan under Rules 27.7.1 and 27.7.2.1, the Council shall have regard to, but not be limited by, the following assessment criteria:

27.9.5.1 Assessment Matters in relation to Rule 27.7.1

a. consistency with the relevant location specific objectives and policies in part 27.3;
b. the extent and effect of any minor inconsistency or variation from the relevant structure plan.

27.9.5.2 Assessment Matters in relation to Rule 27.7.2.1 (Kirimoko)

a. the assessment criteria identified under Rule 27.7.1;
b. the appropriateness of any earthworks required to create any road, vehicle accesses, of building platforms or modify the natural landform;
c. the appropriateness of the design of the subdivision including lot configuration and roading patterns and design (including footpaths and walkways);
d. whether provision is made for creation and planting of road reserves

e. whether walkways and the green network are provided and located as illustrated on the Structure Plan for the Kirimoko Block in part 27.13;
f. whether native species are protected as identified on the Structure Plan as green network;
g. The extent to which Policies 27.3.2.1 to 27.3.2.10 are achieved.

27.9.6 Restricted Discretionary Activity-Subdivision Activities within the Jacks Point Zone

In considering whether or not to grant consent or impose conditions in respect to subdivision activities under Rule 27.7.5.2, the Council shall have regard to, but not be limited by, the following assessment criteria:

27.9.6.1 Assessment Matters in relation to Rule 27.7.5.2 (Jacks Point)

a. the assessment criteria identified under Rule 27.7.1 as it applies to the Jacks Point Zone;
b. the visibility of future development from State Highway 6 and Lake Wakatipu;
c. the appropriateness of the number, location and design of access points;
d. the extent to which nature conservation values are maintained or enhanced;
e. the adequacy of provision for creation of open space and infrastructure;
f. the extent to which Policy 27.3.7.1 is achieved;
g. the extent to which sites are configured:
   i. with good street frontage;
   ii. to enable sunlight to existing and future residential units;
   iii. to achieve an appropriate level of privacy between homes.
h. the extent to which parking, access and landscaping are configured in a manner which:
   i. minimises the dominance of driveways at the street edge;
   ii. provides for efficient use of the land;
   iii. maximises pedestrian and vehicular safety;
   iv. addresses nuisance effects such as from vehicle lights.
i. the extent to which subdivision design satisfies:
   i. public and private spaces are clearly demarcated, and ownership and management
      arrangements are proposed to appropriately manage spaces in common
      ownership.
j. whether design parameters are required to be secured through an appropriate legal
   mechanism. These are height, building mass, window sizes and locations, building
   setbacks, fence heights, locations and transparency, building materials and
   landscaping.

27.9.7 Controlled Activity-Subdivision Activities on West Meadows Drive

In considering whether or not to impose conditions in respect to subdivision activities
under Rule 27.7.8.1, the Council shall have regard to, but not be limited by, the following
assessment criteria:

27.9.7.1 Assessment Matters in relation to Rule 27.7.8.1

a. the assessment criteria identified under Rule 27.7.1 as they apply to the West
   Meadows Drive area.

b. the extent to which the roading layout integrates with the operation of West
   Meadows Drive as a through-road.

27.10 Rules - Non-Notification of Applications

Applications for all controlled and restricted discretionary activities shall not require the written
approval of other persons and shall not be notified or limited notified except:

a. where the Council is required to undertake statutory consultation with iwi;
b. where the application falls within the ambit of Rule 27.5.4;
c. where the application falls within the ambit of Rule 27.5.10 and the written approval
   of Transpower New Zealand Limited has not been obtained to the application;
PART 5   SUBDIVISION & DEVELOPMENT   27

d. where discretion or control relates to property access and roading and the site adjoins or has access directly onto a State Highway, an activity may be limited notified, in respect of those matters of discretion or control, if the written approval of the New Zealand Transport Agency has not been obtained to the application.

d.() notwithstanding d. above, where an application falls within the ambit of Rule 27.7.9, an activity may be limited notified if the written approval of the New Zealand Transport Agency has not been obtained to the application.

27.11   Advice Notes

27.11.1   State Highways

27.11.1.1 Attention is drawn to the need to obtain a Section 93 notice from the New Zealand Transport Agency for all subdivisions with access onto state highways that are declared Limited Access Roads (LAR). Refer to the Designations Chapter of the District Plan for sections of state highways that are LAR as at August 2015. Where a subdivision will change the use, intensity or location of the access onto the state highway, subdividers should consult with the New Zealand Transport Agency.

27.11.2   Esplanades

27.11.2.1 The opportunities for the creation of esplanades are outlined in objective and policies 27.2.7. Unless otherwise stated, section 230 of the Act applies to the standards and process for creation of esplanade reserves and strips.

27.11.3   New Zealand Electrical Code of Practice for Electrical Safe Distances

27.11.3.1 Compliance with the New Zealand Electrical Code of Practice for Electrical Safe Distances (“NZECP34:2001”) is mandatory under the Electricity Act 1992. All activities regulated by NZECP34, including any activities that are otherwise permitted by the District Plan must comply with this legislation.

27.12   Financial Contributions

The Local Government Act 2002 provides the Council with an avenue to recover growth related capital expenditure from subdivision and development through development contributions. The Council forms a development contribution policy as part of its 10 Year Plan and actively imposes development contributions via this process.

The Council acknowledges that Millbrook Country Club has already paid financial contributions for water and sewerage for demand up to a peak of 5000 people. The 5000 people is made up of hotel guests, day staff, visitors and residents. Should demand exceed this then further development contributions will be levied under the Local Government Act 2002.
