Attn. Richard Newman

To Whom it May Concern

The Lakes District Museum Inc strongly supports the application to various charitable trusts, being made by the St Pauls Church committee. We understand this is for funding to undertake restoration and repair work on the church building and the vestry. The church members have been good custodians over the years, of this delightful, much used and photographed building. Arrowtown is renowned for the protection and preservation of its heritage buildings. This can naturally come at a cost to the owners especially if they are a charitable group. Both buildings are however Category II buildings on the Heritage NZ register, which means they must be cared for. Visitors and locals alike cherish what has been achieved in Arrowtown through heritage protection over the last 50 years. We wish the St Pauls fundraising committee every success with this project and are happy to answer any questions regarding this and offer any other support we can.

Yours sincerely
