This table identifies new provisions sought to be added:

Appellant Court Number	Provision/s Sought to be Added into Chapter 21
New Zealand Tungsten Mining Limited ENV-2018-CHC-151	Insert new paragraph to Section 21.1 Zone Purpose as follows: <u>Mining activity, including exploration and drilling, have often existed within rural areas which may be subject to a landscape classification, and have had no lasting adverse effects. These activities can provide significant ongoing economic, heritage and social benefits to the district where the environmental effects are managed appropriately. Many of the natural and outstanding landscapes in the District have already been significantly modified through mining activity and this adds to the special character of particular landscapes.</u>
Upper Clutha Environmental Society Incorporated ENV-2018-CHC-56	Insert new Rule 21.4.9.a: The use of land or buildings for residential activity within ONL/ONF is a non-complying activity.
Upper Clutha Environmental Society Incorporated ENV-2018-CHC-56	Insert new Rule 21.4.10.a: The identification of a building platform not less than 70m ² and not greater than 1000m ² within ONL/ONF is a non-complying activity.
Upper Clutha Environmental Society Incorporated ENV-2018-CHC-56	Insert a new assessment matter regarding the effects on openness of the landscape, based on the ODP 5.4.2.2.1(a).

Upper Clutha Environmental Society Incorporated ENV-2018-CHC-56	Insert new assessment matter to Section 21.21.1.4(g) requiring that proposed new boundaries will not give rise to artificial or unnatural lines (such as planting and fencing) or otherwise adversely affect the natural form of the landscape.
Upper Clutha Environmental Society Incorporated ENV-2018-CHC-56	Insert new assessment matter regarding cumulative effects of subdivision and development on the landscape, based on the ODP 5.4.2.2.1(e).

21.1 Zone Purpose

There are four rural zones in the District. The Rural Zone is the most extensive of these. The Gibbston Valley is recognised as a special character area for viticulture production and the management of this area is provided for in Chapter 23: Gibbston Character Zone.

Opportunities for rural living activities are provided for in the Rural-Residential and Rural Lifestyle Zones (Chapter 22).

The purpose of the Rural Zone is to enable farming activities and provide for appropriate other activities that rely on rural resources while protecting, maintaining and enhancing landscape values, ecosystem services, nature conservation values, the soil and water resource and rural amenity.

A wide range of productive activities occur in the Rural Zone and because the majority of the District's distinctive landscapes comprising open spaces, lakes and rivers with high visual quality and cultural value are located in the Rural Zone, there also exists a wide range of living, recreation, commercial and tourism activities and the desire for further opportunities for these activities.

Ski Area Sub-Zones are located within the Rural Zone. These Sub-Zones recognise the contribution tourism infrastructure makes to the economic and recreational values of the District. The purpose of the Ski Area Sub-Zones is to enable the continued development of Ski Areas as year round destinations for ski area, tourism and recreational activities within the identified Sub-Zones where the effects of the development are cumulatively minor.

In addition, the Rural Industrial Sub-Zone includes established industrial activities that are based on rural resources or support farming and rural productive activities.

A substantial proportion of the Outstanding Natural Landscapes of the district comprises private land managed in traditional pastoral farming systems. Rural land values tend to be driven by the high landscape and amenity values in the district. The long term sustainability of pastoral farming will depend upon farmers being able to achieve economic returns from utilising the natural and physical resources of their properties. For this reason, it is important to acknowledge the potential for a range of alternative uses of rural properties that utilise the qualities that make them so valuable.

The Rural Zone is divided into two areas. The first being the area for Outstanding Natural Landscapes and Outstanding Natural Features. The second area being the Rural Character Landscape. These areas give effect to Chapter 3 – Strategic Direction: Objectives 3.2.5.1 and 3.2.5.2, and the policies in Chapters 3 and 6 that implement those objectives.

21.3.2 Interpreting and Applying the Rules

- 21.3.2.1 A permitted activity must comply with all the rules listed in the Activity and Standards tables, and any relevant district wide rules.
- 21.3.2.2 Where an activity does not comply with a Standard listed in the Standards tables, the activity status identified by the 'Non-Compliance Status' column shall apply. Where an activity breaches more than one Standard, the most restrictive status shall apply to the Activity.
- 21.3.2.3 For controlled and restricted discretionary activities, the Council shall restrict the exercise of its control or discretion to the matters listed in the rule.
- 21.3.2.4 Development and building activities are undertaken in accordance with the conditions of resource subdivision consent and may be subject to monitoring by the Council.
- 21.3.2.5 **The existence of a farm building either permitted or approved by resource consent under Rule 21.4.2 or Table 5 – Standards for Farm Buildings shall not be considered the permitted baseline for residential or other non- farming activity development within the Rural Zone.**

Provision 21.3.3.5 and relief sought	Appellant Court Number	Consequentially Affected Provisions
Amend Rule 21.3.3.5: The existence of a farm building either permitted or approved by resource consent under Rule 21.4.2 or Table 5 – Standards for Farm Buildings shall not be considered the permitted baseline for residential or other non- farming activity development within the Rural Zone.	New Zealand Tungsten Mining Limited ENV-2018-CHC-151	

- 21.3.2.6 The Ski Area and Rural Industrial Sub-Zones, being Sub-Zones of the Rural Zone, require that all rules applicable to the Rural Zone apply unless stated to the contrary.
- 21.3.2.7 Building platforms identified on a site's computer freehold register shall have been registered as part of a resource consent approval by the Council.
- 21.3.2.8 The surface and bed of lakes and rivers are zoned Rural, unless otherwise stated.
- 21.3.2.9 Internal alterations to buildings including the replacement of joinery is permitted.
- 21.3.2.10 The status of any Plantation Forestry will be determined by the Resource Management (National Environmental Standards for Plantation Forestry) Regulations 2017 except where the land is an ONL, ONF or contains an SNA.
- 21.3.2.11 These abbreviations are used in the following tables. Any activity which is not permitted (P) or prohibited (PR) requires resource consent.

- a. **Physical attributes:**
 - i. geological, topographical, geographic elements in the context of whether these formative processes have a profound influence on landscape character;
 - ii. vegetation (exotic and indigenous);
 - iii. the presence of waterbodies including lakes, rivers, streams, wetlands.
- b. **Visual attributes:**
 - i. legibility or expressiveness – how obviously the feature or landscape demonstrates its formative processes;
 - ii. aesthetic values including memorability and naturalness;
 - iii. transient values including values at certain times of the day or year;
 - iv. human influence and management – settlements, land management patterns, buildings,
- c. **Appreciation and cultural attributes:**
 - i. Whether the elements identified in (a) and (b) are shared and recognised;
 - ii. Cultural and spiritual values for tangata whenua;
 - iii. Historical and heritage associations.

The Council acknowledges that Tangata Whenua beliefs and values for a specific location may not be known without input from iwi.

- e. any proposed new boundaries will not give rise to artificial or unnatural lines (such as planting and fence lines) or otherwise degrade the landscape character.

21.21.1.4 Effects on visual amenity

In considering whether the potential visibility of the proposed development will maintain and enhance visual amenity, values the Council shall be satisfied that:

- a. the extent to which the proposed development will not be visible or will be reasonably difficult to see when viewed from public roads and other public places. In the case of proposed development in the vicinity of unformed legal roads, the Council shall also consider present use and the practicalities and likelihood of potential use of unformed legal roads for vehicular and/or pedestrian, cycling, equestrian and other means of access;
- b. the proposed development will not be visually prominent such that it detracts from public or private views of and within Outstanding Natural Features and Landscapes;
- c. the proposal will be appropriately screened or hidden from view by elements that are in keeping with the character of the landscape;
- d. the proposed development will not reduce the visual amenity values of the wider landscape (not just the immediate landscape);
- e. structures will not be located where they will break the line and form of any ridges, hills and slopes;
- f. any roads, access, lighting, earthworks and landscaping will not reduce the visual amenity of the landscape.

21.21.1.5 Design and density of Development

In considering the appropriateness of the design and density of the proposed development, whether and to what extent:

- a. opportunity has been taken to aggregate built development to utilise common access ways including roads, pedestrian linkages, services and open space (i.e. open space held in one title whether jointly or otherwise);
- b. there is merit in clustering the proposed building(s) or building platform(s) within areas that are least sensitive to change;
- c. development, including access, is located within the parts of the site where it would be least visible from public and private locations;
- d. development, including access, is located in the parts of the site where it has the least impact on landscape character.

Section 21.21.1.5 Assessment Matters and relief sought	Appellant Court Number	Consequentially Affected Provisions
In considering the appropriateness of the design and density of the proposed development, whether and to what extent: a. ... b. there is merit in clustering the proposed building(s) or building platform(s) within areas that are least sensitive to change. <u>Where clustered development is assessed as being appropriate, consent shall be conditional on the balance of the subject site being covenanted against further subdivision and/or development in perpetuity. 21.21.1.6 Cumulative effects of subdivision and development on the landscape

Taking into account whether and to what extent existing, consented or permitted development (including unimplemented but existing resource consent or zoning) may already have degraded:

- a. the landscape quality or character; or,
- b. the visual amenity values of the landscape.

The Council shall be satisfied the proposed development, in combination with these factors will not further adversely affect the landscape quality, character, or visual amenity values.

21.21.2 Rural Character Landscape (RCL)

The assessment matters below have been derived from Policies 3.3.32, 6.3.10 and 6.3.19 to 6.3.29 inclusive. Applications shall be considered with regard to the following assessment matters because in the Rural Character Landscapes the applicable activities are unsuitable in many locations.

21.21.2.1 Existing vegetation that:

- a. was either planted after, or, self seeded and less than 1 metre in height at 28 September 2002; and,
- b. obstructs or substantially interferes with views of the proposed development from roads or other public places, shall not be considered:
 - i. as beneficial under any of the following assessment matters unless the Council considers the vegetation (or some of it) is appropriate for the location in the context of the proposed development; and
 - ii. as part of the permitted baseline

21.21.2.2 Effects on landscape quality and character:

The following shall be taken into account:

- a. where the site is adjacent to an Outstanding Natural Feature or Landscape, whether and the extent to which the proposed development will adversely affect the quality and character of the adjacent Outstanding Natural Feature or Landscape;
- b. whether and the extent to which the scale and nature of the proposed development will degrade the quality and character of the surrounding Rural Character Landscape;
- c. whether the design and any landscaping would be compatible with or would enhance the quality and character of the Rural Character Landscape.

21.21.2.3 Effects on visual amenity:

Whether the development will result in a loss of the visual amenity of the Rural Character Landscape, having regard to whether and the extent to which:

- a. the visual prominence of the proposed development from any public places will reduce the visual amenity of the Rural Character Landscape. In the case of proposed development which is visible from unformed legal roads, regard shall be had to the frequency and intensity of the present use and, the practicalities and likelihood of potential use of these unformed legal roads as access;
- b. the proposed development is likely to be visually prominent such that it detracts from private views;
- c. any screening or other mitigation by any proposed method such as earthworks and/or new planting will detract from or obstruct views of the Rural Character Landscape from both public and private locations;

- d. the proposed development is enclosed by any confining elements of topography and/or vegetation and the ability of these elements to reduce visibility from public and private locations;
- e. any proposed roads, boundaries and associated planting, lighting, earthworks and landscaping will reduce visual amenity, with particular regard to elements which are inconsistent with the existing natural topography and patterns;
- f. boundaries follow, wherever reasonably possible and practicable, the natural lines of the landscape or landscape units.

21.21.2.4 Design and density of development:

In considering the appropriateness of the design and density of the proposed development, whether and to what extent:

- a. opportunity has been taken to aggregate built development to utilise common access ways including roads, pedestrian linkages, services and open space (i.e. open space held in one title whether jointly or otherwise);
- b. there is merit in clustering the proposed building(s) or building platform(s) having regard to the overall density and intensity of the proposed development and whether this would exceed the ability of the landscape to absorb change;
- c. development, including access, is located within the parts of the site where they will be least visible from public and private locations;
- d. development, including access, is located in the parts of the site where they will have the least impact on landscape character.

21.21.2.5 Tangata Whenua, biodiversity and geological values:

- a. whether and to what extent the proposed development will degrade Tangata Whenua values including Tōpuni or nohoanga, indigenous biodiversity, geological or geomorphological values or features and, the positive effects any proposed or existing protection or regeneration of these values or features will have.

The Council acknowledges that Tangata Whenua beliefs and values for a specific location may not be known without input from iwi.

21.21.2.6 Cumulative effects of development on the landscape:

Taking into account whether and to what extent any existing, consented or permitted development (including unimplemented but existing resource consent or zoning) has degraded landscape quality, character, and visual amenity values. The Council shall be satisfied;

- a. the proposed development will not further degrade landscape quality, character and visual amenity values, with particular regard to situations that would result in a loss of valued quality, character and openness due to the prevalence of residential or non-farming activity within the Rural Landscape.
- b. where in the case resource consent may be granted to the proposed development but it represents a threshold to which the landscape could absorb any further development, whether any further cumulative adverse effects would be avoided by way of imposing a covenant, consent notice or other legal instrument that maintains open space.
