1. INTRODUCTION

1.1 My name is Luke Thomas Place. I prepared the section 42A report¹ (**s42A**) and two statements of rebuttal² for Chapter 18A – General Industrial Zone (**GIZ**) text and rezonings, filed in Hearing Stream 17. My qualifications and experience are set out in my s42A.

1.2 I attended the hearing on 1 July 2020, and from 11 – 13 August 2020. I have been provided with reports of what has taken place at the hearing where relevant to my evidence.

1.3 This reply evidence covers the following issues:

- (a) National Policy Statement on Urban Development 2020;
- (b) Existing activities in the GIZ;
- (c) Chapter 18A text matters;
- (d) GIZ rezoning requests.

1.4 The following are attached to my reply evidence:

- (a) **Appendix A:** Recommended Revised Chapter 18A; and
- (b) **Appendix B:** Final recommendations on submissions.

2. NATIONAL POLICY STATEMENT ON URBAN DEVELOPMENT 2020 (NPS-UD)

2.1 The NPS-UD was gazetted on 23 July 2020 and replaces the National Policy Statement on Urban Development Capacity 2016 (**NPS-UDC**). It takes effect from 20 August 2020. Queenstown Lakes District Council (**Council** or **QLDC**) is a “Tier 2” local authority under the NPS-UD.

2.2 Council’s memorandum of counsel³ dated 31 July 2020 provides a summary of the Council’s position on the NPS-UD as relevant to Stage 3 plan review topics. In addition, I make the following comments as the NPS-UD relates to the requested GIZ rezonings and Chapter 18A text.

1 Dated 18 March 2020.

2 Dated 12 and 19 June 2020.

3 Memorandum of Counsel Regarding National Policy Statement On Urban Capacity 2020, 31 July 2020.

Well-functioning urban environments

- 2.3 Policy 1 of the NPS-UD provides a non-exhaustive list of features of well-functioning urban environments. Policy 1(b) states the following:

Policy 1: Planning decisions contribute to well-functioning urban environments, which are urban environments that, as a minimum:

....

b. have or enable a variety of sites that are suitable for different business sectors in terms of location and site size; and

....

- 2.4 Of particular relevance to my evidence, limb (b) sets out that well-functioning urban environments have or enable sites for different business sectors. This includes industrial businesses. It is known that the District's industrial economy is '*growing rapidly and has demonstrated growth rates faster than the rest of the district's economy*'⁴. The GIZ is the only PDP zone, aside from the as yet undeveloped Coneburn Industrial Zone, that has or enables sites suitable for those activities which comprise the District's industrial economy.

- 2.5 I consider that the directive zone framework promoted in Chapter 18A provides the mechanism necessary to meet Policy 1(b) of the NPS-UD. As traversed in my s42A and rebuttal statements, a number of submitters have sought a more enabling GIZ framework, to allow for non-Industrial and Service activities. I consider that a more enabling GIZ framework would compromise the PDP's capability to meet the expectation set out within limb (b) in that the PDP would be compromised in its ability to 'have or enable' the quantum of suitable sites for the industrial business sector.

- 2.6 I note that Policy 1(b) NPS-UD does not specify that the 'sites' need to be vacant, but that planning decisions 'have or enable' sites which are of a suitable location and size. In my view, the supported locations of GIZ are suitably located. This is supported by Ms Hampson's evidence which highlights the economic benefits that can arise from maintaining

4 Page 1, Economic Assessment of Queenstown Lakes District's Industrial Zones, May 2019.

the integral strategic positioning of existing GIZ locations and the in-situ components of the industrial economy⁵.

2.7 The GIZ site sizes promoted in the variation to Chapter 27 (Subdivision and Development) respond to the demand for large and medium sized sites while also providing a degree of flexibility to recognise the unique nature of the District's industrial economy⁶.

2.8 Overall, I am of the view that Chapter 18A and its associated variations to the PDP give effect to Policy 1(b) of the NPS-UD.

2.9 Policy 1(c) of the NPS-UD is:

c. have good accessibility for all people between housing, jobs, community services, natural spaces, and open spaces, including by way of public or active transport; and

2.10 In my view the locations of GIZ (as supported by my s42A and rebuttal statements), are the most strategic and well placed locations ideally suited to achieving the direction set out within limb (c). They are located in close proximity to the District's main urban centres of Frankton, Arrowtown and Wanaka, making them easy and cost effective locations to provide employment.

2.11 The close proximity of GIZ land to these urban centres also contributes to Policy 1(e) which sets out that planning decisions '*support reductions in greenhouse gas emissions*'. Their locations are easily accessible from existing residential areas, improving their ability to be serviced by active and public modes of transport. Rezoning requests seeking GIZ located a substantial distance from Queenstown, Frankton, Arrowtown and Wanaka's urban areas, (for example, the Cardrona Cattle Company Limited relief seeking GIZ at Victoria Flats in the Gibbston Valley), will not, if granted, give effect to the direction set out in Limb (c) or (e).

5 Para 13.2, 15.3 and 14.22 of Ms Hampson's EIC. Refer also Section 6.4.2, Page 91, Economic Assessment of Queenstown Lakes District's Industrial Zones - Stage 3 District Plan Review, May 2019.

6 Para 7.4, Section 32 Evaluation for Chapter 18A – General Industrial Zone.

Responsive Planning

- 2.12** Objective 6(c) and Policy 8 of the NPS-UD provide specific direction for local authorities in regard to 'responsive planning'. Objective 6(c) states that decisions be *'responsive, particularly in relation to proposals that would supply significant development capacity'*.
- 2.13** Policy 8 builds on this direction, setting out that decisions should be responsive *'to plan changes that would add significantly to development capacity and contribute to well functioning urban environments'* even where they might be unanticipated or out of sequence.
- 2.14** Policy 8 and Subpart 2 3.8(2) states that any such plan change also needs to contribute to a well-functioning urban environment and be well connected to transport corridors. I have previously discussed the new provisions of the NPS-UD relating to well-functioning urban environments and note its associated criteria is not exhaustive.
- 2.15** Subpart 2, 3.8(3) outlines that 'criteria' be developed by regional councils to assist in determining what plan changes might qualify as adding significantly to development capacity. These criteria have not been developed and as such, it is not possible to confirm against such criteria that any of the proposed GIZ rezonings would add significantly to development capacity in responding to these proposals.

Intensification

- 2.16** The Panel queried submitters on the direction within Objective 3 relating to intensification, in particular, the interpretation of plans enabling *'...more people to live in, and more businesses and community services to be located in, areas of an urban environment...'*.
- 2.17** In my opinion, this Objective is not requiring that people live in all business areas but that greater intensification (including living, businesses and community services) be enabled in urban areas with high levels of accessibility. The thrust of the Objective is to ensure enough housing is provided that lets people live affordably while being

close to the places they most need and want to access (i.e., places for work or that have easy access to areas with high concentrations of jobs and services).

- 2.18** If Objective 3 was suggesting that people both live in and work in business areas, only one zoning type would be promoted i.e. Business Mixed Use (in the context of the PDP).

Policy 11 - Car Parking

- 2.19** Policy 11 of the NPS-UD will allow developments to take place within the GIZ without providing onsite car parking spaces (except for accessible car parks).

- 2.20** Despite this, territorial authorities are able to continue using rules and standards to set minimum dimensions to ensure traffic safety or for manoeuvring and car parking when car parks are voluntarily supplied by the applicant, or for loading bays, and drop-off areas. As such, I recommend that any matter of control or discretion contained within Chapter 18A which references minimum requirements for onsite parking be removed. This amendment will require consequential changes to any Objective or Policy within Chapter 18A which reference the provision of parking. These recommendations are included in **Appendix A**.

- 2.21** Chapter 29 (Transport) sets minimum parking requirements including for Industrial and Service activities⁷ and Motor vehicle repair and servicing⁸. The Council in Stage 3 notified a variation to Rule 29.8.19 'noting' that ancillary Office, Commercial and Retail activities would be required to meet the parking standards for these activities. These requirements, including the notified variation will need to be removed from Table 29.4, I recommend that the abovementioned notified 'note', only, be removed at this time. The Council will look to remove the related parking standards from the Transport Chapter in due course within the timeframe specified.

⁷ Rule 29.8.19.

⁸ Rule 29.8.20.

- 2.22** The Council in Stage 3 notified a variation to Rule 29.5.10 requiring sites within the GIZ to provide an off-street loading area in the form specified in the rule. As described above, this requirement will not be affected by Policy 11.
- 2.23** Issues relating to parking, manoeuvring and loading within the GIZ were discussed within the Section 32 Evaluation⁹. It concluded that *‘for the most part, on-street parking issues within the Zones are unlikely to be associated with Industrial and Service activities themselves, but rather, the proliferation of non-industrial type activities’*¹⁰.
- 2.24** Given the more restrictive approach applied to non Industrial and Service activities within the GIZ, and the largely developed nature of the Zone, it is not considered that Policy 11 would have substantial effects on the ability of GIZ sites to meet the Zone purpose, nor on the safe and efficient operation of the roading network.
- 2.25** However, submitters have requested a much more enabling approach for non Industrial and Service activities within the GIZ. If this relief were granted, a variety of land uses would be enabled in the absence of car parking requirements. In my view, this would result in adverse traffic effects within the GIZ, including the inefficient use of sites for Industrial and Service activities and impacts on the safe and efficient operation of the roading network.

3. EXISTING ACTIVITIES WITHIN THE GIZ

Discontinuation under Section 10 of the Resource Management Act 1991

- 3.1** The Panel raised concerns about how the GIZ provisions including in particular how a prohibited activity status will impact on existing activities, with particular reference to existing Office, Commercial and Retail activities that are not ancillary to Industrial and Service Activities. The questions focused on:

⁹ Paras 7.85 – 7.92, GIZ Section 32 Evaluation.

¹⁰ Para 7.91, GIZ Section 32 Evaluation.

- (a) Businesses ceasing operations for more than 12 months due to situations outside of their control, for example Covid19;
- (b) Existing use rights (under s10 RMA) being inherently difficult to prove and therefore obtain;
- (c) Consent holders facing challenges when seeking amendments to their consent conditions (which would be fully D and not prohibited) or seeking alternations that may be captured by the prohibited activity status.

3.2 The Panel asked if these matters were risks and whether Council would consider including a mechanism in Chapter 18A to allow existing non-Industrial and Service activities to lawfully continue and to deal with the matters set out in (a) to (c) above.

3.3 In regard to (i) above, I note that Sub clause 2(a) and (b) of s10 of the RMA provides existing activities with an ability to make an application to the Council to extend the period of discontinuation provided this application is made within two years of the activity first being discontinued (Sub clause 2(a)). The tests to be met when considering such an extension are set out in Sub clause 2(b)(i) and (ii). I note that the test at 2(b)(ii) includes the territorial authority being satisfied that *'the effect of the extension will not be contrary to the objectives and policies of the district plan'*. In regard to this matter I draw the Panel's attention to the recommended revisions below that seek to better recognise existing activities within the GIZ. These recommendations provide opportunities for such extensions to satisfy this test that were not previously available. Any such application would need to be assessed against these tests on a case by case basis. The key point being here that after 12 months of discontinuation, the opportunity for continuation may not be entirely closed.

3.4 I would also add that, while existing activities may not operate at the same capacity as they may have done prior to Covid19, this does not necessarily equate to a wholesale discontinuation. Proactive steps taken by central government to support the continued operation of businesses is likely to have enabled many activities to continue without downscaling or hibernating.

3.5 I address the matters at (ii) and (iii) above in the proceeding paragraphs.

A new approach for existing activities

3.6 The Panel requested additional analysis in regard to a framework that could more actively provide for existing Office, Commercial and Retail activities within the GIZ. Reflecting further on this matter, I acknowledge that such a framework could assist in avoiding costs, uncertainty for operators, and problems with inflexibility, which could arise in the event that landowners are not able to retain existing businesses, arrange new tenants that meet the conditions of an existing resource consent or the tests in Section 10, or if these existing Office, Commercial and Retail activities wished to expand¹¹.

3.7 I have therefore drafted a specific rule framework, providing for existing Office, Commercial and Retail activities, that are not ancillary to Industrial and Service Activities, within the GIZ. This framework seeks to support the overall intent of Chapter 18A while building on the established approach set out within Section 10 of the Act. The intent of this framework is twofold:

- (a) To provide for, and manage limited changes to existing lawfully established Office, Commercial and Retail activities in a way that would allow them to be different in 'character'; and
- (b) To avoid any changes to existing lawfully established Office, Commercial and Retail activities that would result in a material increase in 'scale' or 'intensity'.

3.8 Considering this overarching intent, I recommend the following suite of amendments to Chapter 18A (deletions shown in ~~blue~~ and additions underlined):

¹¹ Para 5.33, GIZ Section 42a Report.

Policy 18A.2.2.1

Avoid ~~the following~~ activities that ~~are not compatible with the primary function of the Zone and have the ability~~ are likely to displace or constrain the establishment, operation and long term viability of Industrial and Service activities including:

- a. Office, Retail and Commercial activities unless: that
 - i. they are ~~not~~ ancillary to Industrial or Service activities, or
 - ii. the activity is replacing an existing Office, Commercial or Retail activity lawfully established prior to [xx date Chapter 18A becomes operative] on the same site and is of the same or similar scale and intensity.

- 3.9** Corresponding amendments are recommended to 18A.1 (GIZ Purpose) to better reflect the intent of the abovementioned framework (deletions shown in ~~blue strikethrough~~ and additions underlined):

The purpose of the General Industrial Zone is to provide for the establishment, operation and long term viability of Industrial and Service activities. The Zone recognises the significant role these activities play in supporting the District’s economic and social wellbeing by prioritising their requirements, and zoning land to ensure sufficient industrial development capacity.

The Zone seeks to ensure a range of site sizes are available, including for those Industrial and Service activities which require larger buildings and more space for the purpose of outdoor storage, manoeuvring and parking vehicles including heavy vehicles. The role that ancillary Office, Retail and Commercial activities play in supporting Industrial and Service activities is recognised and provided for. Activities and development that would not primarily result in sites being used for Industrial and Service activities are avoided.

A number of existing Office, Commercial and Retail activities were established within the Zone under the previous District Plan framework. The Zone seeks to recognise these activities and allow them to continue to lawfully operate and provide opportunities for them to change overtime. Any such changes will be limited and

carefully managed to support the overall intent of the Zone to provide for Industrial and Service activities.

While the Zone seeks to provide for land uses more commonly associated with noise, glare, dust, odour, shading, visual and traffic effects and other similar effects, it also seeks to manage activities and development to ensure that appropriate levels of amenity are achieved for people who work within and visit the Zone, and to avoid adverse amenity effects on land located outside of the Zone.

Section 32AA Assessment

- 3.10** The recommended amendment to Policy 18A.2.2.1(a) retains its initial intent and purpose, being that Office, Retail and Commercial activities, not ancillary to an Industrial or Service activity, are avoided in the Zone. The amendment does however seek to reframe the policy with an additional qualifier to allow for the replacement of an existing Office, Commercial or Retail activity with another activity of this kind¹² that meets a specified criteria¹³. This approach ensures these activities can continue to operate without causing effects that over time, would be contrary to the objectives of the GIZ.
- 3.11** In my view this proposed framework is the most appropriate, effective and efficient mechanism to achieve Objective 18A.2.2. The amended policy creates a distinction between those types of activities which are likely to undermine the *establishment, operation and growth of Industrial and Service activities* and those that shouldn't.
- 3.12** Rule 18A.4.x provides for specific changes to existing lawfully established Office, Commercial or Retail activities, being relocations of these activities, or changes to other Office, Commercial or Retail activities only. These changes are provided for as a controlled activity where standards 18A.5.x a – b are met. These provisions limit the scale and intensity of the activity, while seeking to provide a reasonable and pragmatic degree of flexibility to alter the activity.

¹² i.e. another Office, Commercial or Retail activity.

¹³ Being that it is lawfully established prior to the date rules become operative, is on the same site, and is of the same or similar scale and intensity.

- 3.13** The proposed standard at 18A.5.x(b)(i) is pragmatic as it recognises that not all changes between activities will be able to meet the exact same GFA as the existing activity. The scale of increase provided for (being 10% beyond the existing activity) would not in my view, materially alter the overall intensity of the existing activity, and is not likely to change to status quo in terms of the degree to which the existing activity is 'incompatible' with the overall purpose of the GIZ. As this rule links any change to the existing activity lawfully established at the time the rules become operative, it will not enable ongoing or cumulative 10% increases in GFA.
- 3.14** The recommended matters of control at 18A.4.x enable conditions to be applied to a resource consent to prevent displacement or constraining the establishment, operation or long term viability of Industrial and Service activities within the Zone as directed in the recommended policy.
- 3.15** Recommended Rule 18A.4.x(v) provides a matter of control that enables the Council to impose conditions to require the keeping of records to effectively monitor the activity. I consider that this places the Council in a better position to monitor these activities within the Zone and to administer the outcome sought in Objective 18A.2.2. This approach is not dissimilar to that applied to the management of Residential Visitor Accommodation activities¹⁴.
- 3.16** Rules 18A.4.x and 18A.5.x provide an effective and efficient framework to manage changes to existing Office, Commercial and Retail activities that promotes certainty for land/business owners and/or occupiers of these existing activities through the provision of a controlled activity status and confined matters of control.
- 3.17** Recommended Rule 18A.5.x implements the overarching intent of Policy 18A.2.2.1(a) to ensure Office, Commercial and Retail activities do not proliferate by setting a prohibited activity status for any change which does not meet limbs a – b. This approach is effective and efficient as it would ensure that any change undertaken within this framework would not displace or constrain the establishment,

14 I.e. Rule 7.4.6.

operation or long term viability of Industrial or Service activities. Prohibited activity status is the most effective and efficient approach as it provides a certain outcome. This approach is commensurate with the recommended approach taken elsewhere within the GIZ relating to new Office, Commercial and Retail activities that would not be ancillary to Industrial or Service activities. In my opinion, a material increase to the scale and/or intensity of the activity beyond that suggested in these provisions would amount to a new Office, Commercial or Retail activity that should be treated in the same manner as the approach within the notified GIZ.

- 3.18** The recommended framework would allow for the status quo to be maintained within already developed parts of the GIZ in terms of the present number of Office, Commercial and Retail activities not ancillary to Industrial or Service activities. As outlined in my previous evidence, it was not the intent of Chapter 18A to attempt to “cleanse” the GIZ of these existing activities¹⁵, and the recommended approach better reflects this intent. However, I also note that the recommended framework does not necessarily seek to perpetuate this situation as these existing activities may also change to become Industrial or Service activities. Chapter 18A encourages this by setting up an overall framework designed to recognise and provide for the functional requirements of Industrial or Service activities.
- 3.19** Ultimately, because the PDP cannot act retrospectively, and in most cases, existing Office, Commercial and Retail activities will benefit from existing use rights or an approved resource consent, the recommended amendments do not conflict with Strategic Policy 3.3.8. The recommended standards with the prohibited non-compliance status will prevent incremental adverse effects on the establishment, operation and long term viability of Industrial and Service activities.
- 3.20** The recommended provisions would however impose costs on land/business owners and/or occupiers who will need to obtain a controlled activity resource consent prior to undertaking any ‘change’ or transition in land use. However, it is noted that controlled activity

15 Para 9.3, GIZ Second Rebuttal Statement.

consents offer processing time and application fee efficiencies over more restrictive activity status'¹⁶.

3.21 Land/business owners and/or occupiers may also incur costs associated with any monitoring and the need to mitigate potential reverse sensitivity effects that may arise if there is a change from one Office, Commercial or Retail activity to another, as well as any requirement to meet the expectations of Chapter 36 (Noise) in terms of critical listing environments that may be present.

3.22 Ultimately, the recommended provisions will deliver positive economic outcomes for existing business/land owners and/or occupiers engaged in existing lawfully established Office, Commercial and Retail activities. It does this by offering certainty that was not previously provided, through the provision of a rule framework that enables those activities to continue to operate within the Zone and offers a pathway for those activities to change/adapt in ways that were previously unavailable.

Assessment of alternatives

3.23 I have previously discussed alternative approaches to providing for existing Office, Commercial and Retail activities within the GIZ and considered their costs and benefits¹⁷. I continue to rely on this assessment for the purpose of Section 32AA of the Act.

Activities that may become Prohibited within the GIZ

3.24 The Panel queried the number of existing activities that may become prohibited within the Zone as a result of the recommended GIZ provisions.

¹⁶ For example, controlled activity resource consents must be processed within 10 working days and incur an initial fee of \$1,400.¹⁶ This is in contrasted with the current initial fee required for a '*Breach of site, zone or performance standard Town Centre, Business and Industrial zones*' of \$2,390.

Note: All charges and initial fees are inclusive of GST and are payable on application. The initial fees are minimum charges based on the expected reasonable costs relative to the work. Further costs will be invoiced on a time basis and are payable before further work is completed. The use of hearings commissioner and external consultants where required will be charged on a full recovery basis according to their hourly rate. Disbursements will be charged on a full recovery basis.

¹⁷ Para 5.27 – 5.46, GIZ Section 42a Report.

- 3.25** I draw the Panel's attention to the ground truthing results set out within the Section 32 Evaluation for the GIZ¹⁸. This does not specify the number of activities that might become prohibited but it does set a baseline for the mix of current activities occurring within the Zone.
- 3.26** Table 3 of Ms Hampson's EIC¹⁹ offers an analysis of existing activities that could be captured by the prohibited and non-complying rules in the event they sought changes not provided for by existing use rights or an existing resource consent.
- 3.27** The recommended framework set out above in regard to existing Office, Commercial and Retail activities goes beyond the ability to rely on Section 10 of the Act and existing resource consents. It will reduce the number of activities seeking to change their character and undertake minor changes in scale from becoming prohibited, as the existing activities are now specifically provided for, subject to certain criteria being met. Where that criteria is not met, the activity will become prohibited.

Strategic Policy 3.3.8

- 3.28** The Panel queried whether or not Strategic Policy 3.3.8 can be achieved if there are existing non-Industrial and Service activities already present within the GIZ. Chapter 3 (Strategic Direction) sets out an *...over-arching strategic direction for the management of growth, land use and development...*²⁰ for the next 10 years (i.e. the life of the plan). It can only be forward looking in the way it manages growth, land use and development. The RMA does not enshrine any ability for territorial authorities to act retrospectively in regard to the way growth, land use and development has already taken place on land. Rather, it is the Council's statutory function to review its District Plan to give effect to the purpose of the Act over the following 10 year period to address identified resource management issues.
- 3.29** If Strategic Policy 3.3.8 were to be applied in an absolute manner, Chapter 18A would need to prohibit every type of activity other than

¹⁸ Issue 2, Paras 7.22 – 7.49, GIZ Section 32 Evaluation.

¹⁹ Page 38, GIZ EIC of Ms Hampson.

²⁰ 3.1 Purpose.

Industrial activities. Chapter 18A necessarily sets out a more pragmatic approach, recognising that there are a range of activities that can be complimentary to, and support, the District's industrial economy.

- 3.30** In my view, district plan review processes provide an opportunity to propose new ways of addressing resource management issues where they have been identified. In this way, Strategic Policy 3.3.8 and Chapter 18A are responsive and forward looking, seeking to address the adverse effects that non-industrial activities have within land zoned for industrial activities.

A non-complying activity alternative

- 3.31** The Panel questioned Council and submitter experts on the merits of applying a non-complying activity status for activities currently identified as prohibited within Chapter 18A, in particular, Office, Commercial and Retail activities. As outlined above, I have recommended that this approach be amended. This more nuanced approach largely removes the need to apply a one size fits all non-complying alternative.
- 3.32** While I accept that non-complying activities can and do get refused consent and allow for the merits of an application to at least be tested, I consider a non-complying alternative will not prevent the further infiltration of Office, Commercial and retail activities into the GIZ and that this would be contrary to the objectives of the Zone and the PDP.
- 3.33** The Panel also queried the uniqueness, or otherwise, of the application of a prohibited activity status, with submitters suggesting this approach was unusual. I note that the Coneburn Industrial Zone sets out a large number of prohibited activities²¹. The Operative District Plan (ODP) Industrial B Zone similarly identifies a number of prohibited activities²².

21 Including Residential activities, Visitor Accommodation, Retail (which is not provided for in Rule 44.4.3) and Offices (other than those which are ancillary to a permitted use in Rule 44.4.2).

22 Including Offices, other than those ancillary to a permitted use, Residential activities, and Retail activities (other than those provided elsewhere in the Zone which related to goods produced, processed, or stored on the site) and Visitor Accommodation.

- 3.34** There is some variation in regard to Commercial activities. The Coneburn Industrial Zone and Industrial B Zone identify Commercial activities (excluding those provided elsewhere) as non-complying.
- 3.35** If the Panel prefer to apply a non-complying activity framework in the GIZ, I am of the view that this context could be taken into account i.e. possibly be restricted to Commercial activities. In addition, clear expectations relating to the scale, nature and intensity of any Commercial activity would need to be set out within the Chapter 18A policy framework.

Trade Suppliers

- 3.36** The Panel queried if there was a distinction between the type of effects associated with large and small Trade Suppliers, and whether or not a GFA trigger should be used to determine the activity status of a Trade Supplier activity.
- 3.37** I have addressed a range of different methods that could be applied to manage Trade Suppliers²³ in my previous evidence and continue to recommended the application of a fully discretionary activity rule.
- 3.38** I acknowledge that large Trade Suppliers are likely to have a different scale of effects than smaller activities, but I maintain²⁴ that what is critical to determining the degree to which a Trade Supplier activity is appropriate within the Zone, is the extent to which it is involved in either retail or wholesale activities. I have traversed the distinction between these two ‘types’ of Trade Suppliers at length in my s42A²⁵ and continue to rely on that analysis – I do not repeat it here.
- 3.39** The recommended rule framework²⁶ relies on directive policies to assist plan users in understanding the type of Trade Suppliers that will be recognised and provided for within the GIZ (being those primarily involved in wholesaling related trade) and those that are to be avoided (being those that are predominantly in the business of retailing).

²³ Para 5.47 – Para 5.75, GIZ Section 42A report.

²⁴ Refer to paragraphs 5.51 and 5.52 s42A.

²⁵ Refer paragraphs 5.47 - 5.62 s42A.

²⁶ Para 5.70 – 5.75, GIZ Section 42a Report.

- 3.40** A Trade Supplier with a small GFA, but used predominantly for retailing, would still fail to meet the requirements of the rule and policy framework.
- 3.41** A Trade Supplier with a larger GFA, but used predominantly for wholesaling related trade, will meet the rule and policy requirements and therefore be appropriate within the GIZ. The fact that it has a larger GFA does not in my opinion make it any less acceptable within the GIZ – what is important is the nature/purpose of the Trade Supplier activity.
- 3.42** I have not seen evidence from submitters supporting the position that larger wholesale based Trade Suppliers should be considered non-complying activities or evidence supporting a GFA threshold. For these reasons, I maintain the position set out in my s42A report.

4. CHAPTER 18A - TEXT MATTERS

- 4.1** The Panel raised a number of drafting matters with me at the hearing. I address each of these separately below.

Building Restriction Area activity rule drafting style

- 4.2** The Panel queried the drafting approach taken for notified Rule 18A.4.xx in relation to Building Restriction Areas (**BRAs**). In particular, asking whether the rule would be more appropriately drafted as a standard as distinct from an activity rule.

- 4.3 I have reflected on this further and recommend the following minor drafting amendment to Rule 18A.4.xx (deletions shown in blue strikethrough and additions underlined):

	Table 18A.4 – Activities in the General Industrial Zone	Activity Status
18A.4.xx	<p>Building Restriction Area</p> <p>No building shall be located within a building restriction area as identified on the District Plan maps</p> <p><u>Any building within a Building Restriction Area that is identified on the planning maps.</u></p>	NC

- 4.4 I am of the view that this amendment can be made under Clause 16(2), Schedule 1 of the RMA as the alteration would be of a minor effect.

Road setback Rule 18A.5.3

- 4.5 The Panel asked me to give further thought to Rule 18A.5.3 (road setbacks) and whether it could be amended to provide further clarity.
- 4.6 The intent of Rule 18A.5.3(a)(i) is to ensure that additional restrictions apply to sites within the GIZ, where they are separated by a road from a site located within a zone that primarily accommodates residential activities. As drafted, limb 18A.5.3(a)(i) identifies two specific zones (the Meadow Park Special Zone and the Large Lot Residential Zone) following a general reference to ‘any residential zones’.
- 4.7 Specific reference to the Meadow Park Special Zone and the Large Lot Residential Zone was made to ensure they were identified as zones currently separated by roads from the GIZ and which are primarily intended to accommodate residential activities. This was done to recognise that these zones do not necessarily fit within what might otherwise be considered ‘any residential zone’ (ie the Lower Density Suburban Residential, Medium Density Residential, High Density Residential).

4.8 Having considered the Panel's request, I am of the view that the clarity of this rule can be improved by simply listing the full range of zones that need to be considered in the context of 18A.5.3(a)(i) (deletions shown in ~~blue strikethrough~~ and additions underlined):

	Table 18A.5 - Standards for activities located within the General Industrial Zone	Non-compliance status
18A.5.3	<p>Minimum Boundary Setbacks</p> <p>a. Road boundary setbacks</p> <p>i. <u>fronting any of the following residential zones (including the Meadow Park Special Zone and the Large Lot Residential Zone) – 7m</u></p> <ul style="list-style-type: none"> • <u>Lower Density Suburban Residential Zone</u> • <u>Medium Density Residential Zone</u> • <u>High Density Residential Zone</u> • <u>Meadow Park Special Zone</u> • <u>Large Lot Residential Zone</u> <p>ii. all other road boundaries – 3m and State Highway boundaries – 5m</p> <p>iii. State Highway boundaries – 5m</p> <p>b. Internal boundary setbacks</p> <p>i. where a site adjoins any other zone outside of the General Industrial Zone – 7m</p> <p>ii. no minimum internal setbacks are required where a site adjoins other sites within the General Industrial Zone</p>	<p>RD</p> <p>Discretion is restricted to:</p> <p>a. visual effects of the height, scale, location and appearance of the built form when viewed from adjacent sites, roads and public places;</p> <p>b. the nature of the activity, including any noise, vibration, odour, dust, glare, traffic or any other nuisance effects;</p> <p>c. landscaping and screening; and</p> <p>d. compatibility with the appearance, layout and scale of surrounding sites.</p>

4.9 I note that a similar drafting approach has been applied in Rule 18A.5.6 (Building Heights) and Rule 18A.5.9 (Fencing). I recommend that the same changes as those recommended above be applied to 18A.5.6 and 18A.5.9 for consistency. These changes are illustrated in my recommended Chapter 18A at **Appendix 1**.

- 4.10** I am of the view that these amendments can be made under Clause 16(2), Schedule 1 of the RMA as the alteration would be of a minor effect. Overall, they improve the clarity of the above-mentioned rules.
- 4.11** In the event that new areas of GIZ are identified as part of future plan changes, the list of zones specified in Rule 18A.5.3(a)(i) may need to be amended.

Rule 18A.4.5(k) - Electricity Infrastructure matter of discretion

- 4.12** The Panel queried whether the wording in Rule 18A.4.5(k) is correct – in particular whether it is consistent with the Topic 17 Consent Order. There are two different wordings provided in the Topic 17 Consent Order for this matter of discretion.

- 4.13** The Consent Order applied the following wording in Chapters 7, 8, 12, 21:

Where Electricity Sub-transmission Infrastructure or Significant Electricity Distribution Infrastructure as shown on the Plan maps is located within the adjacent road, any adverse effects on that infrastructure.

- 4.14** The Consent Order applied the following wording in Chapters 9 and 16:

Where Electricity Sub-transmission Infrastructure or Significant Electricity Distribution Infrastructure as shown on the Plan maps is located within the adjacent road, and any proposed building is located within 9.5 metres of that road boundary, any adverse effects on that infrastructure.

- 4.15** Ms Dowd notes in her evidence²⁷ that the matters of discretion are a refinement of Aurora's original relief. She suggests that much of the Electricity Sub-transmission Infrastructure (**ESTI**) or Significant Electricity Distribution Infrastructure (**SEDI**) are located in the road

²⁷ Para 26, EIC of Ms Dowd, 28 May 2020.

reserve but that there are also portions which run through private land²⁸. However, Ms Dowd has not identified those specific parts of the GIZ where the ESTI or SEDI run through private land, nor has she commented on the costs or benefits of applying one of the two drafting approaches set out within the Consent Order.

4.16 The matter of discretion promoted within the original submission, in particular, the reference to, '*within...the subject site*' to be a substantial departure from what is contained within the Consent Order. Given this, I recommend amending the matter of discretion so that the wording is consistent with that applied by the Topic 17 Consent Order for Chapters 7, 8, 12, 21 (deletions shown in ~~strike through~~ and additions underlined):

k. Where Electricity Sub-transmission Infrastructure or Significant Electricity Distribution Infrastructure as shown on the Plan maps is located within the adjacent road, ~~or the subject site~~ any adverse effects on that infrastructure.

Clarification of Rule 18A.4.6

4.17 The Panel requested clarification on what is meant by the reference to 'the 2037 Noise Contours' in Rule 18A.4.6. These words were included in response to Queenstown Airport Cooperation's **(3316) (QAC)** submission.

4.18 The submission made by QAC offers some context as to why the relief was sought. It highlights that Designation 2 and its associated noise boundaries (Air Noise Boundary (**ANB**) and Outer Control Boundary (**OCB**)) were developed as part of Plan Change 35 '*to protect the operational capability of the Airport, while at the same time minimising adverse environmental effects from aircraft noise on the community at least to year 2037*'²⁹.

4.19 I note that the recommended revised version of Rule 18A.4.6, including the reference to 'the 2037 Noise Contours' largely replicates the

²⁸ Para 27, EIC of Ms Dowd, 28 May 2020.

²⁹ Para 4.12.1, Submission 3316.

relevant provision within the ODP Industrial Zone³⁰. My recommended revised Section 42A version of Rule 18A.4.6 departs from the relief requested by QAC only in terms of their specific reference to 'buildings', which QAC requested be captured in addition to 'alterations and additions to existing buildings' (as was provided for within the ODP version of the provision). There is no justification, within QAC's submission, for the addition of 'buildings' in this provision, and I do not consider this necessary as a new building may not need to meet the requirements of Rule 18A.4.6 as it may not contain any Activities Sensitive to Aircraft Noise (**ASAN**). In any event, new ASAN within the ANB or OCB are prohibited.

- 4.20** I note that the planning maps refer specifically to the 'Queenstown Airport Air Noise Boundary (Ldn65)' and the 'Queenstown Airport Outer Control Boundary (Ldn55)' rather than 'the 2037 Noise Contours'. Condition D1 9 the Queenstown Airport Designation states the following:

'The Airport shall be managed so that the noise from aircraft operations does not exceed 65 dB Ldn outside the Air Noise Boundary (ANB) and 55 dB Ldn outside the Outer Control Boundary (OCB). The ANB and OCB are as shown on the District Plan Maps. Compliance with the ANB and OCB shall be determined on the basis of the Compliance AANC required to be prepared by Condition 10 and 11.'

- 4.21** Chapter 2 (Definitions) offers definitions for Outer Control Boundary and Air Noise Boundary Queenstown, both which reference boundaries shown on the planning maps out to 2037.

- 4.22** A definition is also provided for '2037 Noise Contours'

'Means the predicted airport noise contours for Queenstown airport for the year 2037 in 1dB increments from 70dB Ldn to 55dB Ldn inclusive. Note: These contours shall be available from the council and included in the airport noise management plan'

³⁰ Rule 11.3.5.2(iii)(a).

- 4.23 I note that the 2037 Noise Contours is also referenced in other parts of the PDP i.e. Rule 7.5.4 relating to the Lower Density Suburban Residential Zone.

GIZ REZONING REQUESTS

5. THE CARDRONA CATTLE COMPANY LIMITED (3349) (CCCL)

- 5.1 Following the presentation of the Submitter's evidence from their respective experts I remain of the view that the relief be rejected.
- 5.2 I make the following additional comments in regard to the information presented and discussed at the hearing.

Land within and outside an Outstanding Natural Landscape

- 5.3 At the hearing, the Panel asked me to confirm how much of the CCCL site falls within the Outstanding Natural Landscape (**ONL**). Since the Council presented its evidence at the hearing, the Submitter has revised their relief in terms of the area to be rezoned to GIZ. The revised extent of the rezoning is represented in the highlight summary presented by Mr Milne (landscape expert for the Submitter) in the plan titled 'Victoria Flats GIZ Structure Plan'³¹. In his summary of evidence presented at the hearing, Mr Giddens (planning expert for the Submitter) stated that a relatively small proportion the land subject to the GIZ rezoning is located within the ONL³².
- 5.4 I have measured the total areas presented in Mr Milne's structure plan to understand what proportions of the site are located within the ONL. My measurements show that approximately 26.6 Ha (or 45.5%) of the site is located within ONL (being the Rural Zoned parts of the land). This comprises proposed activity areas 1 and 2 at the northern portion of the site (adjoining SH6), as well as activity areas 2 and 3 at the southern portion of the site (behind the landfill). The remaining area of

31 Sheet 4, Graphic Attachment, - Further exhibits for hearing – <https://www.gldc.govt.nz/media/coqfum0x/s3349-cardronacc-stream17-milnet-summaryattachment-hearing-further-exhibits.pdf>.

32 Para 12, Mr Giddens, Planning Summary, 12 August 2020.

land (approximately 31.9 Ha) sought to be rezoned to GIZ is located within the Gibbston Character Zone. Note that my calculations include the areas identified on Mr Milne's structure plan as 'Green Corridors' and 'Planted Amenity Setbacks' as these areas are still indicated as being within that part of the site sought to be rezoned to GIZ.

5.5 For clarity, the total area that might be subject to built form would be less as a result of the proposed 'Green Corridors' and 'Planted Amenity Setbacks'. However, I note that there are a number of areas identified on Mr Milne's structure plan that are located within areas subject to the GIZ rezoning request, that are also not within either of the proposed 'Green Corridors' or 'Planted Amenity Setbacks'. This issue relates to land both within and outside of the ONL.

5.6 In the absence of any other land use controls, development in these 'other' ONL areas would be subject to the standard set of provisions within Chapter 18A which are have not been drafted to have the effect of managing specific effects of urban development within ONLs. In my opinion this presents a high level of incongruity with the proposal and is likely to result in unacceptable adverse effects on the ONL in this location.

Landfill Buffer

5.7 Mr Giddens (for CCCL) suggested at the Hearing that the landfill buffer designation and its conditions do not place any controls on activities within the buffer. While the conditions may not apply any specific controls on activities (i.e. it does not contain a list of activities that are to be avoided), I disagree with Mr Giddens on this matter. The location of the landfill buffer in this location places a material control on any activity proposed to take place within the designation by way of Section 176b of the Act.

5.8 In my view, the overall purpose and significance of the designation should not be diminished on the basis that it does not list a set of activities over which controls are to be placed or activities that are to be prohibited.

Proposed bespoke provisions

- 5.9** Mr Giddens proposed a number of new bespoke provisions to be incorporated into Chapter 18A, which he appended to his planning summary statement presented at the hearing.
- 5.10** In essence, these provisions seek to prohibit Residential Activities, Residential Units, Residential Flats, Visitor Accommodation, Homestay Activities and Community Activities, but only within the landfill buffer. All other Chapter 18A permitted activities would be enabled within the landfill buffer, including Industrial and Service activities, Office, Commercial and Retail activities ancillary to Industrial and Service activities, and the Commercial sale of food and beverages including restaurants, takeaway food bars and Licensed Premises. I note that Trade Supplier activities that meet the tests set out within the recommended revised policies of Chapter 18A can also establish within the landfill buffer as a discretionary activity. Mr Giddens has proposed a policy framework to support this rule which sets out that activities within the landfill buffer would be subject to a lower level of amenity due to noise, odour and dust from the landfill operations. In my view, this type of Urban Development within the landfill buffer is not appropriate and I rely on my evidence in relation to this³³.
- 5.11** Mr Giddens has also proposed a different set of building coverages for the three activity areas³⁴, represented on the proposed structure plan prepared by Mr Milne. As noted above, there are number of areas shown on the proposed structure plan that fall outside of the proposed activity areas, as well as the 'Green Corridors' and 'Planted Amenity Setbacks'. It is not clear if this is an error, as these areas are also included within the proposed GIZ boundary, and would therefore be captured by the default GIZ building coverage, being 75%.
- 5.12** Additionally, the proposed building coverages exist within the context of a proposed 40% site coverage threshold limit as a trigger for potential roading upgrades³⁵. This 40% trigger does not appear to have been incorporated into the proposed rule framework and it is not clear

³³ Paras 9.55 – 9.59, GIZ Section 42A Report and Paras 5.51 – 5.56, GIZ Second Rebuttal Statement.

³⁴ Rule 18A.5.4.2, Mr Giddens, Planning Summary, 12 August 2020.

³⁵ Para 11, Mr Giddens, Planning Summary, 12 August 2020.

how this would efficiently or effectively interact with the proposed site coverage rules.

5.13 Mr Giddens has also proposed a different set of building heights for each of the three activity areas. I note a similar concern as highlighted above in regard to those areas located outside of the identified activity areas (as well as the 'Green Corridors' and 'Planted Amenity Setbacks'). In these areas the default building height within Chapter 18A would apply (i.e. 10 metres), and such buildings would abut activity areas which Mr Giddens suggests should have building heights limited to 6 metres and 7 metres. The proposed rules also promote building heights for 'towers' of up to 12 metres. I am not of the view that scope exists for this request as CCCL's primary submission³⁶ sought building heights of 10 metres within the subject land.

5.14 As noted above, Mr Giddens has suggested that a threshold be incorporated into a rule to prevent development of greater than 40% of the zone until a roundabout on SH6 is installed and operational.³⁷ I do not consider this approach to be efficient or effective. It is assumed that the Council would be required to maintain some sort of tally of built form within the land in order for the rule to be triggered. Further, it is not clear what party would be responsible for covering the cost of any such upgrade that would be required. It is presumed that the zone may be somewhat developed prior to this 40% threshold being reached and that an individual landowner/tenant may find themselves breaching this rule. In the absence of any other information, it is not clear what party would be responsible for such upgrades.

5.15 Mr Giddens' also proposes to remove the word 'pleasant' from Objective 18A.2.3. I am not of the view that scope exists for this as it would apply to the GIZ in its entirety. The original submission sought specific points of relief '*to the Industrial General provisions as it relates to the Industrial Zone at Victoria Flat.*'³⁸

Urban Growth Boundaries and zoning

- 5.16** The Panel discussed what comes first in sequence in respect to Urban Growth Boundaries (**UGBs**) and zoning with the Submitter's legal counsel and planning expert. The Submitter's Counsel suggested that the UGB is incremental and that it follows zoning such that it is not a strategic planning tool. I disagree with the Submitter's experts on this matter. I have addressed strategic urban development considerations, including the overall intent of Chapter 3 and 4 in respect to the application of UGBs and urban zoning on the land subject to this submission in my s42A report³⁹ and my second rebuttal statement⁴⁰.
- 5.17** Overall I am of the view that UGBs are a key underlying tool in the PDP to promote a strategic and integrated approach to the location of urban development within the District. Chapter's 3 and 4 set out a framework where the appropriateness of any land to be incorporated into a UGB is considered. Following this, land within the UGB should be zoned according to the direction set out within Chapter 3 and Chapter 4. Any capacity for urban growth (as identified by a zone) is anticipated to be located within an UGB.

NPS-UD in relation to the CCCL rezoning

- 5.18** The proceeding points relate specifically to the request to include land at Victoria Flats within the GIZ:
- (a) The land subject to the CCCL rezoning request is currently within the Rural Zone and Gibbston Character Zone. These locations are not located within the District's urban environment as defined by the NPS-UD. Given this, much of the objectives and policies of the NPS-UD as they apply to existing urban environments, are not relevant to this rezoning request.
 - (b) I consider the enquiry as to the appropriateness (or otherwise) of the requested rezoning is to be primarily found in Chapter 3 (Strategic Direction), Chapter 4 (Urban

³⁹ Paras 9.33 – 9.34, GIZ Section 42A Report.

⁴⁰ Paras 5.57 – 5.62, GIZ Second Rebuttal Statement.

Development) and Chapter 6 (Landscapes and Rural Character).

- (c) However, Objective 6 and Policy 8 of the NPS-UD are relevant in the context of responsiveness and infrastructure (assuming the rezoning provides 'significant' development capacity), particularly with regard to unanticipated or out of sequence developments that provide significant capacity, given it would contribute to well-functioning urban environments⁴¹.
- (d) In terms of whether the proposed rezoning would contribute to a well-functioning urban environment, I do not consider that it will. The site is not adjacent to either the Queenstown or Wanaka existing urban environments, does not have good accessibility for all people between housing, jobs, community services, natural spaces and open spaces, including by way of public or active transport, and does not support reductions in greenhouse gas emissions.

Transport Matters

- 5.19** Mr Rossiter has addressed a range of transport related matters in his reply statement regard to the requested rezoning⁴² and I rely on his comments. Overall he remains opposed to the rezoning.

Landscape Matters

- 5.20** Mr Matt Jones has addressed landscape related matters in his reply statement regard to the requested rezoning⁴³ and I rely on his comments. Overall he remains opposed to the rezoning.

6. UPPER CLUTHA TRANSPORT LIMITED (3256)

Rural Industrial Sub-Zone policy direction

6.1 During the hearing, the Panel sought guidance on the relevant policy support within Chapter 21 (Rural Zone) for my position recommending the application of the Rural Industrial Sub-Zone (**RISZ**) (subject to appropriate landscaping and transport related controls) as opposed to the GIZ⁴⁴. In particular, the Panel observed that the purpose of the RISZ (refer purpose statement in Chapter 21) includes established industrial activities based on rural resources, and queried whether the purpose is to acknowledge and provide for existing activities but not provide for new ones. That is, is the RISZ the appropriate mechanism to provide for the submitter's transfer of activity, particularly given there is no certainty as to whether the submitter will undertake the activity on the site.

6.2 The purpose statement of Chapter 21 states the following in regard to the RISZ:

*'In addition, the Rural Industrial Sub-Zone includes established industrial activities that are based on rural resources or support farming and rural productive activities.'*⁴⁵

6.3 Objective 21.2.13 and its associated policies (21.2.13.1 and 21.2.12.2) provide the more specific direction for the RISZ and state the following:

Objective 21.2.13

'Rural industrial activities and infrastructure within the Rural Industrial Sub-Zones will support farming and rural productive activities, while protecting, maintaining and enhancing rural character, amenity and landscape values.'

44 Refer to paragraph 8.7 of my s42A and paragraph 10.14, 10.32 and 10.33 of my statement of rebuttal dated 12 June 2020.

45 21.1 Zone Purpose.

Policy 21.2.13.1

'Provide for rural industrial activities and buildings within established nodes of industrial development while protecting, maintaining and enhancing landscape and amenity values.'

Policy 21.2.13.2

'Provide for limited retail and administrative activities within the Rural Industrial Sub-Zone on the basis it is directly associated with and ancillary to the Rural Industrial Activity on the site.'

- 6.4** As identified above, Chapter 21's purpose statement, along with Policy 21.2.13.1, use the word 'established' in respect to the RISZ. The purpose statement suggests that the RISZ 'includes established industrial activities' while Policy 21.2.13.1 talks to the zone providing for '*rural industrial activities and buildings within established nodes of industrial development*'. The two references to 'established' are expressing different directions in my view.
- 6.5** The purpose statement appears, on face value, to be more restrictive in its application of the RISZ. However, I am not of the view that this statement suggests that the Zone 'must', 'shall' or 'only' be applied to land that contains already established industrial activities. I do not consider that the word 'include' is as directive.
- 6.6** I am not of the view that this is the intent of the rules which do not specify any such restrictions. A more liberal interpretation of the purpose statement may suggest activity undertaken by the Submitter is established and that they simply seek to relocate to the land. However, it is acknowledged that the land could be zoned and never be occupied by the Submitter's established activity.
- 6.7** Policy 21.2.13.1, in my opinion, provides a broader view of how the word 'established' is to be applied to the RISZ. It suggests that '*established nodes of industrial development*' is the focus. It moves away somewhat from the reference set out within the purpose statement, outlining that the wider context is also important. Neither Chapter 21, nor Chapter 2 (Definitions), offers further assistance in regard to the term 'established nodes'. I note that this area of Church Road currently contains an area of RISZ which adjoins the Submitter's

land immediately to the south. This RISZ currently contains the operations of Upper Clutha Sawmill and Wanaka Firewood Ltd (located at 60 Church Road) as well as Alpine Deer New Zealand (located at 50 Church Road). However, aerial photographs appear to illustrate that part of those buildings associated with Alpine Deer New Zealand are located on an adjoining parcel of land that is not located within the existing RISZ (see Figure 1 below).

Figure 1: Extent of existing RISZ (outlined in red) adjoining the Submitter's site to the immediate south – 50 – 60 Church Road. Black lines illustrate existing allotment boundaries.

- 6.8** The site which adjoins the Submitter's land immediately to the north (located at 116 Church Road) while not currently located within the RISZ, does appear to be used for a range of Industrial and Service activities (see Figure 2 below). During a recent site visit, signage on this property illustrates the presence of Central Trusses and Frames Ltd, Wanaka Towing Services, Restoration Blasting Central Otago Ltd and Alpine Powder Coating Ltd. Although it is not

clear if these activities would meet the definition of Rural Industrial Activity⁴⁶, the immediate and wider context of land uses along Church Road (see Figure 3 below) does, in my view, lend itself to being considered an established node of industrial development as specified in Policy 21.2.13.1.

- 6.9** In summary, I am of the view that the RISZ is an appropriate mechanism to provide for the submitters transfer of activity and consider the application of the RISZ to the site to be sufficiently supported by the Chapter 21 provisions.

Figure 2: Extent of 116 Church Road (outlined in red) adjoining the Submitter's site to the immediate north illustrating the range of land uses present.

Figure 3: Extent of 'node' of industrial development. Red outline – existing RISZ. Orange outline – approximate extent of Submitters rezoning request. Purpose outline – Extent of 116 Church Road.

Scale of development within the RISZ

- 6.10** The Panel expressed concern as to the potential scale of development that could occur at the site, should the land be rezoned RISZ. I note that Rule 21.13.4 permits buildings for Rural Industrial Activities provided they meet the standards set out within Table 11 of Chapter 21. Rule 21.14.2 restricts buildings to a GFA of 500 m², beyond which a restricted discretionary activity resource consent is required.
- 6.11** The existing RISZ across 50 – 60 Church Road has an area of approximately 26,226.3 m² or 2.6 Ha. Removing 30% of this land area for access, manoeuvring and setbacks etc, these sites could provide up to 36, 500 m² buildings. It is acknowledged that this scale of built form is not currently located on these sites, with the aerial photograph (see Figure 1) demonstrating that a large proportion of the land is occupied by outdoor storage or materials.
- 6.12** This, in my view, is more likely to be the type of land use present on land located within the RISZ, particularly given the definition of Rural Industrial Activities⁴⁷ which relates to manufacturing, fabricating, processing, packing and/or storage of goods and materials grown or sourced within the Rural Zone, as well as the storage of goods, materials and machinery associated with commercial contracting undertaken within the Rural Zone. However, I do acknowledge that such activities could also include large amounts of built form that might be associated with fruit cool-stores, as an example.
- 6.13** To provide the Panel with some additional context, I provide below an aerial photograph (see Figure 4) of the existing site owned by the Submitter currently being used for their operation. I note that the area used for the activity on the site is wholly confined to the eastern extent given the steeper topography which exists in the western portion of the site.

⁴⁷ Means the use of land and buildings for the purpose of manufacturing, fabricating, processing, packing and/or storage of goods and materials grown or sourced within the Rural Zone and the storage of goods, materials and machinery associated with commercial contracting undertaken within the Rural Zone.

Figure 4: Aerial photo of site currently owned and used by the Submitter containing their existing operations. Note the boundaries of the site are outlined in red.

- 6.14** In his Evidence in Chief, Mr Edgar suggested that the RISZ and the activities that it provides for (i.e. Rural Industrial activities) *'align reasonably well with the submitter's existing operations and future aspirations'*⁴⁸.
- 6.15** Consent RM150374 has been granted for an office and workshop building with an area of 692 m² at the current site. This building is located at the southern boundary of the current site. The application for this building also triggered the need for a consent for an Industrial activity within the Township Zone (ODP zoning of the site) comprising a transport yard, vehicle storage and repair of vehicles. The Upper Clutha Transport website describes the activities undertaken by the Submitter as being related to the *'Transport and Contracting solutions. Ranging from Excavation, Live Stock Transportation, Fertiliser & Lime Spreading and more'*⁴⁹. This website generally emphasises the involvement of the Submitter in supporting farming and rural type

production activities undertaken in the Rural Zone. Therefore, the existing activity and its range of buildings and uses on the current site provides a useful indication of what type of development is likely to come about from the establishment of Rural Industrial activities if the land were to be rezoned RISZ. However, I acknowledge that this existing activity is not determinative of what might eventuate on the land subject to the relief.

Revised provisions

- 6.16** For the same reasons set out in my s42A⁵⁰ and first statement of rebuttal⁵¹, I remain opposed to the application of the GIZ to the land. I do however continue to support the principle of applying the RISZ, subject to the inclusion of adequate landscaping and transport related controls⁵².
- 6.17** Since the close of the hearing, Mr Scott Edgar (planning expert for the Submitter) and Mr Ben Espie (landscape expert for the Submitter) have been in discussion with Mr Matt Jones (landscape expert for Council) and myself to seek agreement, where possible, on a set of RISZ provisions.
- 6.18** I confirm that, following this discussion, and having regard to the expert reply statements of Mr Jones and Mr Rossiter (transport expert for the Council) I recommend variations to the RISZ components of Chapter 21 (Rural Zone) which address the outstanding landscape and transport issues as set out below. However, agreement has not been reached on the following matters:
- (a) The overall principle and higher order policy support for the application of the GIZ to the land;
 - (b) The provision of residential activities;
 - (c) The width of the recommended Building Restriction Areas (**BRA**) and Activity Area (**AA**) 2 to be applied to the eastern boundary of the land; and

- (d) The 10,000 m² GFA trigger for consideration of traffic and transport related matters.

6.19 I recommend that the RISZ be applied to the land in association with the following additions to Chapter 21 (deletions shown in ~~blue strikethrough~~ and additions underlined):

Recommended new policy

21.2.13.x

Manage activities and development within areas of the Rural Industrial Sub-Zone in Luggate by applying development controls and landscaping requirements within Building Restriction Areas and Activity Areas that are spatially defined on the planning maps to avoid adverse effects on visual amenity.

6.20 The recommended provisions seek to apply rules with a specific spatial extent identified in the planning maps as opposed to being reliant on a structure plan. The reason for this is that the approach to applying structure plans within the PDP is to include them within Chapter 27 (Subdivision and Development) (with relevant controls to be addressed at the time subdivision takes place on the site), and within the relevant PDP chapter only if the zone is a 'special zone'.

6.21 Given the RISZ is not a special zone and there are matters needing to be addressed in the absence of subdivision, I recommend that the BRAs and Activity Areas be specifically identified and annotated on the planning maps. This approach will ensure that any effects from the range of permitted land use activities (i.e. buildings and Rural Industrial

Activities etc) are addressed in the absence of subdivision. This approach is not out of step with the PDP. In particular, I note that a ‘*Specific Rules Apply*’ legend item already exists in the Council’s GIS mapping system. This mapping annotation identifies the spatial application of specific rules⁵³.

Landscape Matters

6.22 As detailed above, a set of controls have been recommended to address landscape effects. Para 2.7 of Mr Jones’ reply statement⁵⁴ summarises, the recommended rule framework in regard to the BRA and Activity Areas and his Appendix B visually identifies these areas on the land subject to the submission.

6.23 The subject land is located within a Rural Character Landscape (**RCL**). Chapter 6 sets the critical direction for managing activities within RCLs. Policy 6.3.4.6⁵⁵ provides the following direction, which is relevant to the recommended rezoning:

Avoid adverse effects on visual amenity from subdivision, use and development that:

- a. is highly visible from public places and other places which are frequented by members of the public generally (except any trail as defined in this Plan); or*
- b. forms the foreground for an Outstanding Natural Landscape or Outstanding Natural Feature when viewed from public roads. (3.2.1.1, 3.2.1.8, 3.2.5.1A, B, 3.2.5.2A, B, 3.3.20- 21, 3.3.24-25, 3.3.30, 3.3.32)*

6.24 Having visited the land, including from the DoC administered publicly accessible ‘Upper Clutha River Track’ adjoining the land to the east, Mr Jones is of the opinion that the recommended BRAs, three activity areas and stepped building height requirements, in conjunction with the existing RISZ provisions controlling building appearance and scale, will

⁵³ Examples include building heights on the southern side of Frankton Road (SH6) (Rules 9.5.1.3 and 9.5.3.3), bulk, location and activity rules at 30-46 Gorge Rd, Queenstown (Rules 16.5.1.3, 16.5.3, 16.5.6, and 16.5.7), the Lake Avenue Height Restriction Area (Rule 7.5.2.2), and the Lakes District Hospital Site (Rule 7.4.4).

assist in avoiding potential adverse effects on visual amenity, in the context of the surrounding environment⁵⁶.

- 6.25** I rely on the assessment and conclusions provided by Mr Jones in regard to this matter.

Transport Matters

- 6.26** Other outstanding matters raised with this relief included those relating to transport and roading upgrades⁵⁷. In particular, the transport assessment and proposed GFA rule provided by the submitter.

- 6.27** I had also previously raised concerns in regard to the application of Mr Edgar's proposed transport related GFA rule⁵⁸.

- 6.28** Mr Rossiter's (transport expert for Council) reply statement⁵⁹ addresses this matter. Overall, he is not opposed to the land being rezoned RISZ. However, based on his further investigations in relation to vehicle generation associated with type of development anticipated, the current formation of Church Road and the Council's Engineering Code of Practice, he recommends that the GFA trigger for consideration of transport matters be reduced from 25,000 m² to 10,000 m²⁶⁰.

- 6.29** I rely on Mr Rossiter's expert views in regard to this matter and have recommended that this site specific rule be included within the variations for the RISZ.

- 6.30** For completeness, I note that in my first rebuttal statement I did not support this rule due to the limits it place on the land, its application within the context of the of the GIZ (being a business enabling urban zone), and based on the views presented by Mr Smith. Having reflected on the nature of the type of controls necessary to enable the RISZ

rezoning of the land, and based on the assessment and findings of Mr Rossiter, I am no longer opposed to this approach.

Section 32AA Assessment

- 6.31** I consider that the recommended provisions are the most appropriate, effective and efficient way to achieve Objective 21.2.13⁶¹. The recommended policy seeks to establish a framework that enables the development of site specific and spatially defined rules to *protect and maintain rural character, amenity and landscape values*. Emphasis in this case is placed on protect and maintain given the strong direction set out within Policy 6.3.4.6 to *avoid adverse effects on visual amenity*.
- 6.32** The recommended BRA, Activity Areas, stepped height controls and landscaping trigger will work together to ensure that rural character, amenity and landscape are protected and maintained. The proposed landscaping rule is effective and efficient as it triggers the need for landscaping to be assessed and implemented prior to the development of land uses.
- 6.33** An alternative approach to achieving the direction set out within Objective 21.2.13 may be to amend the activity status for buildings (as it applies to the subject land) to restricted discretionary and rely on case by case assessments of development to ensure adequate measures are taken in regard to landscaping and screening to achieve the direction set out above. In my view, the more nuanced approach of the recommended framework responds to the specific constraints of the land and achieves a greater level of certainty in regard to the overall intent to avoiding adverse effects on visual amenity.

Economic Matters

- 6.34** Ms Hampson addressed the request for GIZ zoning on the site in her EIC⁶². She supported the relief on economic grounds on the basis that it would enable the Submitter's activity to relocate such that it would enable it to operate more sustainably over the long term (with reduced

⁶¹ *Rural industrial activities and infrastructure within the Rural Industrial SubZones will support farming and rural productive activities, while protecting, maintaining and enhancing rural character, amenity and landscape values*
⁶² Section 13, EIC of Ms Hampson.

reverse sensitivity effects), potentially expand in the future, and maintain and consolidate industrial employment in Luggate⁶³. Overall, I am of the view that these economic benefits could equally be realised through the application of the RISZ to the site. In the event a different operator(s) chooses to establish on the land, a range of similar economic benefits are likely to be realised in my view.

Other matters

- 6.35** I note that an overhead powerline runs approximately across the land subject to recommended AA2. This powerline is not shown as being a 'Transpower Corridor' or 'Aurora Distribution Lines' on Council's GIS planning maps.
- 6.36** I note that the Topic 17 consent order⁶⁴ identified the inclusion of an advice note within Chapter 21 drawing attention to those obligations of the New Zealand Electrical Code of Practice for Electrical Safe Distances (NZECP34:2001). As such, no further action is necessary in regard to this matter.

NPS-UD in relation to the RISZ rezoning

- 6.37** The proceeding points relate specifically to the request to include land at Victoria Flats within the GIZ (original relief sought):
- (a) The land subject to the UCT rezoning request is currently within the Rural Zone. This location is not within the District's urban environment as defined by the NPS-UD and the recommended RISZ does not form part of the urban environment. Given this, much of the objectives and policies of the NPS-UD are not relevant to this rezoning request.
 - (b) I consider the enquiry as to the appropriateness (or otherwise) of the requested change is to be primarily found in Chapter 3 (Strategic Direction), Chapter 4 (Urban Development) and Chapter 6 (Landscapes and Rural Character).

63 Para 13.2, EIC of Ms Hampson.

64 Attached to Ms Dowd's EIC for Submission 3153.

- (c) However, Objective 6 and Policy 8 of the NPS UD are considered relevant in the context of responsiveness and infrastructure, particularly with regard to unanticipated or out of sequence developments that provide significant capacity provided it would contribute to well-functioning urban environments⁶⁵. Given the area of land subject to the submission and the controls needed to manage landscape and transportation related effects, it is unlikely to be considered as providing significant capacity.
- (d) In terms of whether the Submitter's proposed GIZ rezoning would contribute to a well-functioning urban environment, I do not consider that it will. The site is not adjacent to either the Queenstown or Wanaka existing urban environments, does not have good accessibility for all people between housing, jobs, community services, natural spaces and open spaces, including by way of public or active transport, and does not support reductions in greenhouse gas emissions.

7. QUEENSTOWN AIRPORT CORPORATION (3316) (QAC)

- 7.1** The Panel requested that I offer some assessment of QAC's rezoning relief requesting the ODP Frankton Flats B Zone (Activity Area E1). I addressed the issues preventing the application of this ODP zone within my s42A.⁶⁶
- 7.2** Activity Area E1 is identified in Objective 10 of the Frankton Flats B Zone as *'An area for industrial and service activities, which has a standard of amenity that is appropriate to the function of the Activity Area'*. Its associated policies⁶⁷ go on to direct that Industrial Activities and Service Activities (and office space ancillary to these activities) are enabled, and that Residential, Retail and Visitor Accommodation activities are generally excluded. They go on to direct that the adverse effects of noise, glare, dust and pollution are to be minimised and that subdivision within the Zone should relate to Industrial Activities and Service Activities.

⁶⁵ Subpart 2 – Responsive Planning (3.8).

⁶⁶ Paras 9.1 and 9.7, GIZ Section 42A Report.

⁶⁷ Policies 10.1 – 10.21, ODP Part 12, Frankton Flats Special Zone (B).

7.3 The direction set out in the objective and policies relevant to Activity Area E1 appears to be largely aligned with the approach set out within Chapter 18A in terms of enabling Industrial and Service activities, and excluding the range of other activities that have the capacity to compromise the District's industrial economy.

7.4 However, I am of the view that the overall intent of Chapter 18A to more specifically and directly provide for the establishment, operation and growth of those activities known to comprise the District's industrial economy more appropriately meets the direction set out within Chapter 3 of the PDP. Overall therefore, I remain of the view that the best zoning for the site at this time is GIZ.

8. WILLOWRIDGE DEVELOPMENTS LIMITED (3201)

8.1 My s42A provided some comment in regard to the mapping error which applied GIZ zoning to the access strip from Riverbank Road to the notified Active Sports and Recreational Zone (**ASRZ**) at 101 Ballantyne Road. This access strip directly adjoins the Submitter's land to the north and forms part of the same certificate of title as 101 Ballantyne Road.

8.2 The Panel queried the appropriateness of amending this error through Clause 16 of Schedule 1 of the Act. I draw the Panel's attention to the legal reply of Ms Scott and planning reply of Mr Elias Matthee (relating to 101 Ballantyne Road) which addresses this matter.

8.3 The Panel queried, if the access strip was rezoned to ASRZ, what impact this would have on the requested GIZ extension over that part of the Willowridge site located to the north of the access strip.

8.4 I considered the request to extend the GIZ in my Section 42A report⁶⁸. I recommended that this relief be rejected and I maintain my view on this matter, whether or not the Panel agree with the position set out by Ms Scott and Mr Matthee.

68 Paras 8.9 – 8.13, GIZ Section 42A Report.

9. BUSH CREEK PROPERTY HOLDINGS LTD (3353) AND BUSH CREEK PROPERTY HOLDINGS NO.2 LIMITED (3353), BUSH CREEK INVESTMENTS LIMITED, AND M J THOMAS (3355)

9.1 The Panel was interested in the high density row of land along the boundary of the site to the south-west. The Panel observed that this is a special zone (Meadow Park Special Zone (**MPSZ**)) not yet part of the PDP and raised concern about the ability to appropriately rezone the site without knowing what the neighbouring special zone would be zoned in the future.

9.2 The MPSZ is located at 12.16 of the ODP. Its proximity to the industrial adjoining residential uses is considered in the 'issues' section of the chapter under the heading *Reverse Sensitivity / Interface Effects* which states the following:

*'Adjoining the northern boundary of the Meadow Park is the Arrowsmith Industrial Area. Residential activities right to the boundary of the zone have the potential to create adverse interface effects between these two incompatible activities. It is therefore desirable to plan for this now.'*⁶⁹

9.3 Objective 1 sets out that the MPSZ is to be comprehensively designed and Policy 1 outlines that this design is to take the shape of a structure plan and rules that *'adequately deals with reverse sensitivity issues between existing residential and industrial activities'*.

9.4 The Meadow Park Structure Plan is included in the rules section for the Zone (Section 12/17 of the ODP) (see Figure 5 below). The 'Open Space - Industrial Area (OS-IND)' has been built into this structure plan which is designed *'To provide for a landscaped buffer area between the residential areas and the existing industrial zone to protect residential amenity values and prevent reverse sensitivity issues'*⁷⁰.

9.5 Table 1 describes the effect of the MPSZ rule set on land located within the OS-IND:

69 Provision 12.16.2.

70 12.17.1, Zone Purpose.

Provision	Activity	Effect of provision
12.17.3.3(iii)	Commercial Recreation Activities	Restricted discretionary activity
12.17.3.4(i)	Any Activity, other than the provision of Open Space	Non-complying activity
12.17.5.2(i)(b)	No residential activities shall be undertaken in OS-IND areas of the Structure Plan	Any breach requires a Non-complying activity resource consent

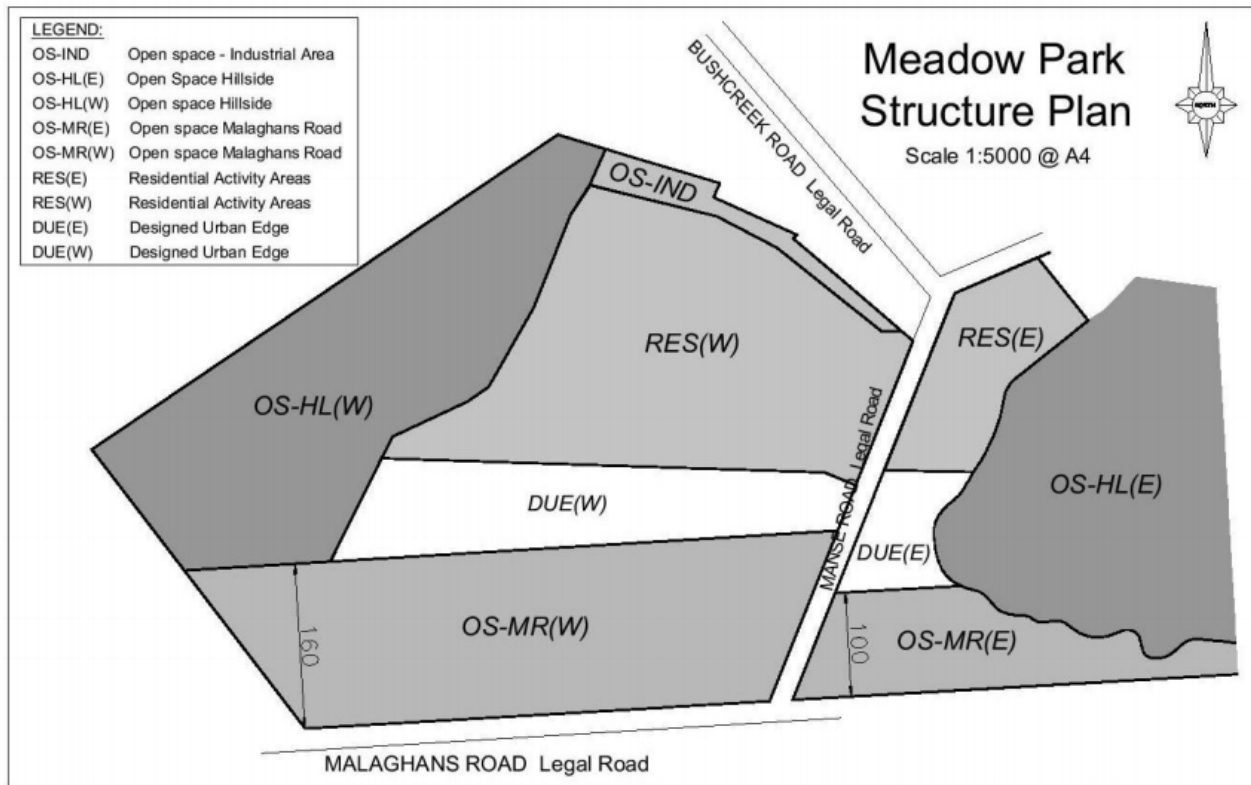

Figure 5: Meadow Park Structure Plan.

9.6 Resource Consent RM040230 was granted on 26 May 2004 on the MPSZ allotment immediately adjoining the Arrowtown GIZ to the south (i.e. the land containing the terraced buildings). This consent provided for 22 residential allotments by way of unit title, and land use consent to construct 22 residential units, one on each of these allotments. On 1 September 2005 Resource Consent RM041181 was granted to operate the 22 residential units for visitor accommodation. Having

reviewed the documents for these approved consents, I am not aware of any additional restrictions on the activities located within the immediately adjoining part of the MPSZ (i.e. no complaints covenants or additional insulation/mechanical ventilation requirements that might mitigate potential reverse sensitivity effects from adjoining Industrial and Service activities).

- 9.7** The proximity of the GIZ to the MPSZ, and the Lower Density Suburban Residential Zone to the immediate east, is specified in Rules 18A.5.3 (increased boundary setbacks), 18A.5.6 (reduced building height and the application of recession plains) 18A.5.7(c) (controls on light spill), 18A.5.8(b) (outdoor storage screening), 18A.5.9(a) (fencing), and the notified variation to Chapter 36 (noise received in any other zone must meet the standards for noise within the receiving zone).
- 9.8** Taking into account these matters, I am not of the view that any uncertainty as to the potential future land use management framework relating to the MPSZ changes my recommendation to include the existing Arrowtown Industrial Zone land within the GIZ.

NPS-UD in relation to the Arrowtown GIZ rezoning submissions

- 9.9** The proceeding points relate specifically to the requests to rezone notified GIZ land at Arrowtown to BMUZ:
- (a) Applying BMUZ to the Arrowtown GIZ would result in a direct loss or substantially compromised capability to have or enable sites for industrial businesses.
 - (b) The GIZ in Arrowtown is strategically located close to areas of housing and existing commercial development thereby promoting good accessibility to jobs by way of public or active transport that would support reductions in greenhouse gas emissions.
 - (c) The application of GIZ in Arrowtown is integrated with existing infrastructure, it does not rely on new or upgraded infrastructure.

- (d) The inclusion of land at Arrowtown within the GIZ is strategic as it seeks to provide for the medium and long term viability of those in-stiu parts of the industrial economy.
- (e) While the rezoning request may add to commercial and housing capacity by way of BMUZ zoning, it would not in my view, as outlined above, contribute to the provision of a well-functioning urban environment
- (f) The relief would reduce the range of available and viable opportunities for Industrial and Service activities to be located in close proximity to places where people live, which has good capability to be served by public transport in the future, and which has a high demand for industrial businesses.

10. TUSSOCK RISE LIMITED (3218)

General matters

10.1 In his opening comments to the Panel, Mr Graeme Todd (counsel for the Submitter) stated that the development capacity enabled by the Coneburn Industrial Zone had not been taken into account within Ms Hampson's Business Development Capacity Assessment (**BDCA**). This is not the case. Ms Hampson undertook an interim update of the BDCA which was attached to her Evidence in Chief⁷¹ at Appendix B. Ms Hampson explains how this interim update supersedes the BDCA 2017 results⁷² and clearly specifies the inclusion of the Coneburn Industrial Zone throughout her analysis⁷³.

10.2 Mr Todd also stated that Wanaka does not demand a large area of industrial land and that any such demand is located elsewhere in the District. Ms Hampson's expert evidence has shown that the District's industrial economy is '*growing rapidly and has demonstrated growth rates faster than the rest of the district's economy*⁷⁴, and that this growth is expected to continue. Figure 5.7 of Ms Hampson's assessment of the District's industrial economy (appended to the GIZ Section 32 Evaluation) examines recent growth in business counts in

71 Dated 18 March 2020.

the industrial economy by ward. In her commentary, Ms Hampson outlines that *'While the total industrial economy has grown by 161% during that period, Wanaka's industrial economy has increased at a much faster rate. It has increased from 234 businesses in 2001 to 736 in 2017 (growth of 215% or 502 businesses). Wanaka's total economy has also grown faster than the district average, but the industrial economy has increased its share of total businesses from 28% to 30%.'*⁷⁵ As an example, I understand that recently subdivided⁷⁶ sites within the Wanaka GIZ, at Enterprise Drive (located within the ODP Industrial B Zone) have sold out⁷⁷.

- 10.3** Mr Paul Miller (director of Tussock Rise Limited) considered that the GIZ would be associated with dirty and less desirable activities. While the GIZ should be a place in which activities more commonly associated with noise, glare, dust, odour, shading, visual and traffic effects can locate, I reiterate the analysis provided by Ms Hampson on the Districts' industrial economy⁷⁸. It explains that the District's economy does not comprise the more 'heavy' or traditional types industrial activities of the nature described by Mr Miller. In addition, I note that the GIZ provisions are designed to ensure any effects generated by activities within the Zone do not adversely affect the amenity of other zones.

Building heights

- 10.4** The Panel requested clarification on the application of building heights within the BMUZ in Wanaka. Rule 16.5.9.1 specifies the different building heights that apply within the BMUZ. Rule 16.5.9.1(b) states that the maximum building height within any BMUZ in Wanaka is 12 metres.
- 10.5** Submitters Rae and Dave Wilson⁷⁹, and Shona and Bob Wallace⁸⁰ appeared at the hearing to discuss the matter of building heights with

respect to the Tussock Rise land. The submitters opposed the notified 10 metre height limit within the GIZ on the Tussock Rise land. Rule 11.5.6(10)(i) of the ODP Industrial B Zone states that the maximum height of any building within the 'Industrial B Zone - Connell Terrace Precinct' (as identified on the structure plan within the chapter) shall be 7 metres above ground level. Rule 11.5.6(10)(i)(a) identifies a lower building height (3.5 metres) for 'Special Use Area A'. 'Note 1' is included within Rule 11.5.6 setting out the following '*For the Industrial B Zone (Connell Terrace Precinct) the ground level is as shown on the contour plan entitled the "Industrial B Zone Contour and Zone Plan for Connell Terrace Precinct" Rev C and dated 8 October 2012.*'

- 10.6** The effect of Rule 11.5.6(10) and the inclusion of the contour plan is described in the Commissioner's decision on Plan Change 36 (creation of the Industrial B Zone):

*'The finished contour plan we recommend shows the finished ground level (from which building height is measured) significantly lower overall than was notified. With the exception of the finished ground level of those lots adjacent to Gordon Rd , the rest of the site will be lower than was notified, with the finished ground around 0.5 metre lower through the middle of site and up to 1.2 metres lower in the south and south-western parts of the site. Whilst the developer is not required to excavate to those contours, building height will be measured from them and therefore, if they don't excavate to that extent, the building itself will simply need to be lower. If the developer does opt to maximise building height by undertaking earthworks in accordance with the contour plan, then the land will generally be between 0.5 metre and 3.5 metres lower than the current ground level.'*⁸¹

- 10.7** It is understood that the consideration of this matter included expert landscape assessments.

- 10.8** As noted above, it was not the intent of the Industrial B Zone to require excavation of the land, but to limit overall building height.

⁸¹ Plan Change 36: Creation of an Industrial B Zone and Application of that Zone to Land Adjacent to The Ballantyne Rd Industrial Zone, Report, Reasons, and Recommendations of L Cocks and J Battson, acting as Independent Commissioners Appointed by The Queenstown Lakes District Council Pursuant to Section 34a of the Resource Management Act 1991, 13 March 2012.

- 10.9** I note that the Commissioner's decision on Plan Change 36 was appealed and subsequently resolved through mediation. The Environment Court released its consent order⁸² following the subsequent filing of the consent memorandum.
- 10.10** On balance, taking into account the information traversed by the previous plan process and the elevated topography of the subject land, a 10 metre height limit across the GIZ land owned by Tussock Rise may result in unintended adverse visual effects on surrounding occupiers. In the absence of any other specific landscape assessment, I recommend that the 7 metre height limit be applied over the GIZ land that is owned by Tussock Rise, i.e. Lot 2 DP 477622.
- 10.11** However, I do not recommend maintaining the contour plan identified within the ODP Industrial B Zone for this land. I note that the outcome sought by this contour plan did not necessarily require the lowering of the ground level and may therefore result in variable building heights occurring across the land depending on the overall subdivision outcome (i.e. if the ground was lowered prior to the lots being created). In my view, this is likely to create significant costs, either for the subdivider or future lot owners, and may limit the type of built form that could occur on some sites to the detriment of their use for Industrial and Service activities.
- 10.12** I am of the opinion that, in combination with the recommended lower height limit, the separation distance of the land from neighbouring non-GIZ land, the BRAs identified on the structure plan, and the landscaping of these BRA (as required by the recommended amendments to Chapter 27, are sufficient to address potential landscape and visual effects of GIZ type development on the site.
- 10.13** I note that this recommended lower height limit may impose additional restrictions on future Industrial and Service owners and/or occupiers. The resulting lower building heights may not provide the necessary height for some activity types and push them to seek locations in other parts of the GIZ where this additional height restriction does not apply.

82 ENV-2012-CHCH-57.

Alternatively, they may seek locations outside of the District if they are not able to obtain vacant land or redevelop an existing site to accommodate a 10 metre high building.

- 10.14** An alternative approach that the Panel may consider is retaining the 10 metre height limit as well as the contour plan restrictions present within the ODP Industrial B Zone. In combination with the separation from non GIZ properties and the landscaped BRAs, this may assist in reaching an appropriate balance between building height and mitigating landscape effects. However, for the reasons outlined above, I do not support the retention of the contour plan earthwork restrictions.
- 10.15** As per my discussion above in regard to the Upper Clutha Transport rezoning, I recommended applying the ‘*Specific Rules Apply*’ legend item in the Council’s GIS mapping system to identify the specific spatial application of this rule. In combination with this approach, I recommend the following amendment to Table 18A.5 (deletions shown in ~~strike through~~ and additions underlined):

NPS-UD in relation to the Tussock Rise Limited rezoning

- 10.16** The proceeding points relate specifically to the request of Tussock Rise Limited to rezone notified GIZ land at Wanaka to BMUZ:
- 10.17** With regard to ‘well-functioning urban environments’.⁸³
- (a) the Tussock Rise land is some of the only undeveloped GIZ land in Wanaka, being the only zone that specifically has or

⁸³ Objective 1 and related Policy 1 of the NPS-UD.

enables sites for business that comprise the District's industrial economy. Applying BMUZ to the land would result in a direct loss or substantially compromised capability to have or enable these sites.

- (b) The GIZ in Wanaka is strategically located close to areas of housing and existing commercial development thereby promoting good accessibility to jobs by way of public or active transport that would support reductions in greenhouse gas emissions.
- (c) New GIZ sites on the Tussock Rise land would be likely to support competitive land and development markets in the GIZ.

10.18 With regard to 'responsiveness':⁸⁴

- (a) The application of GIZ in Wanaka is integrated with existing infrastructure, it does not rely on new or upgraded infrastructure.
- (b) For the reasons outlined in my previous evidence⁸⁵, the inclusion of land at Wanaka within the GIZ is strategic.
- (c) While the request may add to commercial and housing capacity by way of BMUZ zoning, it would not in my view, as outlined above, contribute to the provision of a well-functioning urban environment.

10.19 With regard to intensification:⁸⁶

- (a) The requested rezoning relief would, in my view, reduce the range of available and viable opportunities for Industrial and Service activities to be located in close proximity to places where people live, which has good capability to be served by public transport in the future, and which has a high demand for industrial businesses.

10.20 Overall, I am not of the view that the relief requested by the Submitter gives effect to the NPS-UD.

⁸⁴ Objective 6 and related Policy 8 of the NPS-UD.

⁸⁵ 9.2 – 9.10, GIZ Rebuttal Statement.

⁸⁶ Objective 3 of the NPS-UD.

Economic Matters

10.21 Ms Hampson has responded to other points raised in the Supplementary Statement of Mr Devlin (planning expert for Submitter) and Mr Ballingall (economic expert for Submitter) dated 13 August 2020 relating to land supply and the NPS-UD⁸⁷ in addition to answers provided by Mr Ballingall at the hearing. I rely on her comments in regard to these matters.

Transportation Matters

10.22 Mr Rossiter has provided reply evidence for this rezoning request in regard to transportation matters⁸⁸. Mr Rossiter remains concerned with the type of traffic interactions and conflicts that would result from BMUZ being applied to the land. I rely on his comments in regard to this matter.

18A General Industrial Zone

18A.1 Purpose

The purpose of the General Industrial Zone is to provide for the establishment, operation and long term viability of Industrial and Service activities. The Zone recognises the significant role these activities play in supporting the District's economic and social wellbeing by prioritising their requirements, and zoning land to ensure sufficient industrial development capacity.

The Zone seeks to ensure a range of site sizes are available, including for those Industrial and Service activities which require larger buildings and more space for the purpose of outdoor storage, manoeuvring ~~of and parking~~ vehicles including heavy vehicles. The role that ancillary Office, Retail and Commercial activities play in supporting Industrial and Service activities is recognised and provided for. Activities and development that would not primarily result in sites being used for Industrial and Service activities are avoided.

A number of existing Office, Commercial and Retail activities were established within the Zone under the previous District Plan framework. The Zone seeks to recognise these activities and allow them to continue to lawfully operate and provide opportunities for them to change overtime. Any such changes will be limited and carefully managed to support the overall intent of the Zone to provide for Industrial and Service activities.

While the Zone seeks to provide for land uses more commonly associated with noise, glare, dust, odour, shading, visual and traffic effects and other similar effects, it also seeks to manage activities and development to ensure that appropriate levels of amenity are achieved for people who work within and visit the Zone, and to avoid adverse amenity effects on land located outside of the Zone.

18A.2 Objectives and Policies

18A.2.1 Objective - Industrial and Service activities are enabled within the Zone and their long-term operation and viability is supported.

Policies

18A.2.1.1 Enable a diverse range of Industrial and Service activities that provide benefit in the form of economic growth and skilled employment opportunities.

GENERAL INDUSTRIAL ZONE 18A

- 18A.2.1.2 Enable Office, Retail and Commercial activities that are ancillary to Industrial or Service activities.
- 18A.2.1.3 Enable the operation of food and beverage retail activities which serve the daily needs and convenience of workers and visitors to the Zone.
- 18A.2.1.4 Recognise that Industrial and Service activities have the potential to create noise, glare, dust, odour, shading, traffic effects and other effects that can be incompatible with activities that are enabled in adjacent or nearby non-industrial zones.

18A.2.1.x Recognise and provide for Trade Suppliers within the Zone only where the following can be demonstrated:

- a. the activity plays a role in supporting the establishment, operation and long term viability of Industrial and Service activities;
- b. the activity is primarily involved in wholesaling related trade comprising the storage, sale and distribution of goods to other businesses and institutional customers, including trade customers; and
- c. the activity has an operational need to be located within the Zone due to space requirements for buildings, storage and loading of materials, and for the manoeuvring and parking of heavy vehicles.

18A.2.1.5 Manage subdivision and development within the Zone to ensure that sites are well suited to serving the needs of a diverse range of Industrial and Service activities now and into the future.

18A.2.2 Objective – The establishment, operation and growth of Industrial and Service activities within the Zone is not undermined by incompatible land uses.

Policies

18A.2.2.1 Avoid ~~the following~~ activities that ~~are not compatible with the primary function of the Zone and have the ability~~ are likely to displace or constrain the establishment, operation and long term viability of Industrial and Service activities including:

- a. Office, Retail and Commercial activities unless: that
 - i. they are not ancillary to Industrial or Service activities, or
 - ii. the activity is replacing an existing Office, Commercial or Retail activity lawfully established prior to [xx date Chapter 18A becomes operative] on the same site and is of the same or similar scale and intensity.

- a. is predominantly in the business of retailing such that they become retail destinations or commercial attractions for use by the general public and which do not support the operation and long term viability of Industrial and Service activities;
- b. could give rise to reverse sensitivity effects on Industrial or Service activities; and
- c. could give rise to adverse effects on the safety and efficiency of the transportation network.

- 18A.2.2.2 Avoid the cumulative establishment of activities and development within the Zone that would undermine the role played by town centre and other key business zones as the District's strategic hubs of economic activity.
- 18A.2.2.3 Limit the scale, location and function of Office, Retail and Commercial activities to ensure they are ancillary to Industrial or Service activities.
- 18A.2.2.4 Ensure all Office, Retail and Commercial activities are constructed and operated to mitigate adverse reverse sensitivity effects to Industrial or Service activities.
- 18A.2.2.5 Limit the scale, location and function of food and beverage related commercial activities within the Zone to ensure they serve the direct needs of workers and visitors to the Zone or directly relate to and support the operation of an Industrial activity.
- 18A.2.3 Objective - Activities and development within the Zone provide a level of amenity which make it a pleasant, healthy and safe place to work in and visit.**

Policies

- 18A.2.3.1 Manage activities and development, both within sites and at their interface with public spaces, to ensure that people working in and visiting the Zone enjoy a pleasant level of amenity while recognising that the type of amenity experienced within the Zone may be lower than that anticipated within zones intended to accommodate more sensitive land uses.
- 18A.2.3.2 Control the location of ancillary Office, Retail and Commercial activities and encourage them to actively engage with the street frontage and public places.
- 18A.2.3.3 Control the bulk, location, design, landscaping, screening and overall appearance of sites and buildings, incorporating where relevant, the seven principles of Crime Prevention through Environmental Design (CPTED) to ensure they contribute to a quality, healthy and safe built environment while meeting the functional needs of Industrial and Service activities.
- 18A.2.3.4 Control activities and development by applying sound insulation ventilation standards or other appropriate mitigation to ensure they are not significantly adversely affected by Industrial and Service activities or by airport noise.
- 18A.2.4 Objective - Activities and development within the Zone are undertaken in a way that does not adversely affect the amenity of other zones.**
- 18A.2.4.1 Manage noise, glare, dust, odour, shading, visual and traffic effects of activities and development within the Zone to ensure the amenity of other zones is not adversely affected, including through the use of Building Restriction Areas.

PART 3

GENERAL INDUSTRIAL ZONE 18A

18A.2.4.2 Manage adverse effects of activities on the visual amenity of main gateway routes into Queenstown, Wanaka and Arrowtown through the use of landscaping and by controlling the bulk and location of buildings and development.

18A.2.3.x Objective - Activities sensitive to aircraft noise within the Queenstown Airport Air Noise Boundary or Outer Control Boundary are avoided or managed to mitigate noise and reverse sensitivity effects.

Policies

18A.2.3.x.x(1) Require as necessary all alterations and additions to buildings containing an Activity Sensitive to Aircraft Noise located within the Queenstown Airport Air Noise Boundary or Outer Control Boundary to be designed and built to achieve specified design controls.

18A.2.3.x.x(2) Avoid any new Activity Sensitive to Aircraft Noise within the Queenstown Airport Air Noise Boundary or Outer Control Boundary.

18A.3.2 Interpreting and Applying the Rules

18A.3.2.1 A permitted activity must comply with all the rules listed in the Activity and Standards tables, and any relevant district wide rules.

PART 3

GENERAL INDUSTRIAL ZONE 18A

- 18A.3.2.2 Where an activity does not comply with a Standard listed in the Standards table, the activity status identified by the 'Non-Compliance Status' column shall apply. Where an activity breaches more than one Standard, the most restrictive status shall apply to the activity.
- 18A.3.2.3 For controlled and restricted discretionary activities, the Council shall restrict the exercise of its discretion to the matters listed in the rule.
- 18A.3.2.4 These following abbreviations are used in the following tables. Any activity which is not permitted (P) or prohibited (PR) requires resource consent.

18A.3.2.X Compliance with the New Zealand Electrical Code of Practice for Electrical Safe Distances ("NZECP34:2001") is mandatory under the Electricity Act 1992. All activities, such as buildings, earthworks and conductive fences regulated by NZECP34: 2001, including any activities that are otherwise permitted by the District Plan must comply with this legislation. Chapter 30 (Energy and Utilities) part 30.3.2.c has additional information in relation to activities and obligations under NZECP43:2001.

Variation to Chapter 27 - Subdivision and Development

General Industrial Zone

27.3.13 Objective - Subdivision within the General Industrial Zone enables the establishment, operation and long term viability of Industrial and Service activities which cannot locate elsewhere in this District, including those Industrial and Service activities which require larger buildings and more space for the purpose of vehicle manoeuvring, and loading and vehicle parking.

Commented [LP28]: NPS-UD

Policies

27.3.13.1 Enable subdivision and development within the General Industrial Zone that provides for the establishment, operation and long term viability of Industrial and Service activities by ensuring any new lots created are capable of accommodating activities and development that is anticipated by the Zone standards.

27.3.13.2 Recognise and provide for subdivision activities which create smaller lot sizes than anticipated within the General Industrial Zone where there is a demonstrated need for Industrial and Service activities on lots of that size and where it can be shown that the lots could viably provide for their long term functional needs.

27.3.13.3 Ensure any new subdivision provides adequate road access, onsite parking, loading and manoeuvring suitable for the activities anticipated to establish within the lots.

Commented [LP29]: NPS-UD

27.3.13.4 Ensure any new subdivision integrates well with current and future transport networks, including roads and public and active transport systems by managing the functional layout and arrangement of lots and their access.

27.3.13.5 Ensure subdivision only occurs where the necessary infrastructure exists to service the lots.

27.3.13.6 Avoid subdivision that creates lots of a size and layout that limit the intended function of the General Industrial Zone to provide for the long term establishment, operation and long term viability of Industrial and Service Activities.

Connell Terrace Structure Plan

27.3.13.7 Ensure subdivision is consistent with the Connell Terrace Structure Plan by requiring;

- a. landscaping and on-going maintenance of the Building Line Restriction Area shown on the Connell Terrace Structure Plan; and
- b. a roading layout that is consistent with the Connell Terrace Structure Plan.

Ballantyne Road Structure Plan

27.3.13.8 Ensure subdivision is consistent with the Ballantyne Road Structure Plan by requiring;

- a. landscaping and on-going maintenance of the Building Line Restriction Area shown in the Ballantyne Road Structure Plan; and
- b. a roading layout that is consistent with the Ballantyne Road Structure Plan.

	Low Setting	High Setting
Bedrooms	1-2 ac/hr	Min. 5 ac/hr
Other Critical Listening Environments	1-2 ac/hr	Min. 15 ac/hr
Noise from ventilation systems shall not exceed 35 dB $L_{Aeq}(1 \text{ min})$, on High Setting and 30 dB $L_{Aeq}(1 \text{ min})$, on Low Setting. Noise levels shall be measured at a distance of to 2 m from any diffuser.		
Each system must be able to be individually switched on and off and when on, be controlled across the range of ventilation rates by the occupant with a minimum of 3 stages.		
Each system providing the low setting flow rates is to be provided with a heating system which, at any time required by the occupant, is able to provide the incoming air with an 18 °C heat rise when the airflow is set to the low setting. Each heating system is to have a minimum of 3 equal heating stages.		
If air conditioning is provided to any space then the high setting ventilation requirement for that space is not required.
