

# A BOIL WATER NOTICE IS IN PLACE FOR THIS LOCATION UNTIL FURTHER NOTICE

Please boil water for one minute then let it cool for any of the following uses:

- **Drinking and preparing food**
- **Making baby formula and juices**
- **Cooking**
- **Making ice**
- **Washing fruits and vegetables**
- **Brushing teeth**
- **Drinking water for pets**

Hot water from a ZIP is not hot enough to kill germs as it doesn't have a continuous boil. We recommend using a traditional kettle or boiling water on your cooktop.

Filtered water needs to be boiled.
