Fee Proposal for Strengthening of Two Stone Chimneys at 21 Marine Parade, Queenstown.

(By email 04 06 2019)

Jackie,

We could either designed it to 34% or 67%. The only real difference being the size of the rod, and potentially significantly different base/ foundation requirements. I would have to do the numbers to see what may be required there.

Based on this type of scheme, and me providing sketches for you to show on the drawings, my fee estimate is \$2,000- + GST.

Steve
